

Jacobs Ready To Vote for T-H Repealer

Congressman Addresses Reserve Officers' Meeting

By HAROLD HARTLEY

Congressman Andrew Jacobs is ready to cast his vote for the administration labor bill, he said here last night.

He said the bill, commonly called the Taft-Hartley repealer, deals with the three principal labor issues, the secondary boycott, the jurisdictional strike and the emergency strike.

There will probably be a demand for the inclusion of the anti-communist affidavit and the injunction feature of the Taft-Hartley bill, but Mr. Jacobs was not too worried about either of them.

"Just before I left Washington I heard from one of the committee members that the vote on the labor bill would probably come up Apr. 26. But who knows?" he said.

Meeting Set Apr. 20

Mr. Jacobs is organizing a labor-management meeting in the World War Memorial Apr. 20 at which he will hear questions on legislation affecting both. He has asked the Chamber of Commerce to supply a representative of management and the railway brotherhoods, the AFL and CIO to supply a labor representative.

While here to address the Reserve Officers Association in the Seventh Hotel, Mr. Jacobs visited the Veterans, Hospital, and talked with the staff.

"I believe there now is enough money to employ necessary doctors and nurses for certain types of patients who are receiving sub-standard medical service," he said.

30 Per Cent Higher
The staff of employees is approximately 20 per cent higher than permanent hospitals of comparable bed capacity but the spread of the institution fully justifies the greater number.

"I believe the opening of the balance of the hospital may be warranted but it is not possible until the necessary doctors and nurses can be obtained.

"It would require approximately \$75,000 to open the 200 additional beds. And this would add some 300 to the staff including nine doctors and 40 nurses," he reported.

Youth in Poison Case Adjudged Insane

VINCENNES, Apr. 9 (UP)—Criminal prosecution of Kenneth Pace, 18, Busserson Township youth charged with putting poison in coffee that four members of his family drank, was dropped today when two court-appointed doctors reported Pace has insufficient mentality to understand the charge against him.

Dr. M. M. McDowell and James F. Reilly told Knox County Judge Ralph A. Seal that Pace not only is of low mentality, but that he was insane when he put the poison in the coffee because his father would not let him drive the family car. Efforts were begun to have Pace committed to a mental institution.

State WCTU Donates Hospital Equipment

Members of the Indiana Woman's Christian Temperance Union have adopted plans to donate an air conditioner and medical equipment to Cold Spring Road Veterans Hospital.

During the recent mid-year executive session held by the organization, committee members reported that \$741.54 had already been given to the Greek Relief Fund, and six motor-powered wheel chairs had been given Billings Hospital.

CLIMBS 530-FOOT TOWER

SAN FRANCISCO, Apr. 9 (UP)—An unidentified man dressed only in shorts clambered to the top of KGO's 530-foot television tower on Mt. Sutro today and threatened to jump. Police and firemen, called to rescue him, reported they could hear him praying.

'Father, Please Save Her'

Prayers for the rescue of Kathy Fiscus are offered by Mr. and Mrs. E. R. Kincaid and Sheryl, 2½ years old, one of their three daughters. The Kincaids are neighbors of Kathy's parents at San Marino, Cal.

Lack of Curb May Cost Child

Motorists Can't Tell Road From Property Line, Consequently Drive Almost Onto Sidewalk

Lives of children playing in the 1300 block of S. Senate Ave. are being endangered because motorists can't tell the roadway from the property line and consequently drive almost onto the sidewalk.

Several years ago, residents along the street set cement blocks along the edge of the thoroughfare to form a temporary curb. Beside that there was a space of several feet and then the sidewalk.

Children like Donald, Ronald and Geraldine Dietrich of 1210 S. Senate played between the cement blocks and the houses in comparative safety.

Utilities Dug Ditch
Then last week one of the utilities dug a ditch down the side of S. Senate. The ditch went right under the cement blocks and workmen piled them beside the sidewalk out of the way.

With the blocks moved the street appears to run up to the sidewalk. Motorists following what appears to be the street drive right up to the children on the walk.

One resident asked the utility workmen if they intended to replace the blocks. The workmen said no.

Until they are replaced motorists will continue to drive dangerously near the sidewalk. And one day, it's possible, a big red ambulance may have to make a call to the block.

Services to Recall Words From Cross

Hospital to Hold Good Friday Rites

Speakers will commemorate the Seven Last Words of Christ from the Cross in seven services between noon and 3 p. m. Good Friday in the Mary Hanson Chapel of the Methodist Hospital.

