

Jane Backs Girl's Right To Marriage

Care of Young Brothers Not Her Burden Alone, Jordan Advises.

Put your problems in a letter to Jane Jordan, who will answer your questions in this column each day.

DEAR JANE JORDAN— I am 21 years old and have been going with a young man for four years. We planned to be married some day and I have looked forward to the time when we could see our way financially clear to marry. That time has come, but for the last year and a half I have had the responsibility of taking care of my brothers, 14, 16 and 18 years old.

None of my sisters think I should leave and get married until the boys are old enough to be out of school and on their own. I have three sisters, all older than myself, who do not want the responsibility I have. All are married; one is divorced and lives away from home. Another is living with her husband. The third is separated from her husband and living with us. I have to keep the date of my marriage a secret to prevent her from leaving home beforehand. She doesn't want to be there when I leave for then the care of the house would fall on her.

My father is living but does not stay at home. I am afraid he would send the two youngest boys to the orphan's home if there is no one to take care of them. I couldn't bear this. Neither can I bear to give up my boy friend. I know it will have to be one or the other. Do you think I should give up my brothers or stay single? I suppose you have an answer ready and think this is a very simple problem, but it isn't to me. It's on my mind from morning until night. All of my sisters work every day. UNDECIDED.

ANSWER—I do not think this is a simple problem and I have no ready answer, but I'm on your side and against your selfish father and sisters. You have every right to get married and if you have put in a year and a half of service it is time some other members of the family came to the rescue.

I do not know enough about the financial condition of your family to suggest a rearrangement. Who supports the boys now—your father? I do not think you need worry about the orphan's home. If he tried to place them there the authorities would soon search out the financially able members of your family and compel them to do their share.

Your problem is not hopeless at all. The ages of the boys are in your favor. The 18-year-old brother can take care of himself now and even the 16-year-old one can help earn his way by working after school. Two more years will make an enormous difference in their ability to take care of themselves so no one in the family is confronted with an unbearable burden.

I admire you very much for your responsible attitude toward your brothers but I see no reason for you to sacrifice yourself to them when you have a father and three sisters to help. Since you have sent your name and address I am sending you the name of someone who may be able to give you more practical aid than I in finding homes for your brothers. All I can do is reassure you about your right to marry, but I am sure you would be happier about it if your brothers are provided for first.

JANE JORDAN.

BID BLOCKS OPPONENT

Contract Problem (Solution in next issue)

West, using a forcing bid of one no trump, finds East responding with three clubs, which shows two honor tricks, but no five-card suit, except possibly clubs. Should West now rely on partner for diamond strength and bid three no trump?

WEST
AK104
A3
9632
K76
Neither side vulnerable.
Opener—K.

Solution to Previous Problem By W. E. McKENNEY

THE opening bid of one no trump is always used in the T. N. T. system when the opener holds three and one-half or more honor tricks. This rule holds true regardless of the distribution of the hand, and the result is, of course, noticeable in comparison with the one over one standard bidding methods, which prefer suit openings on the great majority of hands.

The no trump opener is the system's only forcing bid, and the best response is two clubs, which shows less than one honor trick. Today's hand, played in a recent championship tournament, is an example of the bidding of a strong hand opposite a very weak one.

Collegians Like Tailored and Boxy Swagger Coats

The full-length tailored box coat in beaver-dyed coney is popular with college girls.

Above, two triangles for the small collar that ends in a casual tie on a coat of gray squirrel. Below, silver muskrat in a boxy swagger coat of three-quarter length. Small collar and broad shoulders are new season style details.

Smart Yet Easy to Make

LOOKING for something super-ly smart and simple? Your prayer is answered, the number is at hand! For who can deny the irresistible "something" of this smart, surprise design, featuring the new waistline and a cleverly draped sash which is simply ravishing?

Pattern 8048 is designed for sizes 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40 and 42. Size 16 requires 4 yards of 39-inch or 2 1/2 yards of 54-inch fabric.

