

WORK OF FOOD PARLEY VIRTUALLY FINISHED

NATIONS PLEDGE TO END HUNGER

Governing System Adopted For Permanent Setup To Feed World.

HOT SPRINGS, Va., June 1 (U. P.).—The United Nations food conference virtually completed its work today with approval of a declaration of principles and adoption of a governing system for the permanent organization which will work toward the objective of a better fed world.

Both actions still require the sanction of a plenary session, but that was regarded as only a formality since the sentiment of the conference has been clearly defined in committee sessions and in the work of the men who have drafted the final resolutions.

The completed results of this conference will reflect the care and preparation given to it by the American representatives, whose broad objectives at the outset have in more than two weeks of intensive work been upheld and translated into formal action by the representatives of 44 nations.

Jones Anticipated Declaration

The declaration of principles was anticipated by Judge Marvin Jones, chairman of the American delegation and president of the conference, the day after the conference opened, on May 19. At that time it was revealed that the American delegation believed the conference should issue a "ringing declaration" to the world that the allied nations intended to accept a new responsibility for seeing that their people are better fed.

That declaration has now been completed. It has gone through some 35 revisions in drafting committees until its language is believed to have been fitted into the spirit of sincerity and confidence which these delegates wish to carry to the world.

Interim Body Set Up

It conveys a message of cheer to under-nourished people everywhere, pledging that the nations involved will see to it that surpluses are never again wasted and that in time hunger will be eliminated from the world.

The governing system of the permanent organization which will grow out of this first united nations conference begins with the arrangement for an interim food commission which will be established not later than July 15, probably in Washington.

The interim commission will develop into a permanent international food office which will carry on under the keynotes struck here, gathering and disseminating information on improved nutritional standards, supplies and production of food; the care of special sections of the population, and in time probably developing into an advisory body for improving diets and, in general, raising the standards of living throughout the world.

The conference secretariat last night made public the full texts of action recommendations which were made available in summary form Sunday.

Your Health in War-Time

Rest and Moist Dressings Help Strained Ligaments

By DR. THOMAS D. MASTERS

Sprains are usually partial, but sometimes complete, tears of some of the supporting ligaments of a joint. These occur when the joint is forced beyond its normal range of movement.

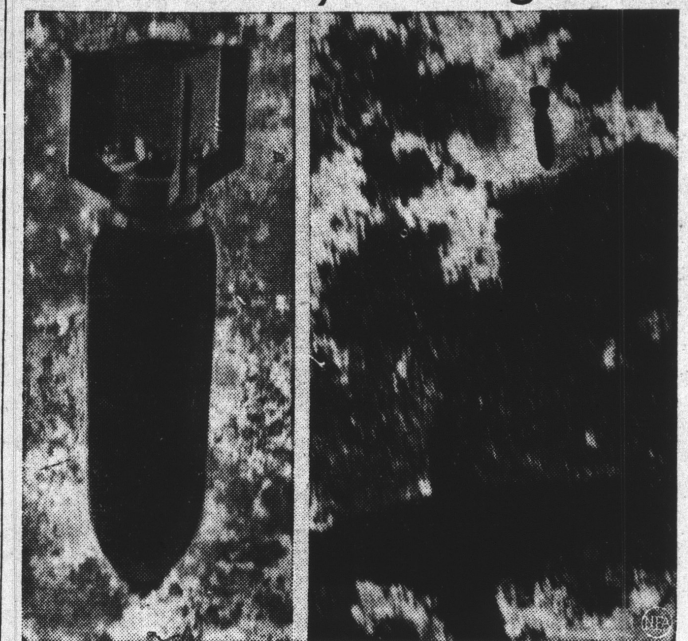

If the ligament is torn, the extra stretch may save the bone if it is attached to. If the ligament is stronger and resists the strain, the bone is likely to be broken. Sprains vary greatly, from those causing a few moments' discomfort and limping, to those involving actual rupture of the ligament, which requires weeks to heal.

The ankle joint is most frequently sprained, because it bears the weight of the body and is subject to the greatest strain and labor. For the same reason, a sprained ankle is most disabling of all such injuries.

