

## SAFETY SIGNALS FOR SOUTH SIDE ASSURED 'SOON'

State Official Denies Undue  
Delay in Installation  
At Crossings.

The South Side Civic Club, which has been seeking for months to eliminate traffic hazards at South Side railroad crossings, will meet at the South Side Turner Hall at 8 p. m. tomorrow with the assurance that safety signals are to be installed "as soon as possible."

Answering the club's recent charge of delay of installation, Fred Kellam, State Highway Commission design engineer, said lights for three intersections have been ordered, but installation usually requires about four months. He denied unnecessary delays.

### Curb Lights Asked

The club has demanded removal of center lights on concrete posts at the Madison Ave. intersections with the Pennsylvania and Bell Railroads and at the Southeastern Ave. crossing of the Pennsylvania and Baltimore & Ohio Railroads.

During the year four fatal and 19 other crashes have occurred at the Madison Ave. crossing. To eliminate that hazard, the Club asks that the new lights be installed at the curb.

The lights are designed by the railroad. The designs are checked by the Highway Commission and then sent to the Federal Government at Chicago for approval.

### Railroad Plans on Way

Plans for the equipment at Southeastern Ave. and the Pennsylvania and B. & O. Railroads have been completed, but not approved formally by the railroads.

Materials have been ordered for the lights on Madison Ave., but Mr. Kellam said there might be some delay because of war orders.

He said the railroad's plans for the lights at Madison Ave. and the Pennsylvania Railroad were to be received in a few days.

The four or five months necessary for designing and approval is due not so much to the exterior design of the signals, but to the wiring system that must be planned, Mr. Kellam declared.

Most lights have been standardized and the new ones will have larger lenses, will give more light and will have a black disc behind the light.

### 'LAST RIDE' SWELL'S INTERURBAN LOAD

SEYMOUR, Ind., Nov. 2.—The finale of interurban service south of Seymour at 12:45 a. m. yesterday brought a business boom to the dying line.

The usual number of passengers was swelled to a paying load by persons making the trip "just to be in on the last ride." Service between Indianapolis and Seymour will continue on about the same schedule. Freight shipments between Indianapolis and Louisville will be by truck.

## Science:

New Test Reveals Presence of  
Syphilis in 20 Minutes, Is Claim.

BERKELEY, Cal., Nov. 2 (U. P.).—A University of California biochemistry professor revealed today that he and a medical student had developed a new blood test to determine the presence of syphilis. It requires but two drops of blood and can be concluded in 20 minutes, he said.

Prof. Paul L. Kirk and Clifton Bennett, now a medical student at Johns Hopkins University, developed the test. Prof. Kirk said it had been confirmed on 150 patients with results as accurate as any of the old methods, all of which required from two to 24 hours.

The new test will be particularly useful in emergency blood transfusions when it is necessary to determine that the donor's blood is free of disease.

**Improve Livestock Strains**  
WASHINGTON, Nov. 2 (U. P.).—Agriculture department scientists have announced the successful conclusion of a five-year experiment in artificial breeding as a means of improving livestock strains.

Experiments begun in 1934 were said to have shown that artificial insemination of cattle, swine, sheep and work animals is a practical and economical method for spreading the influence of good sires.

The department has decided to sponsor this method on a nationwide scale in co-operation with livestock breeding associations. Already, 15 government-sponsored associations have been established, and others are being formed.

The new method, the scientists said, makes it possible to extend the influence of good sires from 10 to 20 times beyond that possible by natural mating. A higher percentage of desirable offspring also is obtained, they said.

**Chart Stratosphere Heat**  
CAMBRIDGE, Mass., Nov. 2 (U. P.).—Existence of two high-temperature layers in the stratosphere has been shown by the flaming paths of meteors, according to Dr. Fred L. Whipple of the Harvard Observatory.

The astronomer said that the

temperature is about 100 degrees centigrade, the boiling point of water, 38 miles above the earth's crust. And at 70 miles, the heat is about 20 degrees centigrade, ordinary room temperature.

The findings were made possible by a new type of meteor speedometer in use at Harvard for two years. It offered an entirely new approach, the most reliable yet found, to the much disputed problems of temperatures in the upper air.

## 3 LOSE DEMAND FOR 'JOHN DOE'S' \$10,000

VALPARAISO, Ind., Nov. 2 (U. P.).—Judge Charles W. Jensen in Porter Circuit Court ruled yesterday against three Michigan residents who sought to join their claim for \$10,100 cash found on the body of an unidentified La Porte County hit-and-run victim killed in 1937.

He held their petition, alleging that "John Doe" was Fred Reeber, formerly of Detroit, Mich., was insufficiently supported by fact. He continued a hearing for two other claimants of the money.

## HUNDREDS OF FREE GIFTS FOR WILSON'S MILK LABELS

Many useful gifts are always available to users of Wilson's Milk for saving the blue and white labels on the cans. Kitchen ware, cutlery, linens, also games and athletic goods for children.

Your labels add up fast, because this double rich milk is so good for all your cooking, for coffee, cereals and for baby feeding. Contains all the food value of whole milk with extra vitamin D.

Order from your grocer and save the labels. Write for catalog of premiums and recipes.