To obtain pattern and Step-by-Step Sewing Instructions inclose 15 cents in coin together with the above pattern number and your size, your name and address and mail to Pattern Editor, The Indianapolis Times, 214 W. Maryland St., Indianapolis.

The fall selection of late dress designs now is ready. It's 15 cents when purchased separately. Or, if you want to order it with the pattern above, send an additional 10 cents.

Old-Fashioned Fudge Cake Is 'Quick Way to Man's Heart'

By MRS. GAYNOR MADDOX

There are many ways to a man's heart. But the quickest is an old-fashioned chocolate layer cake.

Chocolate Layer Cake

(3 layers)

One-half cup shortening, 1 1/2 cups sugar, 3 eggs, 1 teaspoon vanilla extract, 2 1/2 cups pastry flour, 2 1/2 teaspoons tartaric acid powder or 2 teaspoons combination baking powder, 1/4 teaspoon salt, 2-3 cup milk.

Cream shortening; add sugar slowly, beating in well. Add well beaten eggs yolks and beat until well blended. Add vanilla extract. Sift together dry ingredients and add alternately with milk to first mixture. Mix in stiffly beaten egg whites thoroughly. Bake in greased loaf pan in moderate oven at 350 degrees F. about 1 hour, or in greased layer cake pans in moderate oven at 375 degrees F. about 25 minutes. Cool. Put layers together with filling; cover top and sides with icing.

Old-Fashioned Chocolate Filling and Icing

(For 1 three-layer cake)

Four squares unsweetened chocolate, 2 tablespoons butter, 1/2 cup milk, 3 tablespoons cornstarch, 3/4 cups confectioner's sugar, 2 eggs yolks, 1/4 teaspoon salt, 1 1/2 teaspoons vanilla extract, 4 tablespoons cream.

Melt the chocolate and butter together in top of double boiler. Mix the cornstarch with the milk. Add slowly to melted chocolate, stirring until thick and smooth. Add 1/2 cups confectioner's sugar and salt to egg yolks; add to first mixture. Continue to cook while beating until smooth. Add vanilla extract. Cool. Use half of this mixture to spread thickly between layers of cake.

Use the other half for icing by adding remaining 2 cups of confectioner's sugar and the cream slowly, beating until smooth. Spread on top and sides of cake.

The fashion for things Victorian makes a good fudge frosting recipe necessary for every modern housewife. This new one will delight you in its rich brown results.

Fudge Frosting

(To frost 18 cup cakes, top and sides)
Two cups sugar, 2 tablespoons corn syrup, 3 squares unsweetened chocolate, 1/2 cup milk, 1/2 teaspoon tartaric acid powder, 2 tablespoons butter, 1 teaspoon vanilla extract.
Cook sugar, corn syrup, chocolate and milk to 232 degrees F. or until syrup forms a very soft ball when tested in water. Stir occasionally to prevent burning. Remove from fire, add baking powder and butter. Cool to luke-warm. Add vanilla extract and beat until creamy and right consistency to spread.

Marigold Show To Be Featured In Club Exhibits

A marigold contest featured the North End Garden Club show this afternoon in the Woolen's Gardens. Marigolds entered were cultivated from seed distributed to club members at the March meeting. Mrs. Woodruff Randolph was show chairman, assisted by Mesdames J. R. Spalding and E. D. Parsons.

Members of the group are to join the Brookside Garden Club on Monday afternoon for a tour of Mrs. Ovid Butler Jackson's home. A tour of the Children's Museum is to be made later.

The Garden Club of Indiana is to make a pilgrimage to Indiana Dunes State Park on Sept. 29 and 30. Prof. R. B. Hull, Purdue University, is to be in charge. Garden Club of Indiana executive board members are to hold a business meeting during the pilgrimage. Mrs. Walter P. Morton is state club president.

