Do Not Be Imposed Upon.

For Thin Babies

Fat is of great account to a baby; that is why babies are fat. If your baby is scrawny, Scott's Emulsion is what he wants. The healthy baby stores as fat what it does not need immediately for bone and muscle. Fat babies are happy; they do not cry; they are rich; their fat is laid up for time of need. They are happy because they are comfortable. The fat surrounds their little nerves and cushions them. When

they are scrawny those nerves are hurt at every ungentle touch. They delight in Scott's Emulsion. It is as sweet as

offering off their ditch assessments instead of letting it go into a twelve year bond. A good head is that, boys.
