

## HAPPINESS IS DEPENDENT UPON HEALTH

Health is dependent upon digestion.  
Digestion is dependent upon mastication.  
Mastication is dependent upon teeth.  
Good teeth are a continuous pleasure to those who possess them. An occasional thought about your teeth, is a profitable habit. How long is it since a dentist has told you the condition of your teeth.  
Operations that my patients receive, create a satisfaction they want to tell the neighbors about. Prices meet the ordinary purse.  
You need to know the news I will tell you about your teeth.

## INDIANA'S NEW PURE FOOD LAW

Substitutes for Sugar Are Prohibited.

ALL MILK MUST BE COOLED

Regulations Affect Confectioners, Canners, Dairymen, Packers, Butchers and Other Dealers in Articles of Subsistence—Bread and All Staples Exposed for Sale Must Be Protected From Insects, Dust and Any Other Thing Liable to Cause Pollution—Cooked Provender for Hogs.

Indianapolis, Dec. 1.—The state board of health has made public its new rules affecting confectioners, dairymen, canners, packers, butchers and other dealers in food products. Dr. J. N. Hurty, secretary of the state board of health, says they have the same effect as laws and failure to observe them will subject the offender to prosecution.

**Sugar Substitutes Barred.**  
Bakers, grocers and confectioners are touched by the rule which reads: "No manufacturer, dealer, vendor or other person shall expose for sale or sell bread, pastry, confectionery, shell-nuts, tapioca or other foods so prepared that they are ready for consumption, unless such foods are securely protected from insects, vermin, dust, dirt and all pollution."

The use in canned food products of sugar substitutes known as saccharine, dulcin, sucral, guarantose, hayden sugar crystals, glucin or any coal-tar sweetness is prohibited. The use of any preservative except salt, saltpeter, sucrose, vinegar and spices is prohibited. It is permitted, however, for the season of 1909 that one-tenth of 1 per cent of sodium benzoate may be used for preserving tomato catsup and bulk sweet pickles.

**Milk Must Be Strained.**  
It is required that all milk shall be strained through wire cloth strainers and cooled to 50 degrees Fahrenheit within thirty minutes after it is drawn from the cow.

It is made unlawful to feed hogs any uncooked slaughter house waste or the uncooked flesh of dead animals. Hogs so fed, it is pointed out, frequently acquire tuberculosis.

Several weeks ago Taylor and the young woman went to a social affair together. No sooner had they arrived at the place than he excused himself for a few minutes and went to the girl's home, from which all members of the family were absent, broke into the house and stole the young woman's purse.