The ankle joint is supported on both sides by strong ligaments, but those on the inside of the ankle are generally the strongest. Therefore, strains usually occur when the foot is rocked inward. Fractures are more frequent when the foot is wrenched away from the midline.

The initial pain of such a sprain is often severe and sometimes causes nausea or fainting. It becomes difficult or impossible to bear the weight on the strained ankle. Gradually a puffy swelling develops about the point, and

Bombs Away!—Target Hit

Down from the bomb-bay of a Flying Fortress goes a deadly missile headed for its target on the South Pacific waters below. The shadow of plane is seen (right) as bomb nears the water on this dress rehearsal for a future mission against the Japs.

And here's the result—a direct hit on the derelict ship that was the target of this bomb practice off the New Guinea coast.

Presbyterians Plan Church Aid on Post-War Problems

NEW WILMINGTON, Pa., June 1 (U. P.).—A comprehensive program for church co-operation in problems growing out of world war II was advanced today in a series of resolutions adopted at the closing session of the 85th general assembly of the United Presbyterian Church in North America.

The assembly of 200 delegates, representing more than 200,000 members, recommended that each church make provisions in its program this year to study the basis of a just and durable peace and asked for co-operation with all interdenominational agencies in their programs of education and action in this field.

Secretary of War Stimson and Secretary of the Navy Knox were commended for reducing Sunday labor in the army and navy to the measure of strict necessity and for their encouragement of men in the services to attend church services on the Sabbath.

The assembly commended the government, industry and labor for the progress that has been made in removing racial barriers from military service and war industry and urged that these efforts be continued.

The church group also commended civil and military authorities for their sympathetic handling of the American-Japanese in their evacuation and confinement and the federal council of churches for its ministry to these Japanese. It urged that serious study be given to the problem of resettlement and return of those groups to normal life after the war.

GIRL DIES IN CRASH

FT. WAYNE, Ind., June 1 (U. P.).—Marjorie Taylor, 13, Detroit, was killed when the automobile in which she was riding careened out of control yesterday.

WAAC Candidates' Tests Are Similar to Ones for Draftee

By Science Service

WASHINGTON, June 1.—Psychological tests are given women applying for acceptance in the WAAC by the same section of the adjutant general's office that administers tests to men selected by local boards for army service, but the tests differ in several respects. They are described in the new issue of Science.

The first given the women is a mental alertness test to screen out the unfit. It includes items of six types: Information, vocabulary, arithmetic, judgment, proverb interpretation and comprehension of graphs and tables. This is followed by a classification test, an aptitude test, and a proficiency test.

The classification test is similar to that given the men. The aptitude tests used concern mechanical aptitudes, clerical aptitudes, and

GOP POST-WAR GROUP NAMED

Spangler Appoints 49 to Draft Realistic Peace Program.

WASHINGTON, June 1 (U. P.).—Republican National Committee Chairman Harrison E. Spangler today announced appointment of a 49-member Republican post-war advisory council to develop "a realistic peace-time program for American progress."

He said the council—composed of members of congress, governors and party officials—will submit recommendations to the national committee prior to the next G. O. P. national convention.

All Republican leaders will be consulted on the program, he said, including former President Herbert Hoover and the last two G. O. P. presidential nominees, former Governor Alf M. Landon of Kansas and Wendell L. Willkie. Outstanding spokesmen for agriculture, labor and industry also will be consulted, he added.

Victory Comes First

"Although the winning of the war is our first concern," Spangler said, "the Republican party is intensely interested in the tremendous problems, both foreign and domestic, which will face us when victory comes."

These problems, he said, "will arise as an aftermath of the war, accentuated by our 10-year debacle under the reactionary new deal."

"The problem of a lasting world peace must be met courageously and realistically," he said. "We must approach this in a spirit of friendly co-operation with the other nations of the world, keeping in mind the welfare of our own country."

The council, Spangler said, "must plan for an abundance as against the new deal philosophy of scarcity which is rapidly bringing us to a condition where our people will be hungry."

"We must plan to create instead of destroy," he said. Spangler said the council was organized with the co-operation of Senator Charles L. McNary of Oregon and Rep. Joseph W. Martin Jr. of Massachusetts, Republican leaders of the senate and house, respectively. He said it will hold a meeting soon "at a central point."

