GAIN IN FREIGHT SHIPMENTS

Movements on Railroads Serving Indianapolis, Which Have Been Held Back by Strike of Switchmen, Show Improvement.

Indianapolis, April 16.—Freight movements on railroad lines serving Indianapolis which have been held back because of the insurgent strike of yard switchmen show a decided improvement and railroad officials said that freight in the Indianapolis yards is moving more freely. The labor situation is critical. Several railroads reporting that some of the men who quit have returned to work, and the Big Four railroad opened an office to engage men to fill the places of the switchmen who quit. Several informal conferences were held between railroad superintendents and strikers relative to the return to work of the men but the railroad officials declined to discuss what took place at the meetings. Several of the railroad companies are considering plans to fill the places of the men who have quit. The Big Four railroad, which has been accepting only carload shipments, has announced that both carload and less than carload shipments will be accepted for local stations only. Big Four officials said 28 engines were working and they expected to better the day's record to handling about 65 per cent of the normal business of the road.

Man and Dog Perish in Fire.

Muncie, April 16.—Awakened about four o'clock in the morning by reports of what is believed to have been the discharge of revolver cartridges, persons living in the village of Medford, eight miles southeast of Muncie, saw the two-room house occupied by James Hetzler, a laborer, in flames. When they were able to enter the building later, they found Hetzler's charred bones on the remains of his bed and the bones of his dog under the bed. It is not known whether the man and dog were burned by exploding cartridges or were burned to death. Hetzler was fifty-three years old. He is said to have had a considerable sum of money. Hetzler had been divorced for several years. His former wife has married again and now lives in Indianapolis. A son and daughter, it is said, also live in Indianapolis.

Strike Closes Motor Plant.

Newcastle, April 16.—After working one day on a half-time schedule, the Maxwell Motor company here suspended operations entirely, throwing 3,500 persons out of employment. The insurgent strike of railroad switchmen and yardmen is responsible, the factory being unable to get raw materials and no more finished products. The factory has plenty of coal. This is the first time in more than five years the factory has been entirely idle, says F. D. Brebner, superintendent. Other industries are feeling the pinch of the strike, but are continuing operations and placing their products in storage.

Miners Ask Weekly Pay.

Brazil, April 16.—The joint scale committee of the coal miners and operators of district No. 8 of the United Mine Workers of America, which includes the Indiana block coal field, failed to reach an agreement here on a proposed new wage scale because of the miners' demand for a weekly pay day. The miners made a straight-out demand for a pay day every Saturday night which, it is reported, precedes a vigorous fight for a weekly pay day in district No. 11, the adjacent bituminous field. Provisions for a new scale have otherwise been agreed on.

GOVERNMENT IN FIGHT ON REVOLT

(Continued from Page One)

American Revolution, organizations of propagandists from Russia, Germany and elsewhere and numerous other groups have been slowly harmonizing. The Seattle attempt failed not because Ole Hanson put his foot down but because the people behind that attempt were using it simply as a means of learning their power. They learned that society in America is dependent for its existence upon basic industries, the utilities.

"A little more than a year ago it was tried in Winnipeg with a general strike that tied up the city for more than a month. They learned then that it could be done. Bit by bit they tried their power, first with the steel strike, then the coal strike, then came strikes called sporadically at the public utility plants; policemen and firemen were called out; now we have the railroad strike."

Soldier Leaps From Train.

Dixon, Ill., April 16.—Robert L. Tanner, first-class private, medical corps, U. S. A., leaped from the vestibule of a swiftly moving Northwestern passenger train at Union Grove, a small station west of Dixon, and is dying.

SO. CAROLINA BARS DE VALERA

American Legion Members Prevent Scheduled Addresses of Red.

Columbia, S. C., April 13.—Because of objection by prominent alumni, notably members of the American Legion, Eamon de Valera, "president of the Irish republic," did not speak at the University of South Carolina yesterday. Friends of de Valera withdrew their request that he address the university students when objections were made from several quarters.

Hornets' Nest post of the American Legion has adopted a resolution at Charlotte, N. C., opposing the appearance in that city of de Valera, who recently was invited by local Irish sympathizers to deliver an address.

A committee was named to file a protest with the city authorities against de Valera being permitted to speak in Charlotte and calling on owners of halls to refuse to permit such use of their places.

U. S. Beef for the Public.

Indianapolis, April 16.—War department frozen beef stocks in Indianapolis storage depots now are available for public consumption at 10 1/2 cents a pound on account of the railroad strike, Governor Goodrich was advised by telegraph from E. C. Morse, director of sales for the war department. Orders for any of this meat, the telegram says, should be sent to zone supply officers, 1819 West Thirty-ninth street, Chicago, Ill. The meat will then be ordered delivered to all purchasers, f. o. b. the warehouses in which they are stored.
