## Why Not Try This?

### THE FAMILY SCRAPBOOK By DR. ERNEST G. OSBORNE

#### What About Nail-biting

Nail-biting, the habit that gives many parents the jitters, is usually a sign of tension in the child. Instead of rushing to the drug store for bitter medicine to apply to the fingers, nagging and thereby increasing the tension, or using other repressive methods, one ought to stop and take stock.

Is there too much pressure at school? Is Phil the kind of child who is easily excited by radio programs or movie horrors? Some children are more easily affected than others. Are there too-high standards of behavior expected?

Sometimes well-meaning parents expect perfect courtesy from a very young child when it's just too hard to give. These are some of the questions that should be asked.

Then one tries to let up on the pressure. Usually that will get results if there is enough patience shown.
