

WILLIAMSON PICKS OHIO STATE, PURDUE AND NOTRE DAME

Cornell Is Favored to Defeat Princeton in Close Tussle, DePauw, Butler Given Edge

Wabash Too Strong for Evansville While Ball State and Hanover Should Come Through With Victories, Expert Says.

By PAUL R. WILLIAMSON

FROM coast to coast the big Berthas of football are on the firing line this week-end, with a host of intersectional battles to intrigue the interest of fans and provide possible upsets.

Ohio State's invasion of the West Coast to meet Southern California heads the list, and the Buckeyes appear to have too much power for the Trojans.

California's Golden Bears should continue their march to gridiron greatness with an easy victory over Washington State.

In the East, Cornell, rated first in the nation under the Williamson system, should defeat Princeton in a close tussle.

Down in Tyler, Tex., where Texas A. & M. battles Mississippi State, I predict a major upset, with the invaders reversing the dope, as well as the Williamson system, by nailing out the Texas Aggies.

In other games of national interest, I like the chances of Purdue over Carnegie Tech, although a tie is possible, Minnesota over Indiana, Duke over Tennessee (another likely tie), Notre Dame easily over Illinois, and Pittsburgh over Duquesne.

In Indiana, Butler should win easily from Valparaiso and DePauw has the edge over Franklin. Wabash appears too strong for Evansville. Other Indiana predictions include Ball State to defeat Central Normal, Hanover to win a close one from Indiana State, and Bluffton to nose out Earlham.

EXPLANATION—After each team is its rating according to the current Williamson Football Rating Table, published earlier this week. In "Predict" column, 1, means win for No. 1 Team; 2, means win for No. 2 Team; T, means possible tie game or close outcome; R means prediction contrary to ratings. No. 1 Team plays at home. X, Friday afternoon; Y, Friday night; Z, Saturday night.

These predictions are made on the basis of the teams' past performance to date this season, as measured by the Williamson rating. They tell as closely as possible the exact shade of difference between each of the competing teams, so far as this is revealed by their previous records this season. When the symbol "T" with a number appears in the Predict column, the number indicates the team which is slightly favored, but a very close "decision or upset" is predicted as possible. A difference of 3 percentage points or less in the ratings of two teams often indicates that they are evenly matched and their game is a "toss-up."
