CURES ECZEMA QUICKLY.

New Drug, Poslam, Now Obtainable in Small Quantities.

Since its discovery one year ago, the new drug, poslam, has successfully cured thousands of chronic cases of eczema and other distressing skin affections. Heretofore poslam has been dispensed solely for the benefit of eczema patients in large jars sufficient for a month's treatment. This was to be an inconvenience to many thousands who use it for minor skin troubles, such as pimples, blackheads, seeps, scaly scalp, complexion blemishes, itching feet, piles, etc., which require but a small quantity to cure. The over-come this, and in response to urgent appeals, the dispensers of poslam have been obliged to adopt, in addition to the regular two-dollar package, a special fifty-cent size, which in future may be found on sale at J. W. Wais' and other leading drug stores in Hammond or may be ordered direct from the Emergency Laboratories, No. 32 West 25th street, New York City. In all eczema cases poslam stops itching with first application, and proceeds to heal immediately; chronic cases being cured in two weeks. In less serious skin troubles, results are seen after an overnight application.

Samples for experimental purposes may still be had, free of charge, by writing to the laboratories for them.

Notice to Water Consumers.
