7-Point Plan Suggested
To Save Hat Materials

By ANN STEVICK

Times Special Writer

WASHINGTON, Aug. 20.—The millinery industry has come out with a 7-point plan for voluntary co-operation with the government to save hat materials. No hat will be made with a brim circumference of more than 48 inches, nor a beret with more than 38-inch circumference. Fabric hats can't use more than six yards of cloth for a dozen hats. Hats made from flat felt are also limited to an average of one-half yard. Only one and one-half yards of ribbon will be used per hat, not including the headband. No more than one yard of 19-inch veiling will be used on a hat.

Beef Coming

THE NORMAL seasonal increase of beef is late, but it will be here soon, according to the war food administration. The next two months will see an increase in the beef supply over June and July, but the usual January increase is not expected this year, because stock probably won't be held for fattening. No beef at all is going to our allies. Russia gets a good deal of pork, but our civilians get about three and one-half pounds of every five pounds of our beef. The army gets a bit over a pound, and the Red Cross some.

Enriched Flour?

WITHIN A FEW weeks there will be a decision in the compulsory enrichment of flour controversy. The war food administration feels the present compulsory enrichment of white bread does not go far enough.

WFA says most millers want compulsory enrichment of flour because it will increase the consumption of flour. The baking companies are opposed, fearing having to absorb the increased cost. Also there is some opinion that a slight vitamin loss occurs if the enriched flour is stored.

At any rate, it is definite that the required enrichment of bread per pound of flour will be greatly increased on Oct. 1. Riboflavin will be added, and the other parts of the vitamin B complex more than doubled.

Odds 'n' Ends

THE SOAP "shortage" is largely artificial, according to the war food administration. Much more has been bought than has been used. In the next three months there will be at least 80 per cent of the normal 1940 and '41 supply, which is enough to go around if it is carefully used, and not hoarded. . . . Moisture-proof cellophane is now available in rolls or in bags for home quick-freezing of foods. . . . At the end of the war nylon plants can shift from parachutes to stocking yarn in a matter of days. . . . Milkweed floss, whose domestic production is being urged by the department of agriculture, is being used for airplane insulation, life jackets. . . . After the war it may turn up in your pillows and mattresses as a substitute for kapok.

Your Health in Wartime

Most Industrial Injuries
To Eyes Can Be Prevented

By DR. THOMAS D. MASTERS

Times Special Writer

The unprecedented drive for war production has many angles, and the prevention of eye injuries is certainly not the least important of these. Industrial accidents alone account for the loss of more than two thousand eyes each year, in spite of the fact that ocular injuries are largely preventable.

Unless education concerning methods of prevention of eye injury is emphasized, the demands of war on industry may increase the incidence of serious accidents to the eye. Large industries maintaining safety directors and medical staffs have accounted for a relatively small proportion of eye injuries.

Dr. Masters

Practically every occupation is hazardous to the eye, but those where flying particles are frequent, molten metals may be splashed, acids or injurious light rays are obviously dangerous. There are no insignificant accidents to the eye.

Check Eye Condition

A preliminary physical examination before entering industry should include a careful examination of the eye. Uncorrected visual defects not only lead to poor work and increased error, but to greater likelihood of accidents.

Protective goggles are of many kinds, and must be adapted to the risks present. Occupations in which flying objects are likely to occur call for goggles having hardened glass and equipped with side shields. Fine particles and dust can be occluded only when the glasses completely enclose the eyes. Goggles of the eye-cup type should be employed when the hazard is the splash of acid or molten metal. Such glasses, without holes for ventilation, will provide protection against fumes or gases.

When glare must be eliminated, colored lenses made of hardened glass should be used. Infra-red and ultra-violet rays may be filtered out by colored lenses. Electric arc and hydrogen welding produce rays of such intensity

that the entire face must be protected by a helmet.

Workmen who wear glasses for the correction of refractive errors should not burden themselves with goggles, too. Instead, the proper correction should be ground into the goggle lenses. Goggles should be fitted with the same care as corrective glasses. If they are not comfortable, they may be taken off just when they are most needed. Condensation of moisture on the lens may be reduced by applying soap to the glasses, and rubbing them until a high polish is produced.

Although goggles are probably the most important single factor in preventing eye injuries, machinery and tools designed with safety in mind, or the employment of protective shields are also important. The best eyes become fatigued in the presence of faulty illumination.

AT 30 DEGREE ANGLE

NEW YORK, Aug. 20 (U. P.).—The former luxury liner Normandie rode at an angle of 30 degrees today, with the hull pumped dry of the 100,000 tons of water that capsized her when she was ravaged by fire a year and a half ago.

YOUR WASTE PAPER

IS GOING TO WAR

Ammunition chests, wing tips, blasting kags, and other weapons of war are being made from your waste paper, old boxes, bags, newspapers, and especially brown papers and containers. Save all forms of waste paper, to help relieve the critical waste paper shortage and avert curtailment of war production of paper products. Flatten out boxes, stack loose paper into neat bundles. To sell your accumulation to a dealer, or to give to charitable or other organizations, call a collector at MA 3321.

