**Now, that's what I call good coffee!**

A cup of good coffee, savory and mellow, is one of the world's most delightful experiences. And anyone can make it! It takes some care, of course, but it's easy, if you follow these simple rules:

- It begins with a fine blend of coffee, Hills Bros. Coffee, that's rich in flavor and really fresh.
- It requires a coffee-maker that's sparkling clean. A quick rinse with hot water is not enough. A good rule is to wash your coffee-maker with soap and water every time you use it. When it gets battered and brown beyond cleaning, you'll be doing your coffee a favor if you replace the old coffee-maker with a new one.
- It depends on accurate measuring of water and coffee and careful timing of the brew. For coffee rich in flavor as well as strength, 2 level tablespoons of coffee are recommended for each 6 oz. cup of water.

What kind of coffee-maker do you use... coffee-pot... percolator... vacuum-type maker... drip pot? Hills Bros. tell you how to get the best results with any type of coffee-maker in the 28-page booklet—"The Art of Coffee-Making." Send the coupon below for your free copy.
