Lint May Cause Greish Look

Lint may cause that faded greish look which black socks and other dark clothing sometimes takes on from laundering, textile specialists of the Agriculture Department suggest.

When laundering in a non-automatic machine or by hand home-makers frequently wash dark clothes in the water previously used for white clothes. Very often this water contains lint which catches and clings to the dark fabric, is difficult to remove in rinsing, and shows up when the clothes are dry.

To prevent this lint tinge, use fresh suds for dark clothes. Bluing also benefits the color of black or blue fabrics.

Keeping dark clothes dark, the specialists say, may be as much of a laundering problem as keeping white clothes white. Avoid too hot water for the sake of colors, rinse thoroughly and dry in the shade.

Three-Quarter Time Smooths the Airways When the Stork Is About to Land

By JAY BREEN, United Press Staff Correspondent

NEW YORK, July 29—If the stork is hovering over your house and you'd like to bring the old bird in for a safe landing, throw some lullabies on the phonograph. An associate professor of obstetrics at Johns Hopkins Hospital in Baltimore revealed today that the same kind of music which charms the savage beast also relaxes mama through a blessed event.

Dr. Robert Hingston said that, after 90 days of piping music into Johns Hopkins delivery rooms, "the success of the experiment is absolute."

He didn't recommend that the uninitiated take on the job of selecting tunes, however. Dr. Hingston said, "Proper choice is of major importance. Beboop, for instance, might be worse than no music at all."

Dr. Hingston called canned music of the dream-boat style especially soothing in the early stages of labor. He said, "We were a little surprised to find that exactly the same kind seemed to do the most good when it was piped into the room where fathers were waiting."

A nice, soothing waltz measurably cut down the number of chain cigarette smokers in the expectant fathers ward, he said.

Dr. Hingston turned over the programming of the music to a commercial firm, Musak Corp., which listed an imposing series of clients who had found one-two-three time helpful in their business. An official, Elaine Laks, said, "I think the final edge in our favor was the number of farmers who have testified that their chickens lay more eggs if our programs are piped into their coops."

Miss Laks said special programs are made up for hospitals, which differ materially from the kind of music the company feeds into cocktail lounges. "We feel that rhumbas or foxtrots, for example, might be too exciting," she said. "On the other hand we have to vary tempos slightly, or the patient gets restless and bored."

"Sweet Dreams" Dr. Hingston's test showed that 80 per cent of the women approved and liked music throughout the delivery period. Ten per cent said they didn't think it made much difference and another 10 per cent firmly demanded that the music be cut off.

"In general," he said, "we found that the music worked very well for mothers who received anesthetics that rendered them unconscious." Those who went under to the strains of a Strauss waltz invariably reported sweet dreams on awakening.

Miss Laks revealed some 55 other hospitals across the country have followed the lead by installing music, although not all have made it a standby in their blessed event departments.

We, the Women— Shall It Be Marriage Or a Degree?

By RUTH MILLETT

JUST ONE YEAR stands between daughter and the college degree her parents want her to have. But she wants to forget about the degree and be married this summer.

Her parents have put their plea to her to finish her education before she marries on this basis: "If you love us at all you will do this for us. If you marry now against our wishes it means you don't love us."

She thinks their plea is terribly unfair and that she has a right to make her own decision without being made unhappy by her parents' attitude.

It seems to me there is some right on both sides. The parents want her to finish college before she marries because they probably have dreamed for years of giving their daughter a college education. Also they know that a college degree offers a girl a certain amount of security for the future. It is something that can give her that no one can take from her.

But they are trying to sell her on the idea by appealing to her love for them—instead of to her common sense.

SHE HAS a right to resent their putting their demand on an "If you don't do this for us you don't love us" basis. That kind of an emotional appeal certainly isn't fair to the girl. If they can't make her see the wisdom of finishing her education before she marries, then they had better accept her decision calmly. They shouldn't weigh her down with guilty feelings that she has let her parents down.

It's wrong to put a daughter in the position of having to choose between her parents and the man she loves. Young people of marrying age have a right to marry without any feeling of guilt that in going forth to lead their own lives they are letting their parents down.

If they are made to feel guilty, then their parents are letting them down.
