Fencing Notice

The Tie That Binds.

It Never Slips.

Why make weak and Destructive Fences

When the INDIANA ANCHOR FENCE COMPANY will sell the Raw Material and do your own fencing or we will build your fence. Estimates made on application. Good fences makes good neighbors; Strong wire makes good fences; Boards and nails are too expensive; Merit alone can stand the test of time; Old barb or smooth wire fences can be re-made better by using the Anchor System. All stays are made of No. 8 galvanized steel wire and are strong enough to support the fence. With automatic ratchet it adjusts itself thus preventing the breaking or sagging of your fence. This fence will not hurt your horses or cattle, sheep will not lose their wool on it and cattle and hogs cannot lift it to get through it.

The Anchor Fence is the best in the world—Just the fence for School Houses and Cemeteries.

The Anchor Company makes a farm wire bound gate, that is light and strong and cheap. Also ornamental gates and fences made on the Anchor System by clamping.
