Army Stint Launches Gift Wrapping Trade For Young Indianapolis Display Artist

Phyllis Fitzpatrick
Is Herron Alumna

By MARJORIE TURK

Miss Phyllis Fitzpatrick has an unusual studio for an artist. Hers is filled with shiny foil paper, sequins, spangle glitter and colored cut glass. There are also yards and yards of multicolored ribbons.

Phyllis, an alumna of the Herron Art Institute, is in the custom gift wrapping business. While an undergraduate she was most interested in design. She came to her unique career by way of a stint with the Army Map Office.

She did drafting and compilation there during the war. Phyllis next was with a local department store doing interior display before going out on her own.

She still continues with the display, handling special window decorations for small merchants. Christmas is the busiest season and her studio, 3855 Park Ave., is a welter of gaily colored trimmings.

Disguises Yule Gifts

The artist likes any job that takes imagination. She will make the exterior of your gift look like anything you want from a Greek temple to a rain-bow.

Right now she's disguising Christmas gifts as tree ornaments. The presents are put in especially made boxes that sparkle like stars or have the form of a tiny angel. After the gift is taken out, the ornaments can be stored away and used during the holiday season year after year.

Other Christmas specialties are lingerie boxes that can be put right down in the dresser drawer to keep favorite slips or nightgowns in order. There are candy boxes that can be refilled and kept as a coffee table piece.

Nor does Phyllis limit her career to display and gift wrapping. She makes party favors and does the decor for luncheons. She also does hand-painted scarves and ties for the accessory bar of a downtown department store.

Canasta— Watching the Score Called Difficult; Strategy Point in Teaching Beginner

By WILLIAM E. MCKENNEY, America's Card Authority
Written for NEA Service

IN MY INTERVIEW for today with John Crawford, one of the country's great Canasta players, I asked him "What is one of the most difficult points of strategy to teach the beginner?" Mr. Crawford replied, "Watching the score." Our interview proceeded as follows:

QUESTION: Give me a specific case to illustrate what you mean by "watching the score?"

ANSWER: Let us say you have 4200 points at the start of a hand. You need 120 for initial meld and you are fortunate enough to get it early. You get a mixed canasta, bringing your score up to 4500.

You have a red tray, making your score 4600. In addition you have approximately 200 points melded. Now your partner says, "May I go out?" Seldom would the correct reply be "Yes." You do not want your side to go out.

Have you ever sat through a hand at canasta needing 120 points for an initial meld when you could not even draw a deuce? Remember, then, that if you let your partner go out in the above situation you may end up with 4800 or 4900 points, which means that you will have to meld 120 points again.

If the opponents get off to a good start on the next hand they might easily win the game while you sit waiting for 120 for your initial meld.

Therefore, even at some risk, you must not let your partner go out. Watch your score and make every effort to meld enough cards to put you over the 5000 mark.

Opening Meld

Now for my regular questions and answers: **QUESTION:** The other night we were playing Canasta and our opponents had 3150 points. However, we only had 1440 points. When it came my turn I made an initial meld of 50 points.

My opponents claimed that the highest score of either side determined the minimum meld requirements. In other words, because they were over 3000 points and needed 120 points for their meld, they claimed our side would have the same meld. Were they wrong?

ANSWER: They certainly were. That is one of the interesting features of Canasta. I have seen many games run out by a low score pair because the other side could not make the minimum meld requirement of 120 points, in their having 3000 points or more on their score. This feature also claimed that I could not use the role.

QUESTION: The top card of the discard pack was a 10-spot. I had two natural 10's in my hand with a deuce. We needed 50 points for our minimum meld.

I wanted to take the 10 with my two natural 10's and add the deuce to the three 10's to make the minimum meld. My opponents claimed that I could not use the role.

ANSWER: This is the one time that the hand automatically ends. You must put the red tray down on the table immediately.

As there is no card in the stock pile for you to replace the red tray, you cannot make a discard. You are permitted to make whatever melds you care to make, form canastas, if possible, play off on your partner's melds, or you can go out if you can meld all of your cards, but remember you cannot make a discard.

Mr. McKenney is unable to answer individual questions on Canasta from readers. However, he will include the most frequently asked questions in his column.
