Why A SOAP SHORTAGE?

You've Heard Rumors. Here Are the Facts!

1. There is a world-wide shortage of animal fats and of vegetable oils. This shortage affects all of us. For instance, this year soapmakers have been able to obtain only one fifth of the imported oils they used in 1941—far less domestic fats, too.

2. Because of the world-wide shortage, manufacturers are unable to get the amount of fats and oils they need to make not only soaps, but also paints, textiles, tires, leather goods, floor coverings, electrical appliances, etc.

3. In the face of these conditions, American soap manufacturers have done their utmost. They have turned all the fats and oils they have been able to obtain into soap just as quickly as possible.

4. But for the help of American housewives, the shortage of soap would have been far more serious. Last year, more than one out of every nine packages of soap sold was made from used fats saved in America's kitchens.

5. Don't blame your grocer. He is doing his best, like the soapmakers, to get more soap for you. Won't you do your best by saving and turning in every drop of used fats.
