HIGHER DAIRY, EGG PRICES EXPECTED

OPA Economist Tells Housewives Clothing Cost Also Will Climb; Meat Control Due Monday.

WASHINGTON, Sept. 6 (U.P.)—An OPA economist told housewives today to expect further increases in the prices of dairy products, eggs and clothing in the months ahead.

He said dairy products and eggs—now free of price controls—would be the main “trouble spots” in the food picture because of the seasonal decline in supplies.

Meat also is due for a seasonal lull but will be back under retail price control Monday.

On clothing, the OPA expert said, the most “striking” increases will be in cotton apparel because of price adjustment provisions in the new OPA act. But he also expected rises in the cost of wool and rayon clothing as result of abolition of OPA’s maximum average price program.

Anticipated Meat Prices

On most other cost-of-living items, the OPA official expected prices to go up a “little but not enough to put in your eye.”

Meanwhile, the agriculture department was winding up the job of reviewing the new retail meat ceilings, scheduled to be made public tomorrow by OPA.

The new ceilings will push prices below present levels—but not all the way back to June 30 levels.

On the average, the increases over June 30 are expected to be 6 cents a pound higher on beef, 3 cents higher on pork, and 8 to 10 cents higher on lamb.

Dairy Prices Steadied

The three-man price decontrol board is now studying reports from major marketing areas to check price trends since it decided to keep milk and butter free of control.

The reports indicate, according to a spokesman for the board, that prices of butter have “gone up and down” but that the cost of milk has remained steady. The board has threatened to restore ceilings on these items if prices rise unreasonably.
