

en the tyranny of Bonaparte is regretted. If he was ambitious, say they, he at least rendered us independent and powerful. What a change for this high minded nation! The time is fast approaching when the distinguished exiles who have sought refuge on our happy shores will be called back to support the independence of their country, and to assist in raising the French name from the degradation to which these puny Barbons have reduced it. I hope the conduct of our fellow citizens towards these distinguished men, is such as will be remembered by them with pleasure hereafter, who are greatly beloved here by the nation at large. I found our minister at Paris highly respected, tho' he did not appear to me to be entirely satisfied with the present state of affairs—at least such was my impression."

In addition to the foregoing, we learn that the Barbons are still held in the estimation of the very Royalists of France, as to seem already deposed. Austria will insist on placing the young Napoleon in the seat of Louis the Eighteenth—Important events may be expected—British influence in France will fall with the Barbons.

Earthquake

The Vincennes paper of the 28th of December, says, that a shock of an Earthquake was very sensibly felt at that place. It is remarkable that a similar phenomenon is said to have been experienced on the 23d in this town, though not attributed to the same cause by naturalists. They tell us, that on that day the bank oil having finally passed the senate, in consequence thereof a tremendous explosion took place at the sign of —, accompanied with a terrific noise, resembling in kind, though perhaps not in magnitude, two savage hosts, with hideous yells, rushing into battle. The tottering see-saw, zig zag motion which ensued produced a dizziness, which lasted two or three days, especially on persons of weak nerves. We regret that the editor of the Western Sun, had not been more particular in noting the hour of concussion, and the direction of the vibrations felt at Vincennes, which might have enabled the philosopher, calculating the velocity of sound and motion, to have determined with some degree of precision, whether it originated at New Madrid or Corydon.—The only conclusion at present suggested to our minds, is, that the desolating effects of volcanic eruptions, are not more general in the natural world, than corrupt example in the moral.

Indiana Exchange Bank.

Within a few days, we have seen notes purporting to be on the Indiana Exchange Bank, issued at Jeffersonville, and signed J. Bigelow, president. Knowing of no law, authorising Mr. Bigelow's paper shop, we deem it our duty to caution the public against giving currency to the paper of any bank not sanctioned by the Constitution and laws of Indiana, and our Constitution says expressly, that "There shall not be established or incorporated any bank or banking company, or mo-

nied institution, for the purpose of issuing bills of credit, payable to order or bearer" except a state bank and branches.

JOHNSON, NO. II.

DRESS

"*Prompt at thy voice all daring commerce flings*
"To tempest-brooding gales his fearless wings;
"Asks every shore, what venture's soft deceit
"Makes grace more winning, and 'en smiles more sweet."

This subject though sneered at by some as totally unworthy of notice from any, except the weak and lowly minded class, is recollect that health and even our very existence is connected with it.

Although generally in the right, on all engaging *fair ones*, in this particular, suffer their judgments to be governed by the ever varying goddess of Fashion, and consequently they are led to act unworthy of them selves. 'Tis now mid-winter, but no sooner is a cotillion or private party announced than,

'Rous'd at the sound, the fair with glad amaze,' hasten to the dressing room and forthwith, for fashion's sake alone, exchange the flannels and bombazines for the cambric dimity and jaconet muslin; the worsted stockings give way to the more soft & beautiful silk or cotton hose; and the warm cork-soled shoes are left in place of the white elastic slipper:—thus equipped they sally forth,—the evening is spent in *tripping on the light fantastic toe*, or wounding many a lover's tender heart: without lamps or pavements or lights they return home completely wasted, muddled and benumbed!—Call the next day and you'll find the worthy mothers laboriously employed in administering to their coupling daughters, stews, sweetmeats and other nauseous articles. Probably sickness ensues, and the visits of many a *quack looking fellow* must be endured e'er this sad scene is o'er.

I have just heard of some calculating mothers who declare as a sine qua non to their daughter's future attendance, that the every-day flannels, bombazines and silks shall be cast off no more for the flowing lawns and thin jaconets. This is worthy of example; and I call upon all those who value their children's health and happiness—all those who value the happiness of young men, old bachelors and widowers; and finally all those who value health, happiness, and smiling faces, generally to unite in preventing this fiend of fashion from longer deluding *those and those only for whom we are at all times ready to pledge our lives, our fortunes and our sacred honor.*

Cin. Gazette.

To the Electors of Jefferson County, GENTLEMEN.

Being solicited by a number of friends to the COUNTY, to offer myself for county commissioner: I have consented to stand a poll, at our next election. I can assure you, I think my motive is pure; even to do you a needful

service; which shall be made manifest, (if elected) by my best exertions to keep you as free from heavy taxes as possible; especially, a tax for the purpose of erecting public buildings. I also feel disposed to promote Republicanism, at the expense of every Aristocratical movement.
