Rehabilitation of Both Veterans And Civilians to Highlight Legion Auxiliary Program

By DONNA MIKELS

Rehabilitation, both of veterans and civilians, is the foundation around which the American Legion auxiliary will shape its program for the duration and in the immediate post-war period.

The auxiliary will attempt to solve one of the greatest civilian rehabilitation problems next Wednesday as it participates in a radio broadcast to unify political factions and to clarify election procedure to nations abroad.

Mrs. Charles Gilbert, national president, will act as one of the principal speakers on the program, "Healing the Wounds, a non-partisan program to urge subordination of political beliefs for unification." Americans do not realize that our national election is one of the most misconstrued governmental proceedings in the world today," Mrs. Gilbert said in explaining the purpose of the program.

Traditional Election
What Americans' dish out and take as good old election "mud-slinging" is seriously misconstrued by people abroad, the President explained. Misled by propaganda, many of our allies and people of occupied countries read seething rebellion into the political "rape," "lashings" "flayings" traditional in the election scheme.

The broadcast is one of the major rehabilitation plans being formulated by the auxiliary in its 17th annual convention here which ends today. Shaping its program primarily on the work of remoulding of war-shocked veterans into normal citizens, the auxiliary has included in its far-reaching program the education of civilians to cope with rehabilitation problems.

A major rehabilitation committee will carry the load of the work, but a cross-section of committee reports of yesterday and today's sessions shows that almost every committee touches on some phase of veteran and civilian reconstruction work.

Was at Dumbarton Oaks
Leader of the auxiliary's expanded veteran program is Mrs. Gilbert, who holds the post which has been recommended for a place at the peace conference. The national president was one of a selected group of national leaders who attended the state department's Dumbarton Oaks meeting Oct. 18, in which the findings of the conference were discussed.

The auxiliary is stressing the role which women will play in establishing not only the immediate peace, but a standing world peace organization. "The rehabilitation program is an agent to re-establish an orderly country which may better cope with making a lasting peace," Mrs. Gilbert said.

how much WHITE LIGHT

in a pound of BLACK COAL?

The lamp has a 100-watt bulb in it and the lump of coal weighs one pound.

Pulverized and blown into the big boiler of a modern power plant, a pound of coal provides enough steam to generate one kilowatt-hour of electricity.

That much electricity, in turn, will light the lamp for ten hours—long enough to read this magazine and a couple of novels. Or it will run a small radio for 25 hours, a food mixer for 13 hours, a washer for almost 7.

"So what?" you say. The point is this: 25 years ago, it took about three times as much coal to produce a kilowatt-hour of electricity as it does today!

The all-around efficiency which gets several times as much white light from black coal has benefited you in many ways.

It has made your electric service better and cheaper year by year. It has met tremendous wartime demands for electric power, without delay, shortages or rationing. It has held the price of electricity at an all-time low, while other costs went up.

These results come from the sound business management of the nation's light and power companies—and from the hard work of men and women who know their business. The same companies are preparing for even greater accomplishments tomorrow.

Fire Hazard
More than moths accumulate in overcrowded attics. Fire lurks in airless, dusty places where waste paper and rags are piled.
