

SIX MONTHS I COULD NOT WORK

Lydia E. Pinkham's Vegetable Compound Made Me Strong and Able to Work—I Recommend It To All My Friends.

Bayonne, N. J.—“I had pains in back and legs so that I could not stand caused by female trouble. I felt so tired all the time, had bad headaches, and for six months I could not work. I was treated by a physician and took other remedies but got no relief. A friend told me about Lydia E. Pinkham's Vegetable Compound and it has helped me very much. I am well and strong and now able to do my work. I cannot thank you enough and I recommend your medicine to my friends who are sick.”—Mrs. SUSIE SACATANSKY, 25 East 17th St., Bayonne, N. J.

Prayed for Cure Finds it After 10 Years
Food Would Sour and Boil
—Teeth Like Chalk

Mr. Herbert M. Gessner writes from his home in Berlin, N. H.:
I had stomach trouble over ten years; kept getting worse. I tried everything for relief but it came back worse than ever. Last fall I got awfully bad; could only eat light loaf bread and tea. In January I got so bad that what I would eat would sour and boil; my teeth would be like chalk. I suffered terribly. I prayed every day for something to cure me. One day I read about EATONIC and told my wife to get me a box at the drug store as I was going to work at 4 p. m. I took one-third of it and began to feel relief; when it was three-fourths gone, I felt fine and when it was used up I had no pains. Wife got me another box but I have felt the pain but twice. I used five tablets out of the new box and I have no more stomach trouble. Now I write to tell you how thankful I am that I heard of EATONIC. I feel like a new man; I eat what I like, drink plenty of water, and it never hurts me at all.

TOO LATE

Death only a matter of short time. Don't wait until pains and aches become incurable diseases. Avoid painful consequences by taking

GOLD MEDAL
HAARLEM OIL
CAPSULES

The world's standard remedy for kidney, liver, bladder and uric acid troubles—the National Remedy of Holland since 1696. Guaranteed. Three sizes, all druggists. Look for the name Gold Medal on every box and accept no imitation

DO NOT NEGLECT ROW OF POPCORN

Besides Its Use as Confection It Possesses Much Value as Nourishing Food.

INTERESTING FOR CHILDREN

Any Surplus Stock Not Wanted for Family Use Can Usually Be Sold to Local Merchants at Fair Price—Plant Early.

(Prepared by the United States Department of Agriculture.)

Don't forget to include a plot of popcorn in your garden. Besides its use as a confection, popcorn possesses much food value.

On many farms where it is not desired to grow popcorn as a market crop, a few rows are planted in the garden for home use. This usually interests the children and it is well to let them do the planting.

If it is desired to grow popcorn as a field crop, the surplus stock that is not wanted for home use can usually be sold to local merchants at a fair price, or a profitable local trade may be built up by supplying it direct to consumers.

Almost any variety of popcorn will give satisfactory results if properly handled and, by judicious seed selection, the chosen variety can be greatly improved.

Plant Popcorn Early.

Popcorn should be planted early so it will have a long season in which to mature. The planting may be done as soon as the soil is dry enough to cultivate, or when the oak trees begin to show their new leaves.

A warm, well-drained location, free from marshy conditions, should be selected. The soil should be plowed or spaded to a depth of eight inches or more and the surface of the plot thoroughly pulverized before planting. The rows should be about three feet apart. A small furrow two or three inches deep is sufficient. The kernels should be dropped eight or ten inches apart in

Give Popcorn a Place in Your Garden.

the row and covered to a depth of about one inch. The planting should be done before the moist soil in the furrow has had time to dry out.

Keep All Weeds Down.

Grass and weeds should be kept down as much as possible while the corn is making its early growth, and the soil should be kept loose over the surface by frequent cultivation. If only a small plot is planted, it is better to plant a number of short rows.

DON'T PASTURE SEED FIELDS

Mistake to Let Live Stock Into Ripe Alfalfa Severely Infested With Chalcids.

It is a mistake to pasture alfalfa seed fields which have become too severely infested with chalcids fly to yield a crop worth harvesting. Live stock walking through ripe alfalfa causes the seeds to be shelled out, and those infested with the hibernating larvae of the chalcids fly fall on the ground, where they become the source of infestation the following year.

ALSIKE CLOVER GAINS FAVOR

According to Ohio Station It Produces Favorable Yields in Soils Lacking Lime.

The use of Alsike clover as a substitute for the common red clover is gaining headway in Ohio, according to the Ohio experiment station. This is due to the fact that the Alsike clover produces favorable yields in soils where lime is deficient and under-drainage is lacking.

IMPROVE QUALITY OF CLOVER

Manner in Which Crop Is Handled After Being Cut Has Much to Do With Excellence.

