Rehabilitation Work to Highlight Legion Auxiliary's Program For the Coming Year

By BERNICE WAGNER

Rehabilitation, child welfare, national defense and Americanism are the four points which will be stressed this year in the work of the American Legion auxiliary, Mrs. Charles B. Gilbert, Norwich, Conn., national president, said today.

Mrs. Gilbert arrived this morning at legion headquarters here to take over the job to which she was elected last month at the auxiliary's convention in Chicago.

The auxiliary is particularly stressing rehabilitation work, she said, with the enlargement of services to veterans in hospitals and after their return home, with emphasis on work against tuberculosis.

There is a need for urging the men to remain hospitalized until they are completely well, she continued. The auxiliary is co-operating with the legion and with tuberculosis associations in this work, Mrs. Gilbert stated.

Adequate Navy Asked

Other objectives of the auxiliary are continued interest in national defense with an adequate navy for protection of outlying areas, and a universal military training program which would not be militaristic but a protection, the president said.

Asked what she thought of women working, Mrs. Gilbert said she believed they should and would go back to their homes and children after the war.

Mrs. Gilbert has been active in the legion auxiliary for some time. She was rehabilitation chairman last year and has served as national vice president, poppy, legislative and national defense chairman, and vice chairman of child welfare.

Sons in Service

She served as a member of the Connecticut state board of education and state and local defense councils, as a Girl Scout commissioner and as president of the Norwich Women's council.

Two of the auxiliary president's children are serving in the naval reserve. Charles Gilbert, aviation machinist mate 1-c, has served two years in the South Pacific. Schuyler Gilbert, seaman 2-c, has just finished his boot training in Sampson, N. Y. A daughter, Helen, is a junior at Bryn Mawr college.

Mr. Gilbert, a manufacturer in Norwich, served as an ensign in the submarine service during the last war. A brother of Mrs. Gilbert's is a lieutenant colonel serving in the South Pacific.

Wartime Eating by Meta Given

ANY FOOD THAT CAN BE STUFFED with some other food usually has great appeal. This is certainly true of stuffed peppers and especially if the stuffing is a tasty meat mixture. Much nourishment can be packed into these pepper cases.

Peppers stuffed with liver and rice are rich in iron and also vitamin A. B. C. When using liver in such stuffings, it is important that the liver be diced small and that it be kept below the surface of the stuffing.