Each service will last 22 minutes. The speakers in order include the Rev. Roy E. Mueller, pastor of the Wallace Street Presbyterian Church and executive secretary-elect of the Presbyterian Synod; Dr. Richard Rettig, pastor of the Carrollton Avenue Evangelical and Reformed Church; the Rev. L. A. Huddleston, Calvary Evangelical United Brethren Church.

Also, the Rev. Henry G. White, Woodside Methodist Church; the Rev. Louis H. Meadow, University Park Christian Church; the Rev. Robert D. McCarthy, Thirty-first Street Baptist Church, and the Rev. Charles T. Alexander, Capitol Avenue Methodist Church.

Dr. Claude M. McClure, hospital chaplain, will be in charge of the program. Dr. James S. Warriner, Dr. Quentin E. Kenoyer, Eugene Sullivan and Miss Imogene Capp will give the special music.

Kirshbaum Center Shows Mexican Film

Kirshbaum Community Center will conclude its foreign film series at 8:15 p. m. today with the showing of "The Wave," a Mexican release.

The picture tells the story of life among fishermen in Alvarado, Vera Cruz. It was produced by Paul Strand, American documentary film maker.

Pushes Obscure Music Instrument

Movie Composer Uses Theremin

HOLLYWOOD, Apr. 9 (UP)—A movie composer is launching a movement which he says may create a big demand for an obscure instrument and have would-be performers practicing just by waving their hands.

The instrument is the theremin and the composer is Al Glasser, who uses the theremin to background a fight between an octopus and an eel in the movie "Domo." He plans to use it in all his movie scores hereafter.

The principal part of a theremin is two poles which send electric signals. The player stands and waves his hands in front of the poles. When he puts his right hand close he gets a high note and as he pulls it back he gets lower and lower ones. His left hand, in front of the other pole, controls the volume.

Imitates Water
"It has a weird human sound, sort of like a chorus of women's voices, or maybe like the howl of a coyote," Glasser said. "It's perfect for the scene in the picture where the eel slithers through the water to meet the octopus."

The theremin perfectly imitates the sound of water rushing over rocks, too, he said, and is excellent for night noises in westerns when the Indians are creeping up.

Glasser is a determined local boy who got his start in movies by watching studio music heads climb into their Cadillacs, checking their auto license numbers to get their addresses and importuning them at their homes. Eventually somebody gave him a job to get rid of him.

Berates Teacher
He got his musical start somewhat the same way. Because his east side high school couldn't afford an orchestra of a friend's piano solo, Glasser composed one himself. When the school refused to let him conduct it at a graduation services, Glasser marched downtown to see the superintendent of schools, the late Miss Susan Dorsey.

When the little old lady heard how Glasser, his family and neighbors had worked for weeks copying the orchestration, she called the school and ordered that Glasser conduct it. And she added she'd be there on graduation night to see that he did.

Van Zant Locked Up As Soybean Embezzler

NEWPORT, Apr. 9 (UP)—Edgar Van Zant, of Paris, Ill., and Terre Haute, was freed today on \$2500 bond on the second charge filed in Indiana that he embezzled soy beans entrusted to his grain elevators in western Indiana and eastern Illinois.

Van Zant, who faces prosecution on charges that he embezzled some \$200,000 worth of grain, spent last night in jail here because he could not make bond when he was arrested for embezzling 542 bushels of soybeans belonging to Ernest Kaiser, of Bensen.

He was arrested when he came to court to change bondmen on an earlier bail bond.

Pooling Resources

PORTLAND, Me., Apr. 9 (UP)—Successfully operating a watch repairing business here are: Robert Venner, who has only one good hand; his brother Harry, who has only one good eye; Gerard Breault, who has only one leg.

Faint Hope Spurs Race With Death to Save Girl

(Continued From Page One)

ting the girl's dress, said he also thought he had seen her arm but couldn't be sure. He could not even be positive it was her dress he saw.

Gets Only Silence

"God himself couldn't say when we will reach her," he said. Another rescuer tried to find out if Kathy was alive by shouting her name into the hole cut in the casing.

He was Vido Kovacovich, who said he got only silence and the rushing sound of air being pumped from above as his answer.

The pink dress was Kathy's best, embroidered in white across the front. She wore it when she went with her mother yesterday to meet her aunt, Mrs. Hamilton Lyon, of Chula Vista, Cal., and her cousins, Stanley, 10, and Gus, 5, when they arrived by train for a visit.

A few hours later she fell into the well. Mr. Kelly and his assistant, 43-year-old hard rock miner Homer E. Bickenseder, had burrowed 12 feet through hazardous loose sand, shoring up their tunnel as they dug along with a steel culvert pipe, in order to reach the 85-foot point where a measuring tape had reported an obstruction.

They chiseled into the casing only to discover Kathy was not there. Mr. Kelly reported being able to see a searchlight flashed from the surface, indicating Kathy was not between the surface and the hole in the pipe.