Its members are:

Senators—Arthur W. Vandenberg of Michigan, Albert Hawkes of New Jersey, Robert A. Taft of Ohio and Warren E. Austin of Vermont.

Representatives—Martin, Albert E. Carter of California, Everett M. Dirksen of Illinois, Charles Halleck of Indiana, Clifford R. Hope of Kansas, Edith Nourse Rogers of Massachusetts, Roy V. Woodruff of Michigan, August H. Anderson of Minnesota, Louis E. Miller of Missouri, Daniel A. Reed of New York, Francis E. Bolton of Ohio and Carroll Reece of Tennessee.

Governors—Earl Warren of California, John W. Davis of Colorado, Raymond E. Baldwin of Connecticut, Walter W. Bacon of Delaware, C. A. Baskin of Idaho, Dwight H. Green of Illinois, Bourke B. Hickenlooper of Iowa, Andrew Schoepel of Kansas, Sumner Sewall of Maine, Everett Saltonstall of Massachusetts, Harry P. Kelly of Michigan, Edythe of Minnesota, Forest C. Donnell of Missouri, Sam Ford of Montana, Dwight Griswold of Nebraska, Robert C. Blood of New Hampshire, Thomas E. Dewey of New York, John W. W. Sherman of Ohio, Earl C. Bland of Oregon, Edward Martin of Pennsylvania, C. W. Sharp of South Dakota, William H. Willis of Vermont, Arthur B. Langley of Washington and Walter S. Goodland of Wisconsin.

