

Battles Change In Control of Mediation Board

**Labor Department Too Pro-Labor
To Direct Service, Ching Says**

WASHINGTON, Feb. 1 (UPI)—Federal Mediation Director Cyrus S. Ching said today that the Labor Department is too pro-labor to direct the Mediation Service impartially, as recommended by President Truman.

The lanky, 73-year-old mediation boss, who is reported ready to quit if his service loses its present independent status, laid down that flat challenge to the President at a Senate Labor Committee hearing.

Mr. Truman's recommendations for a new labor law to replace the Taft-Hartley Act included a provision to bring the Mediation Service under Labor Department control.

Mr. Ching said he opposed that section because he believed business and industry could not trust the department to be impartial in mediating labor-management disputes.

But he begged off discussion of other provisions of the administration bill, despite repeated attempts by Sen. Robert A. Taft (R. O.) to draw him out.

Gop Campaign

House Republicans are planning their own "give 'em hell" campaign aimed at selling the GOP record in Congress to the voters, it was learned today.

They said it will be the biggest public relations and vote-inviting drive in the history of Congress.

House GOP Leader Joseph W. Martin Jr. denied that the ideas stems directly from President Truman's "give 'em hell" election campaign in which he ripped into the record of the Republican 80th

Gil Carter's Father Dies

William C. Carter, father of Gil Carter, Broad Ripple resistor, died today in his Castleton home. He was 67.

Born near Lebanon, Mr. Carter lived all his life in Indianapolis and vicinity. He was a retired farmer. Active in church work, he was a deacon and a member of Broad Ripple Christian Church.

Besides his wife, Veda, Mr. Carter is survived by another son, W. Corwin Carter Jr., Indianapolis; two brothers, Roy and Warren Carter, Indianapolis; four sisters, Mrs. L. Dillon, Pittsboro; Mrs. William Dawsell, Frankfort; and Mrs. Myrtle Dickerson and Mrs. Amanda Acton, Indianapolis, and a grandson.

Funeral arrangements in Flanner & Buchan Mortuary were completed well.

Editor Sees Strong Chance Of Fumble by Congress

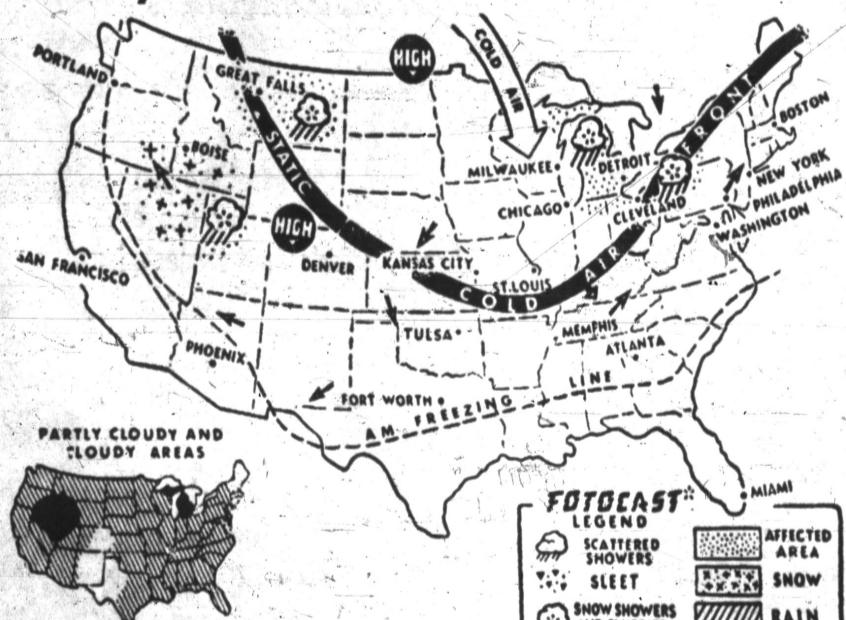

By HAROLD K. HARTLEY, Times Business Editor
There is a strong chance that Congress may fumble liberal legislation and that campaign promises of President Truman may go unfulfilled, Michael Straight, editor of the New Republic, told members of the American Veterans Committee this noon.

The clear-spoken editor said the Democratic Party is divided within itself and that Congress administration to handle.

Mr. Straight said the President is surrounded by, and at the moment is listening to, the liberals on his White House staff. But he does have many staunch conservatives such as John Snyder in posts of high decision. This, Mr. Straight said, makes for lengthy indecision in the administration.

Another thorn in the side of the new Congress, he said, is the failure of the liberal coalition

Today's Weather Fotocast

America's \$50 Million Quiz Program... No. 2 Cut a Slice of 'Meat of Tomorrow'; U. S. Makes It Tenderer, Cheaper

By DOUGLAS LARSEN
NEA Staff Correspondent
WASHINGTON, Feb. 1
Scrap your carving knife and let's cut a slice of the "meat-of-tomorrow."