Recent Bride To Be Feted at Shower Event

Misses Betty Dickson and Mary Lou Grove are to be cohostesses at a miscellaneous shower Sunday afternoon at the former's home, 3024 N. Pennsylvania St. Mrs. George Thatcher, who was Miss Leola Kelso until her marriage last month, is to be the honor guest. Other guests are to include Mesdames George R. Paton, Leonard Montgomery, Ray Smith and Misses Martha Schwankhaus, Mildred Nagley, Mary Nagley, Thelma Kinman, Julia Brooks, Marjorie Boatman, Virginia Brady, Mary Helen Haerle, Helen Judd, Louise Baker, Mildred Wallace, Lorena Niedhamer and June Miller.

Engagement Announced

Mrs. Morris Dock has announced the engagement of her daughter, Sadie, to Meyer E. Cohen, son of Louis Cohen. The wedding is to take place in December.

Active Gland Cause of Too Much Insulin

Weakness and Dizziness Are Symptoms of Such Condition.

By DR. MORRIS FISHBEN

Editor, American Medical Journal

In the discussions of diabetes which already have been published, mention has been made of the relationship of the Islands of Langerhans in the pancreas to the cause of that disease. The pancreas has not only an external secretion which goes into the intestines, aiding in the digestion of protein, but also an internal secretion which is vital in the handling of the sugar by the body. It has been proved that removal of the pancreas surgically results in death within three weeks, because of the tremendous increase of blood sugar in the body.

In 1922, Banting and Best, aided by McLeod and Collip, were able to develop the secretion of the Islands of Langerhans in pure form. This secretion is known as insulin. Insulin is now used, as I already have described, in the control of diabetes.

Oversupply Occurs

Since these fundamental discoveries were made, another condition has been found related to the pancreas which has to do with over-activity of this gland. Instead of an insufficient amount of insulin resulting in diabetes, there may be too much insulin secreted by the gland.

This occurs, for example, when there is a tumor of the pancreas or when there is inflammation with overstimulation. In this condition the content of the blood in insulin is also increased.

In mild cases, characteristic symptoms are muscular weakness, aversion to work, dizziness, ravenous hunger, palpitation, irritability and sweating. The intolerable and ravenous hunger is sometimes the most obvious symptom.

The effects on the mind and on the consciousness are also important.

Sugar Content Important

They are exactly the same as those which occur when a person has had too much insulin injected because of diabetes. In such cases, they may manifest first symptoms like those of drunkenness, eventual loss of consciousness altogether. When there is too much insulin in the body the amount of sugar in the blood falls greatly.

Obviously, it is exceedingly important for a doctor to make a competent examination which will indicate the amount of blood sugar that is present. This is important because sometimes excessive insulin or hyperinsulinism is mistaken for drunkenness, hysteria, or similar mental disturbances.

In people who suffer regularly with a slight amount of excess of insulin, it is necessary to provide extra sugar. If these people indulge in any muscular activity, such as a game of golf, they must have more sugar supplied during the muscular activity.

Altruism Club to Meet

Mrs. Grace Lewis is to speak on "The Background of the Historical Significance of Colonial Williamsburg" at the dinner meeting of the Altruism Club on Friday, Sept. 17, in the Columbia Club.

At Home Here

Mrs. Lawrence E. Busenbark was Miss Mildred Pavy, daughter of Mr. and Mrs. M. F. Pavy, before her marriage Sept. 1 in the St. John of Arc rectory. Mr. and Mrs. Busenbark are at home at 1530 N. Illinois St.

South America Culture Club's Study Subject

South America is to be the Culture Club's subject of study this year, according to announcement today by Mrs. James W. Costin, president, in the year book.

President's Day is to be observed Sept. 21, with Mrs. Hughes Patten as hostess. Other highlights of the year are to be a Christmas party Dec. 17 and the 37th anniversary celebration, Feb. 18. Guest day is to be on May 26.

Studies for the year are to include a survey of physical features of South America, the people of Peru, Argentina, Brazil, Bolivia and Chile; South American churches, the republics, music, art, literature and the railways, airways and waterways.

