At all good drug stores everywhere—in Indianapolis, at Hock's Drug.

CHICKS GO FOR A RIDE

CHICAGO—Recent airplane shipping of 100 day-old chicks from Chicago to California and return, conducted as an experiment, seems not to have affected them and they are reported to be doing as well as the non-flying chicks in the same hatch.

WARTIME LIVING—

Production Deficit Signals Continued Shoe Rationing

By ANN STEVICK
Scripture-Bureau Staff Writer

WASHINGTON, July 20.—New bureau of census figures on this year's shoemaking show that there isn't much to current rumors that shoe rationing will soon end.

Production of women's leather shoes is off nearly a third from last year, for the January-May period covered in the report. Men's leather shoes are off about one-quarter, with work shoes cut down more than dress shoes.

More than three times as many fabric shoes are being turned out, but they barely make up, even in numbers, for the leather shoe deficit. Most of the fabric shoes can't be expected to last as long as leather.

Bright side of the report shows a reduction of nearly two million pairs in "government shoes," largely military, made during the period. A two-billion pair reduction of husky GI shoes should leave a good deal of leather for civilians.

Leather supply experts point out, however, that the leather situation is not a domestic affair. The home leather supply is doing well with large beef slaughtering under way. Leather is allocated by a combined board, which considers needs of other countries.

U. S. homefolds have had 32 pairs of leather shoes per person in 1943 and 1944. That makes them the best-shod people in the world during that period, according to department of commerce figures. Any extra leather is likely to go to countries where there is a severe shortage.

Odds and Ends

War production board is seeing to it that manufacturers of V-boxes get a share of the short paperboard supply. WPB warns, however, that there won't be enough for other uses than sending packages to soldiers. Stores are requested not to use V-boxes for display. Forge and foundry work has been traditionally a "muscle job" for men only. War manpower commission points out that in the present manpower crisis in this critical industry more women must be used. Some

plants have special equipment to help women do the heavy work required. The situation is so serious that war manpower commission authorizes anyone who wants to volunteer for the work to telegraph the foundry and forge division of WMC, Washington, D. C. "I would like a forge or foundry job," Western Union offices are ready to handle the messages speedily.

TOO MANY FREAKS

IDAHO FALLS, Ida. (U. P.)—Frank Keefe, Idaho Falls taxidermist, fears he is becoming a surrealist. This spring he has been called upon to "stuff" a lamb with only one eye, a lamb with no mouth and a lamb with two heads and two tails.

HAVE YOU A TRUE PICTURE OF YOUR ELECTRIC BILL?

MANY folks don't. They're as far from the real facts as this photo in an amusement park mirror!

Proof? In a nation-wide survey, 42% of the people sharply overestimated the amount of their last electric bill. 59% didn't realize that rates had been reduced in the last fifteen years—and 95% didn't realize how much!

Actually, the average American family gets about twice as much electricity today as it did fifteen years ago for the same money.

"For the same money." That's the clue. You don't realize that rates are down, because your bill may be as much as it was fifteen years ago—or perhaps even more.

But you have more electric appliances now. You're using more electricity—and you get about twice as much for what you pay.

Keeping electric production up and electric prices down is not easy in wartime—when other costs and taxes are soaring. But your electric company has done it—by careful planning, hard work and sound business management.
