

THE NEW \$2.00 Home Library Wall Chart

The Democrat one year, and
This Fine \$2 Chart, for only **\$1.35**

Every home in the county should have one of these Wall Charts. They are filled with valuable information, which you want in the home. Valuable to every member of the family,

The First Page Section

Contains one of the best and most up-to-date maps of Indiana it is possible for us to obtain. In striking colors it shows plainly—

The counties, county seats, and all the towns in the state.

The congressional districts, plainly outlined and numbered.

The railroads, interurbans, rivers and canals.

The distances between all rail-road stations.

Around the margin of this map are good photographs of all the governors of Indiana, from Governor Arthur St. Clair of the Northwest Territory down to and including

Gov. J. Frank Hanly

On the reverse side of the map is a complete list of all towns and postoffices in the state, arranged in alphabetical order, with the population of each. The map is indexed with marginal figures and letters, so that a town, however large or small, may be instantly pointed out.

With the establishment of rural routes the postoffices of many small towns have been closed and the people are served by rural route out of a neighboring town. This map shows how to address mail for such places.

The Second Section

Contains a handsomely engraved map of the United States, and four smaller maps, in colors, showing Alaska and our Island Possessions.

Also a map of the United States showing dates of accessions of territory from 1776 to the present day.

This is an exceptionally fine map, is up to date in all details, shows all the state capitals, and all the principal cities, railroads, etc. Around the margin of this section are good portraits of all the presidents, from George Washington down to

Theodore Roosevelt.

On the reverse side of this section is shown the population of all the principal cities of the United States arranged in alphabetical order by states, and growth is indicated by the census figures in parallel columns for the years 1880, 1890 and 1900.

There is also much valuable data and interesting information about the possessions of the United States, and the Panama Canal Zone.

The Third Section

Contains a map of the world engraved especially for this chart. It shows the ocean routes, and distances and length of time required to travel between different ports, the countries of the several continents are all brought out sharply in colors, and the capitals and principal cities are all shown.

There are also TWO NEW MAPS OF THE

Panama Canal Zone

Showing in relief with actual measurements, the great work the U. S. government is undertaking there. The map shows the lock canal as proposed by the latest plans, the artificial reservoirs, dams, spillways and other important features.

This section also shows photographs of all the rulers of the nations of the earth, and their flags and coats of arms.

The reverse side gives an up-to-date historic sketch of the Panama Canal, profusely illustrated with pictures taken during President Roosevelt's recent trip of inspection to the Isthmus.

The Home Library Wall Chart would easily sell for \$2.00 at any book store or map supply house. It will prove a valuable feature in any home or office or school.

Only by co-operating with several of the publishers of the leading newspapers in Indiana, and ordering thousands of copies at one time, is the Jasper County Democrat able to secure
