

Gallup Poll Shows—

# MAJORITY STILL OPPOSES THIRD TERM PRINCIPLE

Many Approving Roosevelt As President Remain Cool To Re-election.

By DR. GEORGE GALLUP  
Director, American Institute of Public Opinion

PRINCETON, N. J., Jan. 12.—Although Franklin D. Roosevelt's popularity as President continues about as great today as in the election year of 1936, evidence that the idea of a Roosevelt third term has not been accepted by a majority of voters is indicated in a national American Institute of Public Opinion survey.

For many months the Institute, by means of repeated cross-section studies, has kept two separate and distinct indices of public sentiment regarding the President. One is the month-by-month popularity of Mr. Roosevelt in his role as Chief Executive.

The other is an index of the number of voters who are for or against the principle of a Roosevelt third term.

Between the two indices there is generally a difference in result of from 15 to 20 percentage points, for the reason that not all of the voters who approve of the President at this stage of his second term say they would be willing to vote for him for a third term.

In the most recent third term survey, completed this week, 46 per cent said they would vote for Mr. Roosevelt if he ran again. This is substantially smaller than the number who approve of him as President today, as the following comparison shows:

"In general, do you approve or disapprove today of Roosevelt as President?" (December)

Approve	63.5%
Disapprove	36.5%

"If President Roosevelt runs for a third term will you vote for him?"

Yes	46%
No	54%

The trend of sentiment in the last few months, however, has been in a direction decidedly favorable to a third term. Since the beginning of the European war crisis last summer there has been a sharp increase in the number of voters in Institute surveys who say they would vote for Roosevelt for another term.

	Would Vote For 3d Term	Would Vote Against
May	33%	67%
Aug.	40%	60%
Oct.	43%	57%
Today	46%	54%
