

## Your Hair Contrary?

Is it inclined to run away? Don't punish it with a cruel brush and comb! Feed it, nourish it, save it with Ayer's Hair Vigor, new improved formula. Then your hair will remain at home, on your head, where it belongs. An elegant dressing. Keeps the scalp healthy.

Does not change the color of the hair.

**Ayer's**  
Formula with each bottle  
Show it to your  
doctor  
Ask him about it,  
then do as he says

We certainly believe this, or we would not say so. Ayer's Hair Vigor, as now made from our new improved formula, is a great preparation for the hair and scalp. Stops falling hair. Cures dandruff. Promotes the growth of hair.

Made by the J. C. Ayer Co., Lowell, Mass.

## JASPER COUNTY DEMOCRAT.

SATURDAY, JAN. 4, 1908.

Who is the "protective" tariff protecting in these days of unexampled, unparalleled and undone Republican prosperity?

By making Senator DuPont of Delaware, chairman of the committee on "expenditures of the war department," the Republican United States senate gives the powder trust a big boost. DuPont is the head and front of the powder trust, and now the head of the trust is put into a position where he can have a great deal to say about how much powder the government shall buy and what it shall pay for it.

We have not the slightest disposition to gloat over Mr. D. P. Baldwin of Logansport, but the public interest demands that the proper moral should be drawn from the insolvency of three private banks which are partly owned by him.—Indianapolis News (Rep.)

The "moral" that the News then proceeds to draw is that the state private banking law is not what it should be. But there is another "moral," a political one, that the News studiously refuses to mention, and that is as to the failures in business, after eleven years of Republican rule, of prominent persons who worked so hard in 1896 to "save" the country from the Democratic party.

The Republicans of the state are divided into two camps over the proposition as to whether Governor Hanly should be permitted to go to the national convention as a delegate-at-large—one of the alleged big four. The governor's declaration at Columbus, Ohio, that he was not bound to support his party when it acted contrary to his own views and that he reserved the right to support a candidate of another party, is the cause of the present trouble. His opponents say that he is no longer a "regular" Republican and should not be sent to Chicago as a representative of the party. But just keep your eyes on the Hon. J. Frank. If he wants to be a delegate he will be one or else there will be the ding-busted row the Republicans have had in many years.

## AN ORGAN AT WORK

It is well known that the Indianapolis News is the personal organ of Vice President Fairbanks. For a long time it has waged a relentless campaign against President Roosevelt and has sought to discredit him in many ways.

All this it did in the interest of Mr. Fairbanks. And now the News is looking about for a candidate for the Democrats—someone besides Mr. Bryan. It lets its eyes rest lovingly on Governor Johnson of Minnesota. Johnson looks good to the News—just now. In a column editorial the News says so many nice things about Johnson that one would think it could not resist the temptation to support him if he should be nominated. But the news would resist that temptation. It has always resisted the temptation to support Democratic presidential candidates. It has never supported one. And it will not support Johnson or any other Democrat. The news is a Republican paper—of the "holy" kind. Just now in opposing Bryan it is doing just what it has been doing in fighting Roosevelt—working in the interest of Fairbanks.

## WASHINGTON LETTER.

Political and General Gossip of the National Capital.

Special Correspondence to The Democrat.

Ex-Senator Blackburn, now Governor of Panama, is in Washington on leave and brings back a radiant account of the progress being made on the Isthmus. "Col. Goethals, the Chief Engineer and the chairman of the Isthmian Canal Commission, is making wonderful progress with the construction of the Canal," said Senator Blackburn, today. "It is perfectly amazing the rate at which they are digging the big ditch and the satisfaction and contentment of everyone connected with the work. Colonel Goethals is an ideal man to have charge of a big project. He is always perfectly cool and in an absolute command of the situation. Secretary Taft is a most satisfactory man to have general supervision of the work. He has the capacity of selecting the best men and then allowing them a free hand to push the project. His trips to the Isthmus have done good, for big Bill has a smile that won't come off and his handshake is an inspiration to every man on the job." Asked how living on the Canal Zone compared with living in Kentucky, the Senator said, that apart from the friends he had to leave behind, life on the Isthmus was decidedly pleasant "a delightful climate, a pleasant circle of people and the satisfaction of knowing that one is connected with one of the greatest undertakings of the age, and an enterprise which is going to benefit the Southern states incalculably."

