## Anglo-U. S. Accord On Palestine in UN Appears at an End

Britain Backs Bernadotte's Plan  
But American Delegates Turn Backs

From the Wire Services  
Britain's Palestine policy teamwork with the United States seems about ready to fall apart.

After what Minister of State Hector McNeil told a United Nations committee at Paris today, it appears that the Anglo-American honeymoon is almost over.

Mr. McNeil announced Britain's sponsorship of the plan for Jewish withdrawal from the arid Negev area of southern Palestine in exchange for western Galilee in the north.

Britain wanted the United States to go along with her in sponsoring the proposal, originally drafted by Count Folke Bernadotte, United Nations mediator assassinated in Palestine.

But it was learned the Americans refused. That probably means that the proposal will be rejected because approval would require a two-thirds majority.

The U. S. delegation to the United Nations, meantime, summoned to Paris from Washington and Germany American experts on the Berlin currency problem to participate in another attempt to end the Berlin crisis.

The experts will prepare answers to a questionnaire submitted the Big Four by Juan A. Bramuglia of Argentina, leader of a new coalition move.

Mr. Bramuglia asked primarily for technical information in his effort to prepare a new resolution for the Security Council satisfactory to both East and West.

NEW YORK, Nov. 18 (UPI)—The maritime strike on the East and West coasts has idled 143,000 workers and 647 ships and is costing the nation's economy some \$50 million a day, a United Press survey disclosed today.

While negotiators and federal mediators worked to settle the West coast strike of 12,000 CIO longshoremen and the East coast strike of 65,000 AFL dockworkers, some 34,000 seamen and 32,000 workers in allied industries were thrown out of jobs.

**Defense Program Hit**

And the national defense program is being curtailed as the flow of imported strategic materials is cut off, according to a report by the Commerce and Industrial Association of New York.

Total exports for September were \$926 million and imports \$884 million, according to a report of the Commerce figures.

Nearly all these now have been cut off, except for a trickle entering Gulf ports, meaning a loss to the nation's commerce of slightly under \$50 million a day.