Mr. Kelly and Mr. Bickenseder said they could hear no sound in the casing, supporting a doctor's theory that the child may be either dead or asleep.

No Trace of Water

No trace of water had been found in the well, but the shaft, according to Mr. Hill, was curved.

Mr. and Mrs. Fiscus, the child's parents, who maintained an all-night vigil, stood by the mouth of the hole anxiously awaiting news when Mr. Kelly and Mr. Bickenseder were ordered back to the surface after more than an hour in a tunnel they dug through 12 feet of sand from the bottom of the pit.

After making their verbal report at the surface, Mr. Kelly and Mr. Bickenseder descended again. The little tunnel they had dug was steaming hot.

A physician and an ambulance were standing by, but the physician held little hope that Kathy had survived in the rusty old pipe, although air was being pumped into it.

The temperature in the pipe was approximately 90 degrees and the inside was jagged and rusty. Kathy's cries had long since stopped and the doctor said she must either be dead or asleep.

Mr. Fiscus had attempted to talk to the little girl, but her comments were not very helpful. "Are you standing up," he called into the hole soon after she had tumbled in.

"Yes, I am," she replied.

"Are you lying down?"

"Yes, I am," said the tiny voice.

Mostly the child just cried during the two hours the parents tried to reassure her that help was coming. Later, her voice was still.

Five-year-old Gus Lyon, Kathy's cousin, had found the hole into which she fell.

"All I did was call 'Kathy, Kathy,' but all she did was cry," Gus said.

"I could hear Kathy crying. But golly it was dark down that hole and I couldn't see anything. All I could hear was her crying."

Mrs. Hamilton Lyon, Gus' mother, said she ran to the hole and called down to Kathy.

"I asked if she could hear me,"

she said. "First she said,

'yes,' then she just cried."

Policemen and firemen lowered

down a rope, hoping the child would grab hold of it. One policeman dropped his handcuffs on the end of a rope, but they fell off.

"We called down, 'do you have

the rope?'" Mrs. Lyon said. "Some

times she would say, 'yes,' but all

the time, she was crying. When

we tried to pull it up, she either

couldn't hang on or didn't have

it. We tried for nearly two hours.

All the time Kathy's voice was

growing weaker and weaker until

it finally stopped."

Mr. Kelly started cutting the

casing of the well, which is 14

inches in diameter, at 75 or 80

feet below the surface, but it was

feared the child had dropped all the way to the bottom of the 120-foot-deep hole.

"This is pretty tough stuff," Mr. Kelly shouted into the phone.

Breaks His Saw

A few minutes later he reported he had broken his hydraulic saw.

An electric saw was sent down

to him. Thirty minutes after he

went down, Kelly said he had

completed opening two sides of

the pipe.

The loud-speaker system con-

necting with the telephone circuit

clearly recorded the banging of

Mr. Kelly's hammer and chisel

and the buzz of his saw.

"Under such circumstances I

don't see how she could live more

than four hours," the doctor said.

but the balloon burst when it

reached 90,000 feet, 50,000 short

of the record set last September.

Frantic rescue efforts were made throughout the night. Giant excavating machines were rushed to the scene, and about 60 volunteers labored to reach the child.

Firemen pumped air into the tube to provide her with oxygen, and police kept the big crowds away from the hole. Floodlights kept the scene clearly illuminated.

The rescue shaft finally was completed with the aid of a 30-inch rotary well driller and volunteers Albert Linnet, 29, a former diver, and John Inghat, a former miner. They dug a lateral shaft through the earth from the shaft to the well pipe.

Among those at the scene were Kathy's grandparents, Mr. and Mrs. E. W. Kenmore, Chula Vista, Cal., and Mr. and Mrs. Hamilton Lyon, the child's aunt and uncle. Numerous offers of assistance had been made by circus thinmen, midgits and young boys to help in the search for Kathy, but her father declined the offers, saying he did not want to risk any lives unnecessarily in rescuing his child.

Police broadcast an urgent appeal to curiosity seekers to stay away from the area. They said milling throngs were choking highways near the scene and impeding rescue efforts.

Crash Near Logansport Kills Expectant Mother

LOGANSPORT, Ind., Apr. 9 (UP)—Mrs. Dorothy Luck, a 20-year-old expectant mother from Galveston, Ind., was killed tonight when a car driven by her husband, Kenneth, 23, was struck at a country road intersection one mile west of Onward, Ind.

The husband, his brother, Basil, and father, Joseph, 50, all received serious injuries and were taken to the Memorial hospital here. Bill Sailors, 18, also of Galveston, driver of the truck, received minor injuries but was not hospitalized.