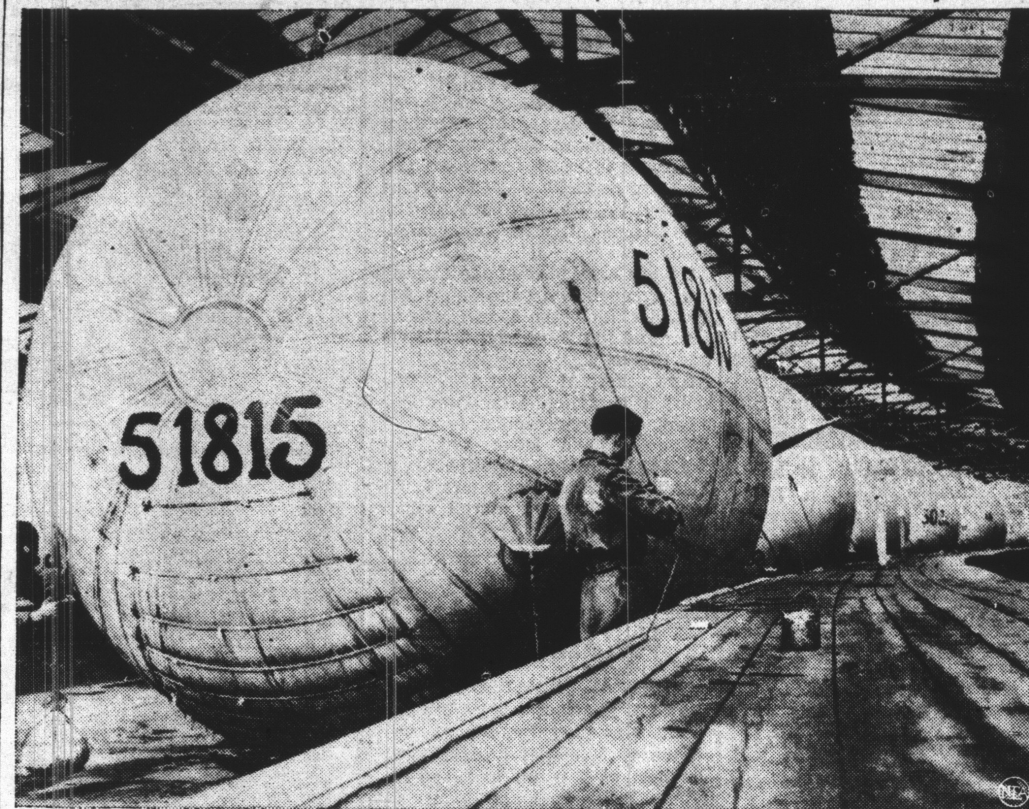

Party Officials—Rep. J. William Ditter of Pennsylvania, chairman of the Republican congressional campaign committee; former Senator John G. Townsend Jr. of Delaware, chairman of the Republican senatorial campaign committee; Clarence Budington Kelland, national committeeman from Arizona; Henry Leonard, national committeeman from Colorado; Mrs. Bertha Baur, national committeewoman from Illinois; Mrs. Dudley C. Ray, national committeewoman from Michigan; Dan Weston, national committeeman from Montana, and H. Alexander Smith, national committeeman from New Jersey.

a special test for radiotelegraph operators. The particular mechanical aptitude test given the women is known in the army as MA-4. It includes the recognition of tools and an understanding of mechanics.

The clerical aptitude tests are intended to determine aptitudes and ability in general clerical work. The radiotelegraph operator aptitude test is the army ROA-1, X-1, which contains 156 items each consisting of two code patterns sounded in succession. The person being tested indicates if the two patterns are the same or different. These code items are on phonograph records to facilitate group testing.

Written and oral tests are then given to test the women in radio repair work, automobile repair and other matters requiring mechanical skill.

Balloons Used to Guard Small Ships

Lined up like a train in a station, these royal navy balloons are awaiting duty in the inflation shed that is their "hangar." They protect small vessels from air attack.

DROP 36 TONS ON JAP BASE

Yanks Carry Out Their Biggest Raid So Far On Lae.

ALLIED HEADQUARTERS, Australia, June 1 (U. P.).—Allied bombers dropped 36 tons of explosives, including 1000-pounders, on Lae in the biggest raid ever directed against that northwest New Guinea Japanese base, a communique said today.

The Lae attack was a continuation of the hammering given New Guinea coastal strongpoints while stormy weather that started a week ago hampered long-range operations.

A spokesman said Lae installations were damaged heavily, particularly the terrace area, formerly a residential section but now believed to be used for military purposes. Liberators carried out the raid early yesterday and all returned safely despite anti-aircraft fire.

Long-range fighters destroyed an enemy bomber and damaged a fighter on the ground in a strafing attack on the airfield at Langgoer, in the Kai islands, and shot down one of six Zeros that tried to intercept them. A single plane bombed the Finsch harbor area of New Guinea.

PLAN DRIVE TO END MOSQUITO MENACE

The state health board and U. S. public health service tomorrow will begin an intensive drive to stamp out malaria-carrying mosquitoes which are breeding abundantly in Indiana.

The first step will be an aerial survey of "dead streams, those which have no drainage after recent swells and in which the mosquitoes spreading the dreaded disease hatch rapidly.

Tomorrow's survey will cover the northern half of the state. Another will be made in the southern half later after flood-swollen rivers and other streams have receded.

Heading the survey will be Joseph L. Quinn, chief sanitary engineer of the state health board, and Lt. G. R. Christianson of the U. S. public health service.

Dr. Thurman B. Rice, acting director of the state health board, said malaria-control problems have been increasing in Indiana during the last year.

TAKE BRIEF RECESS IN DEMPSEY TRIAL

WHITE PLAINS, N. Y., June 1 (U. P.).—Trial of the Dempsey divorce suit was recessed for several hours today to permit counsel to produce a physician to affirm the "complete nervous collapse" of Mrs. Hannah Williams Dempsey, who failed to appear when the case resumed this morning.

Supreme Court Referee J. Addison Young denied a motion by Mrs. Dempsey's attorney, Gerald Donovan, for an adjournment of one week.

12 DIE IN STATE DURING HOLIDAY

Week-End Is One of Safest Memorial Days Since Horse and Buggy.

Three fatalities yesterday increased Indiana's violent death toll for the double Memorial day holiday to 12.

William Dorselne, 87, Fulton county assessor for 16 years, was killed when his stalled automobile was struck by a Chesapeake & Ohio train near Kewanna.

Marjorie Taylor, 13, of Detroit, was killed when the car in which she was a passenger overturned near Ft. Wayne.