The program committee is composed of Mesdames Albert A. Ogle, Patten and Fred L. Warner.

Program chairmen during the coming year are to be Mesdames Ogle, W. N. Carpenter, W. O. Chessman, Orris Stanfield, Warner, C. A. McCotter, C. F. Posson, Charles Remy, Blanche McCoy, N. L. Schneider, F. C. Tucker, W. A. Rowland, Costin, G. B. Taylor, P. S. Chiles and C. E. Titus.

Other officers are Mrs. McCotter, vice president; Mrs. Tucker, secretary-treasurer; Mrs. McCoy, publicity chairman; and Mrs. Rowland, courtesies chairman.

Anita Club Lists 3 Study Courses

Three courses of study are to be pursued this year by Anita Club members, according to Mrs. Robert Shank, study leader.

Subjects are "Modern Use of the Bible," "Finding God," and "Little Known Women of the Bible."

Mrs. J. A. Salter was installed as club president at a recent meeting in the home of Mrs. Lewis Shott, 1414 N. Holmes Ave.

Other officers installed were Mrs. Robert Shott, vice president; Mrs. Shott, secretary treasurer, and Mrs. Shank.

Laboratory Is Pride of Park School

Record Enrollment Is Predicted for Fall Term.

Coming events are casting their shadows in the newly enlarged science laboratory at the Park School for Boys.

When the school bell summons students back to classes Sept. 22, school authorities are predicting the largest enrollment in science classes in the 18-year school history.

Shiny new equipment, ultra-modern scientific apparatus, commodious supply-cupboards, and a spacious lecture platform are among advantages of the laboratory, which has been doubled in room space since last year.

New Equipment Given

A complete science program is to be featured in the year's curriculum. Many useful gifts, such as measuring devices and pumps, have been contributed by interested parents of Park School students during the remodeling process this summer.

Several former students who have recently received outstanding honors in the science departments at Eastern universities and colleges point with pride to the elementary training at Park which they say gave them a head start.

William Burford III, who last spring was awarded the highest honors in organic chemistry at Johns Hopkins University, is a Park School graduate. He is to return to Johns Hopkins this year for Ph. D. work.

Two 1937 graduates from Park School plan to continue their study of science at Harvard University when they matriculate as freshmen this fall. They are Samuel Sherwood and John Rauch, who were notified this summer that they had passed their college board exams with high honors.

Wins High Harvard Honor

Sheldon Summers, who is to enter Harvard Medical College this month, has to his credit the award of highest honors in biochemical studies at Harvard, given last year.

Other members of the class of '37 at Park, many of whom are planning to major in science, have chosen to enter various colleges.

Williams College is to claim three. Miles Burford, Howard Miner and Arthur Lathrop are to leave this month for this Eastern school, where they will join another Park alumnus, William Gates, who is a member of the junior class.

Indiana University was the choice of Jack Corriden, Ronald Coyle and Jack Hatt. Ward Hackleman is bound for Washburn College; Walter Kuhn is to go to Dartmouth and Jerome Noel and James Darlington are to enroll at Cornell this fall.

Robert Ramage has received an appointment to the U. S. Naval Academy, and expects to report there the latter part of the month.

Entertains Sorority

Miss Nellie Passons, 1482 Roosevelt Ave., was to be hostess at a business and social meeting of Epilon Pi Chapter, Delta Theta Tau Sorority in her home today. Guests are to be Misses Letha Felix and Delores Schmidt.

Eyestrain days are here again!

HOMEWORK at night...that's a sure sign of the return of the eyestrain season. Now is the time when earlier darkness and more and closer work under artificial light increase the risk of eyestrain for everyone.

PROTECT PRICELESS EYESIGHT. Give your family Better Light. Fill empty sockets and replace burned out bulbs with brand new bulbs...the kind that stay brighter longer. And see that you have the right size bulb in every socket. One of our Home Lighting Advisors will be glad to visit your home and make a complete check up with the Light Meter.
