

MAKE A COLLECTION OF LITTLE BOTTLES—Glass bottles come in all patterns. Some of the tiniest are so unusual and many sided, that they are like little jewels. The perfume manufacturers trying to capture the whims of the feminine heart, seem to try to outdo one another in bottle design. This very fact is what makes the collecting of tiny bottles such an interesting hobby. All that is necessary to start such a collection is a small shelf or some spot where they can be gathered. After you find a corner for your hobby be on the lookout for additional apes, pill, candy and antique bottles. What do you collect? This is the second of a series on collecting that will run in Try It throughout the year. Last month we illustrated the collecting of milk bottle caps. I would like to hear about your collection.