Politics are seething in Washington just now but it is chiefly Republican politics. Four years ago there was no certainty whatever as to who was going to be the Democratic candidate while the Republican selection was all out and dried. Now the situation is reversed. Mr. Bryan is generally conceded to be the choice of his party, while the question of a presidential candidate is still in the air, although during the last week the progress has been all one way and Taft looks today like the almost certain candidate of the Republicans. However, there are plenty of Republicans, especially among the politicians, who have their scalping-knives sharpened for Taft and if they can catch the big Secretary with his back turned they will scalp him as sure as fate.

The President has just precipitated a pretty row in the Navy Department by his order that a naval surgeon shall command the hospital ship Relief. The line officers of the navy are violently opposed to permitting a doctor to command a ship. They say that whenever the navigating officer reports a squall in the offing the captain-doctor will order calomel and consult his anatomical charts. Senator Hale, chairman of the committee on Naval Affairs insists that that no doctor should command a ship and threatens to introduce a bill prohibiting it. The army officers are greatly rejoiced because they have had to stand no end of chaffing over the army surgeons who have received preferment. For instance, major general Ainsworth was a doctor and is said to have received his first promotion because of his skill at keeping the feet of the infantry in good shape. Then there is General Leonard Wood who secured a regiment and special promotion over the heads of hundreds of other officers because he was Mrs. McKinley's family physician and President McKinley never

could refuse any favor asked by his wife. Now the army officers are addressing every naval officer as "Dootor" and every naval surgeon as "Admiral." Surgeon General Rexy, who puts his name in the telephone book as "Admiral" Rixey, although he has been forbidden to use the title of admiral, and who is family physician to the President's family, is responsible for the president's decision in the present case.

Frank H. Hitchcock, First Assistant Postmaster General, who was the loudest Cortelyou shouter in the Republican camp less than two weeks ago, is now shouting for Taft and applied recently for the position of Taft campaign manager. The insignificance into which the Cortelyou presidential boom has shrunk is enough to make the unfortunate Secretary weep. In this connection a story has been going the rounds to the effect that Hitchcock was to succeed Vorys, Taft's Ohio manager. Of course there is no truth in the story. Vorys has done too good work in Ohio to have anyone placed over him by the Secretary, but the story served to worry Vorys and that is what it was printed for.

The Philippine Government recently sent to Washington an order for the smallest and yet the most expensive shipment that the Government has ever been called upon to make. Its order was for one thousandth of a gram of radium and the price paid for it was \$3,000. The Insular Bureau, which has charge of the shipment, is wondering how it can send the tiny fragment of mineral without danger of being lost. The Philippine Bureau of Science wishes to use the radium in a series of experiments it is conducting. And the poor Filipinos pay the shot.

Rep. Hobson, who is always a hustler and constantly springing some new idea, has hit upon a novel one. It consists of a bill providing for the weekly publication of an official journal which is to give briefly the important events in every department of the government, the important official acts of the President and the proceedings of Congress; not in full, as in the case with the Congressional Record, but summarized for busy readers. There is grave question if Mr. Hobson's bill can become a law, but he is in deadly earnest, has published a sample copy of his proposed sheet and believes that great good could be accomplished by its publication and distribution by postmasters throughout the country. His idea is, of course, to circulate it free. Incidentally, he would have the paper contain a guide for the use of people who visit Washington.

The chief Engineer of the Panama Canal has decided that two locks nearest the Pacific shall be placed four miles further from the sea than was originally intended. This will save \$10,000,000 and incidentally will move the locks further away from danger of an enemy's fleet.

## Big Public Sale.

Having bought land in Michigan and expecting to move to that state I will sell at Public Auction at my residence, 8 miles Northeast of Rensselaer, 1 mile North and 1/2 mile east of the Smith Cemetery in Barkley Tp., known as the old Burns farm, commencing at 10 a. m.
