STOMACH Often Distorted Several TIMES NORMAL SIZE by GAS CAUSED by EXCESS ACID

When the food you eat reaches your stomach, tiny gastric glands which line the walls of the stomach give off hydrochloric acid which is essential to the digestion of proteins, like meat. But if an excess hydrochloric acid is produced, you are in trouble. The hydrochloric acid attacks the stomach wall, irritating and inflaming them. It also forms gas which expands the stomach causing that burning sensation and bloated, blown-up feeling...and starts the gnawing, stabbing pains you know too well. Is there anything you can do to stop your suffering?