EVENTS TODAY

National Association of Negro Musicians, regional conference, Mt. Zion Baptist church, all day.

EVENTS TOMORROW

Boy Scouts of America, Eagle board of review, Central Y. M. C. A., 8:30 a. m. Noon luncheon in Indianapolis Athletic club.

MARRIAGE LICENSES

These lists are from official records in the county court house. The Times, therefore, is not responsible for errors in names and addresses.

Clarence McCloud, 21, of 1144 S. Denny; Agnes Elizabeth Hinnan, 16, of 727 E. Georgia.

Frank Terrell, 26, Columbus, O.; U. S. army; Loretta Irene Knauer, 23, of 2602 Winthrop.

Stewart James Kesterson, 22, R. 4, Box 227; Mildred Lucile Zook, 20, of 2714 Madison.

Joseph Leslie Harbort, 20, U. S. army; Rapid City, S. D.; Mildred Mae Wood, 19, of 538 Marion.

Lloyd Earl Souders, 26, of 531 Broadway; his Bloomington, 26, of 2045 College.

Henry C. Boffin, 30, 223 N. Jefferson; Edith Perry, 60, of 3839 N. Capitol.

Paul William Mason, 22, of 1808 Vander; Louise Lucille Landers, 18, of 1913 Vander.

BIRTHS

Edward, Sadie Gresham, at City. Albert, Alberta Jahn, at St. Vincent's.

Eugene, Violet Jackson, at St. Vincent's. Howard, Margaret White, at St. Vincent's.

Charles, Helen Kinnaman, at Methodist. Richard, Lillian Loudonback, at Methodist.

Jack, Martha Loudonback, at Methodist. Byron, Garnet Moss, at Methodist.

George, George Palmer, at Methodist. Paul, Betty Rice, at Methodist.

Donald, Helen Wedding, at Methodist. Malcolm, Fanny Quares, 224 Charles.

Boys: Charles, Lera Davis, at City. Albert, Katherine Dandy, at St. Vincent's.

DEATHS

Nancy Winton, 88, at 923 W. 27th, cerebral apoplexy.

Fred R. Stubbins, 57, at 442 Blue Ridge rd., cerebral hemorrhage.

James F. Darling, 40, at Methodist, myocarditis.

Richard L. Wells, 78, at 106 S. Bradley, chronic myocarditis.

Ruth Ann Smith, 65, at City, intestinal obstruction.

Myrtle Clifton, 65, at St. Vincent's, emphysema.

PENSIONERS TO MEET

Indiana old-age pension group 17 will meet at 7:30 p. m. Monday at McClain hall, State and Hoyt aves.

RATIONING DATES

Canned Goods

Blue stamps R, S and T are good through Sept. 30. Stamps U, V and W become good Sept. 1 and expire Oct. 20.

Meat

Red Stamp T, U, V and W are good through Aug. 31. X becomes valid Sunday, Y, Aug. 29, and Z, Sept. 5. Brown stamps A and B in Book 3 become good Sept. 12.

Shoes

Stamp 18, good for one pair through Oct. 31.

Sugar

Stamp 14 is good for five pounds through Nov. 1. Applications may be made now for canning sugar. Allotments are one pound of sugar for every four

quarts of fruit canned with a maximum allotment of 25 pounds per person which includes five pounds for jellies, jams, preserves, etc. Stamps 13 and 16 are each good for five pounds through Oct. 31. As fruit ripens, application may be made at local boards for additional allotments up to 15 pounds per person if needed.

Gasoline

Stamp 7 in A book good through Sept. 21.

Fuel Oil

Stamp 5 expires Sept. 30. Period 3 coupons are good for 11 gallons in Zone B and 10 gallons in Zone C through Sept. 30. Period 1 coupons for the new season are good now for 10 gallons per unit in all zones through Jan. 1.

Tonight 'Til 9 And All Day TOMORROW

OUR FAMOUS \$85 FUR EVENT

Yes... \$85, that's all. Choice of the newest and smartest in Fur Fashions. Greatcoats... Reefers... Jackets... Scarfs. Newest Tuxedo Fronts and other styles. Take your choice tomorrow at \$85

SUPER VALUES... EVERY ONE

Tomorrow We Demonstrate Our Unusual Value-Giving Ability. Where Else Can You Find Such Fur Bargains as These?

Persian Paw . . . \$119	Silvertone Muskrat . . . \$229
Silver Fox . . . \$195	Summer Ermine . . . \$389
Chinese Kidskin . . . \$249	Dyed Skunk . . . \$179
Leopard Cat . . . \$289	
Squirrel Lock . . . \$129	

3-Year Written GUARANTEE

3 Years' free service on your coat... MONEY REFUNDED within 5 days if you can duplicate value elsewhere.

\$5 DEPOSIT

Holds any coat in our layaway 'til winter, or use our charge or budget plan and take your coat with you.
