MORNING COUGHS

Do you cough and cough, especially mornings and at night? At times do you feel like you were tearing yourself to pieces trying to get rid of strangling mucus and still you cough, gasp for breath, wheeze and often can't sleep? The cause of these distressing symptoms may be recurring attacks of bronchial asthma. In such cases, the very first dose of MENDACO, a physician's prescription, usually stops almost instantly to help relax that clogged up, stuffy feeling in the bronchial tubes, then helps Nature loosen and remove tickling, choking phlegm. This helps you get good fresh air into your lungs and promotes restful sleep. MENDACO is not a smoke, injection or spray, but a safe, harmless internal medicine which works through the blood, thus reaching the bronchial tubes and lungs. Ask your druggist for MENDACO now. Satisfaction or money back guaranteed.