The manner in which clover is handled after being cut, has much to do with the quality of hay obtained. The method of placing it in "cocks" is no doubt the best way, but labor is so scarce that other methods, requiring less hand labor, must be used.

RIGHT TOOLS NEEDED FOR WORK IN GARDEN

Large Assortment of Hoes and Rakes Unnecessary.

It is Important That Equipment Be Properly Cared for and Used Frequently—Keep Clean and Store in Dry Place.

(Prepared by the United States Department of Agriculture.)

Thrifty gardens should be thrifty gardens from start to finish, and the vegetables grown in them should not cost as much as it would cost to buy them on the market. Every item of expense should be kept down. This is especially true in the purchase of tools, according to specialists. Some gardeners have an idea that they must have a large assortment of hoes and rakes, wheel hoes, seed drills, spraying outfits and special equipment before they can begin to garden. But the tools actually required in the cultivation of a thrifty garden are few and simple. A spade or spading fork, a steel rake and a hoe, together with a piece of

Garden tools, including the essential implements and a few others.

string and two small wooden stakes, are the chief essentials. There are a number of other tools, such as a trowel, sprinkling can, wheel hoe, seed drill and wheelbarrow, that may often be used to advantage, but they are not absolutely necessary.

It is important, however, that the few essential tools be properly cared for and used frequently. Every time they are used they should be cleaned and stored in a dry place. Also they should be kept so sharp that the work may be done easily and thoroughly. A good job of hoeing cannot be done with a dull or rusty hoe.

If the garden is located at a distance from the house a small, low, flat toolbox, long enough to accommodate the hoe and rake, should be provided. The top of this box may be covered with a piece of roofing paper to make it waterproof, and a small lock should be provided for safety. The loss of one good tool will more than offset the cost of a toolbox of this character.

KEEPING FEW PIGS ON FARM

Hogs Furnish Good Variety of Meat and Also Lard for Family Use—Feed Cost Small.

Nearly two-thirds of the meat eaten on the American farm is pork, the average farm consumption of pork being over 500 pounds per family. The greater portion of the pork products used by the farmers are produced on the home farm. A small number of pigs can be raised cheaply. Kitchen and garden wastes, and sometimes dairy by-products, are available for feed. The farmer usually kills the hogs and dresses them on his own place. The hogs furnish a good variety of meat and also lard.

POULTRY NOTES

Get the chicks out-of-doors as soon as possible.

As a rule ducks are easier to brood artificially than are chickens.

You cannot get good egg yields from your hens unless you give the young chicks good care.

The Camphine is a breed of European origin that is now having a wave of popularity in this country.

If tankage is good and wholesome, the chickens like it and do well with it as an addition to the ration.

The egg is largely composed of water, therefore, the hen should have an abundance of water, fresh and clean.

Hawks never trouble ducks and the old mother duck will fight all intruders, such as cats, dogs and chickens.

Most of the trouble with lice on small chicks can be eliminated by doing away with the hens for brooding purposes.

If you keep ducks, make them comfortable by giving them dry sleeping quarters, and plenty of water; also by giving them shade.

Whether your chicks are hen hatched or incubator hatched, they must be watched closely for the pests and a light greasing is a fine preventive.

LIFT OFF CORNS!

Drop Freezone on a touchy corn, then lift that corn off with fingers

Doesn't hurt a bit! Drop a little Freezone on an aching corn, instantly that corn stops hurting, then you lift it right out. Yes, magic! No humbug!

A tiny bottle of Freezone costs but a few cents at any drug store, but is sufficient to remove every hard corn, soft corn, or corn between the toes, and the calluses, without soreness or irritation.

Freezone is the sensational discovery of a Cincinnati genius. It is wonderful.—Adv.

A Regular Dog.

He was looking for a good canine companion and had answered an advertisement in the newspaper. The following conversation ensued:

"You advertised a sensible dog for sale?"

"Yep."

"What do you mean by a sensible dog?"

"This pup has never had a ribbon around his neck and has never ridden in a limousine since the day he was born. He's a happy-hearted, bone-burying, cat-chasing, 100 per cent dog."—Houston Post.

Don't abuse your enemies—make them ashamed of themselves.

NAME "BAYER" ON GENUINE ASPIRIN

Take tablets only as told in each "Bayer" package.

The "Bayer Cross" is the signature of the true "Bayer Tablets of Aspirin." The name "Bayer" is only on genuine Aspirin prescribed by physicians for over eighteen years.

In every handy "Bayer" package are proper directions for Pain, Colds,

Headache, Toothache, Earache, Neuralgia, Rheumatism, Lumbago, Sciatica, Neuritis.
Tin boxes of 12 tablets cost only a few cents. Druggists also sell larger "Bayer" packages. Aspirin is the trade mark of Bayer Manufacture of Monaceticacidester of Salicylicacid.
