Stop That Cold

To check early colds or Grippe with "Preventics" means sure defeat for Pneumonia. To stop a cold with Preventics is safer than to let it run and be obliged to cure it afterwards. To be sure, Preventics will cure even a deeply seated cold, but taken early—at the sneeze stage—they break, or head off these early colds. That's surely better. That's why they are called Preventics.

Preventics are little Candy Cold Cures. No Quinine, no physic, nothing sickening. Nice for the children—and thoroughly safe too. If you feel chilly, if you sneeze, if you ache all over, think of Preventics. Promptness may also save half your usual sickness. And don't forget your child. If there is feverishness, night or day, herein probably lies Preventics' greatest efficiency. Sold in 16 boxes for the pocket, also in 25¢ boxes of 48 Preventics. Insist on your druggists giving you

Preventics

The Unanimous Verdict

Of the American People, North, South, East and West, is that

Studebaker
BUGGIES

Surreys, driving wagons, farm wagons and harness are leaders in their line.

That is why more Studebaker vehicles are sold every year than those of any other make.

Because the Studebakers build vehicles in such enormous quantities, more than 125,000 every year, they are able to offer a little better values than other makers.

You will make no mistake if you buy a Studebaker from