Joseph Renaldi, 65, was said by authorities to have hanged himself in his Elkhart home.

By UNITED PRESS

The nation celebrated one of its safest Memorial day week-ends since the automobile replaced the horse and buggy, a state-by-state survey showed.

The accidental death toll for the three-day holiday stood at 144, compared with last year's total of 350 deaths.

Gasoline rationing, the 35-mile per hour speed limit and an abbreviated holiday for war workers were important factors in the safety record.

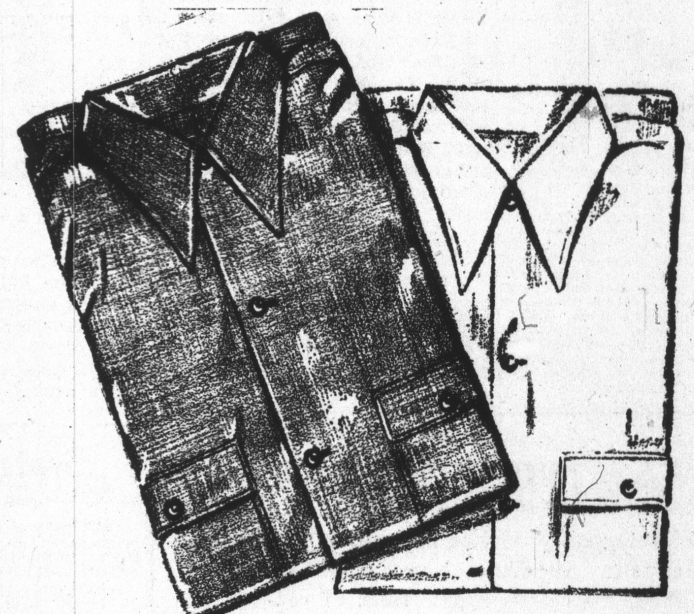

Traffic accidents killed 71 persons, far less than the normal peace-time total. Miscellaneous accidents claimed the lives of 38 persons, and 35 others drowned.

As in previous years, California led the 48 states, reporting 18 dead. Seventeen were killed in highway mishaps. Indiana was second with 12 killed, seven of them in automobiles.

TERRY MOORE JOINS ARMY

BALBOA, C. Z., June 1 (U. P.).—Terry Moore, former outfielder for the St. Louis Cardinals, was sworn into the army air force this morning at headquarters at Quarry Heights, and was inducted immediately.

Strauss Says— IT'S ONE DAY NEARER VICTORY!

GENTLEMEN
DONEGAL! A SPORT SHIRT THAT HAS ABOUT

EVERYTHING IN IT—EXCEPTING YOU!

AND YOU ought to get into it—to make the record complete!

The fabric is a Cotton CHAMBRAY—that washes almost as easily as a handkerchief—and always comes up—fresher than its original state.

And it's a fabric that has PLENTY OF ENDURANCE. It's FEATHERLIGHT to keep you cool!—to allow the breezes through to you! It's SANFORIZED—to keep it from shrinking (beyond a measly 2%).

AND IT RAISES A MAN'S APPEARANCE (whereas some Sports Shirts—sorry to say—wreck it).

"Donegal" has a way of lining a collar and cuffs that gives them body—and staying quality—And the SHIRTS ARE FINISHED so that when worn open have a neat and complete look.

RATIONING DATES

Canned Goods

Blue Stamps G, H and J expire June 7. Blue Stamps K, L and M expire July 7.

Meat

Red Stamps J and K are good; L becomes good June 6; M, June 13; N, June 30. All expire June 30.

Coffee

Stamp 24 is good for one pound through June 30.

Sugar

Stamp 13 is good for five pounds through Aug. 15. Stamps 15 and 16 good for five pounds for home canning through Oct. 31.

Shoes

Stamp 17 good for one pair through June 15. Stamp 18 becomes good for one pair June 16.

Gasoline

Stamp 6 in A book expires July 21.

Tires

Second Inspection Deadline: A book vehicles by Sept. 30; B's by June 30; commercial vehicles every 60 days or 5000 miles, whichever is first.

Fuel Oil

Stamp 5 must last until Sept. 30 for heat and hot water.
