Report Progress In Ballot Probe

KANSAS CITY, Mo., July 10 (U. P.)—Things are beginning to clear up for a federal grand jury investigating alleged Democratic primary vote frauds in two Missouri congressional districts last August. Special U. S. Prosecutor Richard K. Phelps reported today.

Mr. Phelps declined to elaborate, but appeared highly pleased with proceedings in the jury room, where 26 witnesses were questioned yesterday.

"We are making progress," he said, "and several interesting facts are coming to light."

Study 8th District

It was indicated that the jury was expected to return several indictments by tomorrow, and that the jury then would recess for several weeks.

The jury's investigation included the 4th and 8th districts, but the jury was instructed to pay particular attention to alleged irregularities in the 8th congressional race in which Rep. Roger Slaughter was "purged" by President Truman's choice, Enos Axtell. Mr. Axtell was defeated in the November elections.

A county grand jury reported previously that the evidence indicated Mr. Slaughter was deprived of the nomination by fraud.

BOLD-FACED FAKE—After being fined \$30 for shaving off his beard during the Lake City, Wash., Pioneer Days celebration, Justice of the Peace Dell Lampman thought he could beat the rap by becoming two-faced. Mrs. Lampman painted a second face on his bald spot, but the court ruled him in error, and the fine stuck.

If Better Erasers Are Made, Jap Birds Will Hatch 'Em

By KEYS BEECH, Times Foreign Correspondent
TOKYO, July 10.—Do you know where erasers come from? There is an island off northern Honshu, so the story goes, where the mother birds live. Their maternal instinct is so strong they will sit on anything resembling an egg.

Old Japan hands recall that a 1927 golf tournament at a resort on this island had to be called off.

Unfortunately it was the mating season and every time a golf ball came to rest, a mother bird swooped down and sat on it. Several months later, two golfers returned. While walking over the course they found two mother birds sitting on nests hollowed out of the snow.

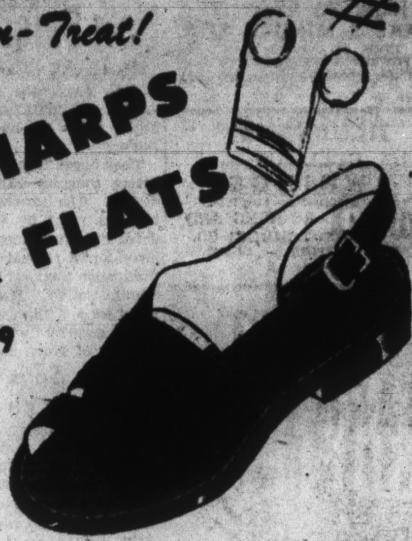

Lifting the birds, they made an amazing discovery. The nest was full of little erasers running around on rubber legs.

That, say the old Japan hands,
