

AFL, CIO Leaders Call on U.S. to Meet Communist Challenge

WASHINGTON Sept. 5 (UP)—The following Labor Day statements were issued by the heads of the two leading labor organizations:

Green Cites 'Two Cold Wars'

By WILLIAM GREEN, AFL.
The keynote of all our Labor Day celebrations this year must be a call to action—action to preserve the free American way of life from the threat of domestic fascism and world communism. Both on the national and international fronts, America is involved in a cold war. In our own country, reactionary forces are attempting to turn the clock backward and are gambling upon a return to the power of the economic and political life. On the world front, the leaders of the Kremlin also are gambling upon a depression to weaken American resistance and to enable them to gain dominion over all of Europe and Asia.

We must not allow that depression to take place. Our government must make every effort to prevent it. And the trade union movement must militantly maintain and defend its standards so that mass purchasing power, the nourishing force of our economic life, can keep the wheels of industry rolling.

Stubborn Resistance
The trend toward high wage rates has suffered its most stubborn resistance in many years. While business continues to derive huge profits, employers throughout the country, as though by a given signal, have tightened up their wage policy, using the pretext of declining prices and fears of future production cutbacks as justification.

All this time, in the midst of distressing and threatening developments, the trade union movement has been handicapped and repressed by the grim impediments of the Taft-Hartley Act. No other single factor during the year has hurt labor more.

Tragically, the drive to repeal the Taft-Hartley Act during the first session of the 81st Congress fell short of success by a small margin.

Severe Setback
This was a severe setback for labor, but not a permanent defeat. The reactionaries will find that out in 1950. On the world front, communism suffered a crucial blow by the disintegration of the so-called World Federation of Trade Unions by the decision of the free, democratic trade union organizations in more than 50 nations to establish a new world labor body free of any Communist taint. To my mind, this action will go a long way toward preventing any further spread of Soviet territorial aggrandizement through internal revolutions in Europe. Thus the leadership of free labor is helping actively and materially to keep the world free.

Charles T. Kaelin Rites Wednesday

Lawyer Here 40 Years Dies at Hospital

Services for Charles T. Kaelin, Indianapolis lawyer for 40 years and former Marion County pauper attorney, will be held at 10 a. m. Wednesday in Flanner & Buchanan mortuary. Burial will be in Crown Hill.

Murray Sees Nation At Crossroads

By PHILIP MURRAY, CIO

Continued recession—or economic progress? Unemployment, with its attendant suffering and distress—or jobs for all Americans?

A weakening of our moral prestige among the democratic nations—or strengthening of our leadership among the free peoples, and the people who long for freedom throughout the world?

These questions, of staggering importance to every one of us, face the citizens of the United States on this Labor Day 1949. We must, as a nation, quickly find the answers—the right answers. We cannot afford to drift.

The American people have clearly shown their faith in the future of liberal government, and their deep-seated contempt for doing nothing reaction. We are proud of the role of our Political Action Committee in helping advance the cause of government for the people in the 1948 election. Our political action will be even more successful in 1950.

World Watching
The eyes of the world are focused, intently and hopefully, upon our actions in the year ahead. At a time when dictatorships, both Communist and Fascist, are deriding our way of life, we must demonstrate forthrightly that our democratic system can easily provide the greatest good for the greatest number.

For our own sake, and for the cause of freedom everywhere, we must show that free collective bargaining works in behalf of all the people; that we can avert mass unemployment and in fact, constantly raise our living standards; that our government acts vigorously, at all times and in all places, to avert hardships and distress, while buttressing our civil liberties and our economic rights.

The CIO is committed to these goals, and determined that they shall quickly be achieved. Workers in America are devoted to the preservation and strengthening of our democratic way of life against the attacks of all totalitarianism. We will fight, and fight hard, against all who seek to undermine our liberties or encroach upon our standards of living.
