

METHOD OF REPRODUCTION

Gives New Beauty to Record Music!

"TONES that are reproduced truer, finer, sweeter." "Music, that in both spirit and letter is restated with greater beauty." "All records transcribed with greater fidelity."

Golden opinions like these are showered on The Brunswick by its hearers everywhere. And why?

Because, with its many other betterments, it has an exclusive, new Method of Reproduction.

Method of Reproduction

This Method of Reproduction for which

The Brunswick

Phonograph is famous, includes two scientific features—the Ultona and the Tone Amplifier.

The Ultona

The Ultona—a new day creation—is a tone arm adapted to playing any make of record.

With but a slight turn of the hand, it presents the correct weight, precise diaphragm and proper needle.

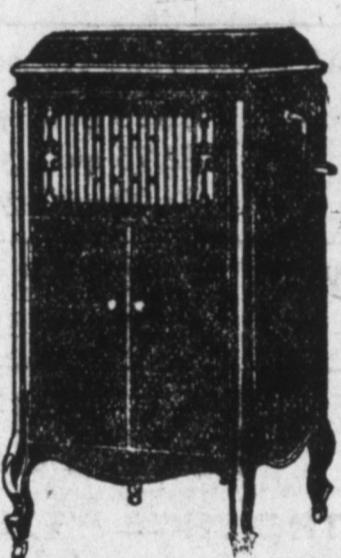

The Tone Amplifier

The Tone Amplifier is the vibrant all-wood throat of The Brunswick. It is oval in shape and made entirely of rare moulded hollywood.

By it, sound waves are projected into full rounded tones—tones that are richer and more natural.

Brunswick Superiority is Apparent

A complete demonstration will prove to you the merits of this super-instrument. Come in today.

WORLAND BROTHERS

B. W. B.
WEEK'S DOINGS

MILROY

Marion Spencer was in Monon Monday evening.

Mr. and Mrs. John Johnson were in Rensselaer Saturday.

Our teachers attended institute at McCoysburg Saturday.

Thomas Johnson and family spent Sunday with Ed Johnson and family.

Mr. and Mrs. Earl Foulks and children spent Sunday with the J. Englis family.

Marie Johnson visited over Saturday night with her uncle, Mart Sommers, and family.

Mr. and Mrs. Roy Culp and son Keith called on Mr. and Mrs. George Foulks Sunday evening.

Roy Culp and family ate Sunday dinner with his parents, Mr. and Mrs. W. E. Culp, and family.

Lorin George Foulks spent the first part of the week visiting with his grandparents, Mr. and Mrs. J. English, and family.

John Johnson moved two loads of his effects to the Dexter farm on

Monday, where he will soon be located. We are sorry to see them go.

James Wood, Theodore Johnson, Mr. and Mrs. George Foulks and the Misses Mary and Pearl Johnson were callers on Mrs. Anna Chapman and family Sunday afternoon.

GIFFORD

Mrs. Reece Cavinder is quite poorly at this writing.

John Fulton of Ohio is visiting Tell Rutledge and family.

The Doings of Hoosierdom Reported by Wire.

STATE PLANS HEALTH MOVE

Town Health Officers and Others Would Be Abolished and Their Duties Taken Over by Commissioner if Bill Is Approved.

Indianapolis, Dec. 17.—Town health officers and city officers and boards of health would be abolished and their duties taken over by a county health commissioner if a bill to be submitted to the general assembly in January receives favorable action. The state board of health favors enactment of the measure. The bill would provide for the appointment of a health commissioner in each county, who would devote his entire time to keeping away disease and improving the public health. Dr. J. N. Hurty, secretary of the state board, points out what he considers "three fatal defects" in the present health law. These are: Health officers are practicing doctors giving what time they choose to public health work. Health officers are practicing doctors in competition with their brother doctors and therefore cannot secure their co-operation. Without this co-operation present health officers are only partially successful. Health officers practicing curative medicine are with a few exceptions untrained and untrained in hygiene and disease prevention work. Their education and training is in the line of the pound of cure and not in the line of the ounce of prevention. Hence they are not efficient and economical to the state. The establishment of a county health commissioner in each county would not mean the creation of a new office, according to Doctor Hurty, but would simply make the old office more efficient. By eliminating the town and city health officers, and providing in their places one trained health expert an economy would be effected, Doctor Hurty believes. The law should contain the following provisions respecting the county health commissioner, Doctor Hurty says. His salary should be a living one graded by the number of people he serves; his duties and powers should be clearly defined; he should keep full and accurate records of his work; he should be subordinate to the state board of health; he should make weekly reports to the state board of health; he should be subject to dismissal for such reasons as the law may set forth; and a proper health appropriation should be provided in each county.