It'll be tender, tasty, juicy and cheap.

Experimenting with pigs, chickens, cattle, turkeys and sheep, Department of Agriculture scientists have improved old breeds, and developed new ones that promise to give the whole meat industry a tremendous boost during the next couple of years.

Most sensational results have come from research on hogs. They've literally stretched the pig, giving it more pork chops, bigger, leaner hams—more bacon—juicier ham—less fat.

Imported Danish Hogs

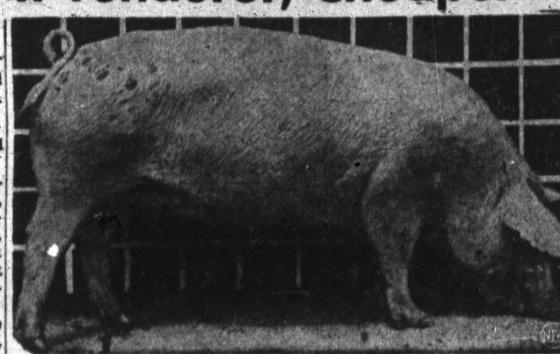

The story behind this development goes back to the days when Americans started to use vegetable oils for cooking.

Until then, hogs had been the only source of shortenings and frying fats. When the demand for hog fat began to ease up, farmers realized that they needed more meat and less fat on their pigs if they were going to continue making a profit on hog raising.

The U. S. Department of Agriculture came to their aid. Danish pigs which had most of the meat characteristics which the farmers wanted were imported. The problem was to strengthen the Danish breeds so that they could survive in the U. S. climate.

That was in 1935. After three years, two "perfect pigs" now are ready for American farmers. Much of the work was done in co-operation with the state of Minnesota and one of the new breeds is called the Minnesota Number One. It is already being raised by the farmers in that state.

The other new breed which resulted from crossings with the original Danish hogs is called the Hampshire. It is just beginning to be supplied to the farmers. Both breeds are long, have very little fat and produce a much higher percentage of choice

Produced by cross-breeding American pigs with porkers from Holland, this one is longer than the Poland China, has more pork chops, better hams, more bacon, juicier pork roasts.

cuts of meat than any other American breed.

Millions of Americans have already tasted what has been done to the turkey during the past couple of years. Breeding and improved methods of feeding have put several pounds more meat on the average holiday bird. It makes turkey raising more profitable for the farmer and gives the consumer more meat and less bone for his money. The modern turkey also tastes much better and is less dry after being cooked.

The same work is now being done on the chicken. A & P Food Stores in co-operation with the U. S. Department of Agriculture are working on a program in an attempt to find the "Chicken-of-Tomorrow."

A & P sponsored a contest designed to encourage chicken breeders to try to develop a better broiler. It produced a cross-breed which has one-third more meat than any previously known American breed.

A second contest, which will last three years, to try to get an even better broiler, now is under way. Some breeders predict that the chicken of the day after tomorrow will have twice as much meat as the chicken of tomorrow.

Experimental breeding to improve lamb has had to solve a very unusual problem. Researchers discovered that some of the theoretically best meat producing

Butler to Register Freshmen Friday

Orientation Course Runs Through Week

The week-long orientation course for approximately 100 Butler University freshmen, which began yesterday, will terminate Friday with registration in the Butler Fieldhouse, Dr. Harry E. Crull, University College director, said today.

Registration for returning Butler students will also take place during the week, he said, between the hours of 8 a. m. and 12 noon, and 1 p. m. and 4 p. m., in the fieldhouse. Juniors and seniors will register tomorrow and sophomore and second semester freshmen on Thursday.

Good and choice grades from \$160 to 225 pounds opened at \$21 to \$21.50, the top price, then dropped to sales from \$20.50 to \$16 in later trade.

Weights from 225 to 250 pounds brought \$19.50 to \$20.50, as a few sales registered \$21. Prices from \$18.50 to \$19.50 were paid for 250 to 290 pounds. Weights from \$18.50 to 360 pounds moved at \$17 to \$18.50 as 100 to 160-pound lightweight brought prices from \$20 down.

Sows Open Steady

Sow prices, opening steady at \$15 to \$16.50, dropped to \$14.50 and \$14.75 in later trade. Stags sold at \$13.50 and less.

In cattle trade, steers and heifers showed mostly steady prices, although scattered sales were 25 and 50 cents off.

A load of choice near 1160-pound steers rose to \$26.50. Bulk of good 900-1100 pounds brought \$23 to \$24.50. Several sales of lightweight of high good to choice grades were \$25 to \$25.50.

Western Go at \$25

A load of good and choice 90-99 pound fed westerns and a short load of 92-pound weights sold at \$25, as a load of medium to mostly good 94-pound westerns dropped to \$24.
