Dates Back to 1940

The house is of late Georgian design, in the best Hudson valley estate tradition. The central portion of the house, originally a frame structure built before 1840, is now stucco. At either end is a wing built of field stone, and added in 1915.

You enter through a semi-circular portico of Roman pillars. The house has about 20 rooms, and is two stories high. There is a built-in elevator in one corner. Where the floor level changes at several

## If Hyde Park Becomes Capital of UNO, Roosevelt Home to Be Peace Shrine

By EDWIN A. LAHEY  
Times Special Writer

HYDE PARK, N. Y., Jan. 7.—If the United Nations Organization chooses Hyde Park, N. Y., as its permanent home, as now appears probable, the choice will be a tribute to the memory of the late President Roosevelt.

And whatever arrangements for housing the organization are finally made (as small city would have to be built), the heart of the UNO site would be the home where Roosevelt was born and the rose garden where he is buried.

It would be a heart legally separated from the body since the patch of Roosevelt land embracing the grave and the home was left to the people of the United States, and could not, without some complications, be thrown in with the property intended as a site for the UNO.

The UNO site will have extraterritorial rights, which will make it actually not a part of the United States.

Park Service in Charge

The Roosevelt home and garden are not yet open to the public, but the writer had the opportunity to spend most of a morning there, thanks to the courtesy of George Palmer, a national parks service official, who is preparing the place as a national museum site, to be opened some time this spring.

The real property containing the house and the garden, and totaling 33 acres, has already been conveyed to the federal government according to the terms of the late President's will.

The personal property in the big Roosevelt house becomes government property after Jan. 13, the deadline for the removal of whatever articles are desired by the Roosevelt family. (On the morning I was in the house, servants were removing Mrs. Roosevelt's washing machine.)

Visitors at the Roosevelt home, when it is opened as a national shrine, will find the interior of the big old house almost intact. There are some vacant spots on the walls, where members of the family have removed a picture or a print for which there was a personal attachment, but these spots are few.
