CONCERNING
KNEES

more specifically Masculine knees—(our feminine readers—if any—won't like this).

Some things we know from observation—some from reading—and we read in the May issue of "TRUE" (a fine magazine for men)—that men's knees are tops—and that Gals Gorgeous Knees are a hoax and a myth—that 90 per cent of the ladies suffer from KK—Knock Knees—

That's why, says he, the Curvaceous Movie Dolls usually pose with one knee over the other—to cover the knocks! On the other hand (leg) says he, the average man's knees come in matched pairs—and aside from a small percentage of

knock knees and trick knees and bow knees—and floating knee caps—they are in the main, attractive. All this is a prelude to his plea—that men get out in Shorts—and enjoy freedom of the knees—physically and optically—without fear of comparison with "sheesecake." "Cheesecake" is a newspaper term for "Legart"

NOTE, PLEASE: The knee data herewith is from a source deemed reliable—but candor (and caution) prompts us to state that we don't guarantee it!
