The exhibition is being sponsored by Bundles for America. The plane was sent here at the request of Mrs. Winston Churchill, wife of Britain's prime minister. ## SHOT DOWN IN LONDON RAID

Craft Sent Here by British  
Will Be at University  
Square 5 Days.

Indianapolis has heard its share about the vaunted Messerschmitt 109, the Nazi plane that swarmed like locusts over London "during the dark days." Now Indianapolis has an opportunity to see the once dreaded 109.

One of the 109s shot down over London will be on display from 10 a. m. until 10 p. m. for five days, starting tomorrow on University square.

### Deadliest Craft of 1939

The formidable German aircraft has been loaned to Bundles for America to continue its fund-raising activity in behalf of American fighting men.

A single-seater, with a wingspan of only 32 feet the 109 was considered the world's deadliest military airplane at the outbreak of hostilities in 1939. It was Germany's first line combat pursuit ship.

Originally designed as a racing plane, the ship was taken over by the German air corps and converted into a fighter. It was armed with four machine guns and three light cannon and fitted with a Daimler-Benz engine of 1150 horsepower.

### Top Speed 355 M. P. H.

Top speed is 355 m. p. h. in level flight. Its cruising range, 620 miles, is sufficient to take it over London and other England points from French coast bases.

Trophy stripes on the tail, just forward of the swastika emblem, attest to five victories over allied planes during its air career. Two French, one British and two Dutch planes are listed among the victims.

Start Work on First Keel  
For U. S.; Use Savings  
To Finance Project.

SAUSALITO, Cal., May 12 (U. P.).—The Ship Building Corp. organized by workmen and financed out of their savings began operating today, laying its first keel.

A shipfitter is president, another is secretary-treasurer, and the vice president is a boiler maker.

There are 64 partners in the co-operative business. All are shipyard workers. Before the war they were employed in San Francisco bay shipyards.

On Dec. 8, the day after Pearl Harbor, they incorporated to take over an abandoned shipyard. The army got the yard.

So they acquired land on the bayfront here and on Jan. 20 ground was broken for a four-way yard.

Today the yard began working on its first war contract, an army order for barges.
