"Radiant" Heater

This heater is economical, both in the quantity and the quality of coal it requires. Its scientific construction makes it the safest heater of its kind we know of—in fact, it is GUARANTEED FOR SAFETY!

Put in 100 pounds of coal at a time and it will burn ever so long, generating generous quantities of heat. Through its automatic draft control and hot-blast tube, it burns the heated coal gases which, in some heaters, go wastefully up the flue. Make a fire in the fall and with little care it will last until spring.

Like an expensive furnace, this heater has a full lining of fire brick to hold the heat . . . long after the fire has burned low. All this, and many other features, are yours in Colonial's splendid "Radiant" heater for only