Other States Draw Hoosiers.

Bloomington, Dec. 17.—Many young men and women of Indiana are seeking their university training in state supported universities of other states surrounding Indiana, the committee on state universities and normal schools reports after an extensive survey. In the state universities of Illinois, Michigan, Wisconsin, Ohio and Minnesota there are 1,068 Indiana students enrolled, according to the committee's figures. From these five states Indiana university has but 32 students enrolled, while Purdue university has but 193. An analysis of the survey shows that 450 Hoosier students are attending the University of Illinois, while five years ago only 199 Hoosier students were registered. At this time there are 322 students from Indiana cities and towns attending the University of Michigan, 174 at the University of Wisconsin, 97 at Ohio state and nine at the University of Minnesota. Five years ago only a small per cent of Hoosier students were attending these universities.

Five states in the November election chose women for state superintendents of public instruction.

One of the greatest dykes in Holland is forty miles in length, and has been holding back the water for seven centuries.

The fossil coal to a depth of more than a mile would last 6,000 years at the present rate of consumption, if it were all recoverable.

The walrus supplies about 1,500 pounds of meat, 1,000 pounds of oil and 500 pounds of leather, and the white whale supplies much more.

Some London doctors are urging the wearing of less clothing, taking the position that the people generally are too well wrapped up in wool and fur to be good for their health. They are advocating what they call an "all-the-year-around suit."

Taking advantage of the imitative faculty of song birds, a simple mechanism has now been contrived that actually teaches canaries and other per warblers how to increase their singing repertory, says Popular Mechanics magazine. A partly water-filled cylindrical metal tank, in which a slightly smaller inverted tank slides up and down, provides enough air pressure for blowing a series of whistles of different tone.

Legion Women Meet January 18.

Indianapolis, Dec. 17.—Formation of the Indiana Women's auxiliary of the American Legion is planned to be completed at the auxiliary's first annual convention here January 18. L. Gignilliat of Culver, state commander of the Legion, will open the convention and Mayor Charles W. Jewett of Indianapolis will give the address of welcome. The morning session will also include the appointment of convention committees and consideration of adopting a ritual.

In the afternoon organization of the state department will be completed with the election of officers.

Resolutions will be brought forward concerning the care of disabled soldiers by the government and other after-war problems now facing the country.

Wife Sues, Man Ends Life.

Hammond, Dec. 17.—John Almasan of this city quit work to go to Chicago in search of a Christmas present for his wife. He had been estranged from her for some time and had counted upon the gift and the holiday spirit to effect reconciliation. As he was waiting for the train he read in a Hammond paper that Mrs. Almasan had filed suit for divorce, charging cruelty. He gave up the idea of buying a Christmas present, returned to his home, walked out into the back yard and shot himself twice in the chest. He was dead when neighbors found him.

John Lewis in Lead.

Terre Haute, Dec. 17.—John Lewis is showing big gains in the Terre Haute but is gradually losing in the Bicknell field. This report was issued on the miners' election in the Eleventh district, United Mine Workers of America, District No. 8 was reported giving Lewis a "good lead."

Electrical dehydrating plants for fish are promised as a result of recent experiments in England, which demonstrate that it is possible with the aid of heated air to accomplish in a brief time results that now require many days of air curing, says Popular Mechanics magazine. Deprived of

Public Sale

BATES BROTHERS.

Auctioneer: W. A. McCurtain.

Clerk: C. G. Spitzer.

SCRAPS

Of Russia's population, two out of three persons are peasants.

Five states in the November election chose women for state superintendents of public instruction.

The possibility of error in the comparison of fingermarks as a means of identification is very remote, but it is said that there will be even less uncertainty with the new method of making the fingerprints by means of the X-ray. This method consists of rubbing into the lines and marking of the fingertips a preparation of carbonate of bismuth or some other salt, which, when the fingers are photographed with X-rays, shows corresponding opaque marks in the picture thus obtained. The salt can be made to fill completely the minute markings and glands of the skin, even below the fingernails, and when photographed with X-rays these are said to present a more complete and exact record than any other form of print.

The fossil coal to a depth of more than a mile would last 6,000 years at the present rate of consumption, if it were all recoverable.

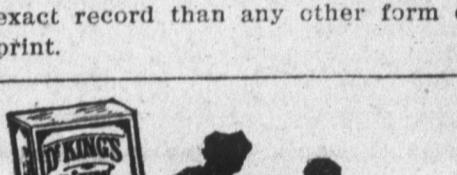

The walrus supplies about 1,500 pounds of meat, 1,000 pounds of oil and 500 pounds of leather, and the white whale supplies much more.
