This Offering for Saturday, Monday, Tuesday, Wedn'sd'y
Nov. 21, 23, 24 and 25.

E. C. MINAS CO.

HAMMOND, INDIANA

WESTING- HOUSE CO. MAY COME

Eastern Concern, Which Is
Largest of Its Kind in the
World, May Establish
Itself in the Calumet Re-
gion.

Developments today show that there is a possibility of Gary's locating the Westinghouse Electric company, the largest of its kind in the world, within its territory. It is a fact that they have been negotiating for a tract of land known as the E. D. Mandel estate, located two miles west of Gary and owned by a syndicate in Boston.

At present large real estate dealers about Tolleston say that the only hitch at the present time in the purchase of the property is that the price asked for the land is considered too high by the big Pittsburgh concern, and they are now dickering for a reduction.

Mandel Estate Lands Suitable Site.
The property, known as the Mandel estate, is the only large plot of land west of Gary in a single tract, that can be procured. On the north and east of this property is located the holdings of the Gary Land company; on the south is the city of Tolleston, where the lots have already been subdivided, and east of this estate is the corporate limits of East Chicago, where the tracts have also been divided.

This piece of property, therefore, is the logical site for this enormous industry, which will, if it is located here, cover several thousand acres of land. The tract is crossed by the Elgin, Joliet & Eastern railroad and the Calumet river, which in time is expected to be the connecting link of a chain of harbors.

Outlook Is Good.
The property, which is owned by the Boston syndicate, has for its local agents, the B. N. Branch Real Estate company, 70 Dearborn street, Chicago. This firm is the one which has been negotiating with the Westinghouse company and the reports which have been emanating from the office are to the effect that they believe the deal will be consummated.

The Westinghouse company is now located at East Pittsburgh and employs from ten to eighteen thousand men. Although several interested in the deal say that the proposed Gary plant is to be a western branch, others maintain that the main plant will be located in this city. If the latter is true, it is likely that there will be as many as ten thousand men employed in the works.

Biggest Thing Beside the Mills.
Those who have been directly interested in the deal have been reticent about giving out any information, but real estate dealers who own property in the vicinity have been watching the

progress closely, owing to the great boom their property will receive in case the plant is located. The prices of the land in the region about the Mandel tract will probably double the minute that the industry is made an assured thing.

This industry, if located in the region, will undoubtedly be the biggest thing outside of the Indiana Steel company. Being located in the city of Gary, on the western boundary, it will not only tend to make Gary a bigger and greater city, but will tend to cement the cities of Indiana Harbor, East Chicago, Whiting and Hammond into one big municipality.

WORK OF PAVING BROADWAY SHIFTED

Condition of Thoroughfare
Will Remain As It Is
Now Until Spring.

The work of paving Broadway by the Gary & Interurban company, which many people had thought was stopped, has shifted to the south end, where the company is now engaged in constructing the crossings at the street intersections the entire length of the street. The concrete is being put in at the present time so that when the brick arrives these crossings will be put in shape for traffic at the earliest possible time.

The paving of the street was inspected Monday by A. C. Miller, the president of the New York-Chicago Air Line company, and who is also an officer of the Gary & Interurban. Mr. Miller said that the work had not been stopped on this end of the line, but that he thought that it would be advisable to have the street crossings put in before the rest of the pavement is completed.

The company is now waiting for the brick to arrive so that the work, the first subdivision can be completed. It is not thought probable that the entire street will be paved this year, but that the brick will be put in as far as the Wabash. This means that the remainder of the street will remain in its present condition until spring. The brick is expected at any time and the paving will start at once.

The fenders for the cars which THE TIMES announced some time ago, have arrived and have been placed on the cars. The danger to traffic and pedestrians has been greatly mitigated thereby.

Deafness Cannot Be Cured.

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever. Nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by Catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free. F. J. CHENEY & CO., Toledo, O. Sold by druggists, 75c. Take Hall's Family Pills for constipation.

MILLER AND GARY TO GET NEW PARK

Legal Obstacle Only Will
Give Citizens Summer
Breathing Place.

LOCATION FOR PARK IS IDEAL

Miller Board Is Determined to Se-
cure Location While Able
To Do So.

(Special to THE TIMES.)

Miller, Ind., Nov. 19.—If no legal obstacle prevents, the citizens of Miller, and eventually Gary, will have a lake front park. Realizing that they are fast losing an opportunity to secure a breathing spot on the lake shore, the new Miller town board has resolved to take the necessary steps. It is proposed to condemn ten acres on each side of the road leading to the lake, between that body of water and the river.

Location Is Ideal.
The location for the proposed Miller park is ideal. This strip of land possesses great natural beauty, besides giving the public permanent access to the lake and to the Grand Calumet river, which at this place, is one of the most rich and rustic spots in the country. There has already been a street car franchise let on this road leading to the proposed park which has been sought by capitalists as a rich plum. They believe that in the course of time this will be the breathing spot of 200,000 people, residing in Gary and vicinity.

As far as the new Miller town board is concerned, it is determined to secure the property for the citizens of Miller and Gary. The drawback is that there is no clear title to the land, and the true owners are very much in doubt. The fishermen who have been occupying the property for the last fifty years are claiming squatter's rights, while there are capitalists in the east who claim to hold deeds to the land. The city, however, has the right of eminent domain and its attorney believes that it will be able to condemn the land and make the settlement to the proper persons.

One Stumbling Block.

Another stumbling block is the financial condition of the town of Miller, which at the present time is scarcely in a position to warrant the expenditure of the necessary amount of money. The value of the property is hard to estimate, although valuations have been from \$800 to \$3,000 an acre. If the latter valuation be established in court, it might prove an unsurmountable barrier.

In the past few weeks the people of Miller have become awakened to the importance of establishing a park in their city. They realize that it will tend to draw the public in that direction and that as a result Miller property will be boomed. They believe that Miller now has the opportunity which it cannot afford to lose, and the attitude of the board is popular.

GEORGE IS A REGULAR TERROR

Gary Lad Arms Himself
With Big Dirk and
Heavy Blackjack.

THEN STARTS FOR TOLEDO

Marshal Klopff Cops Him at Miller
and George Is Yanked
Home.

Another affliction by the fever of wanderlust yesterday caused George Sherman of Gary, 14 years old, son of Mr. and Mrs. Edward Phillips, to leave his home, 745 Maryland street, and start out to cross the country on foot. The trip ended at Miller, however, in the most humiliating manner, as Marshal Edward Klopff having been notified that the boy had run away, picked him up as he was strutting through the city bound for Toledo, Ohio.

Around the child, filled to the brim with braggadoocio, was a leather belt in which a large butcher knife was sheathed, and in his hip pocket was found a blackjack. George didn't mind the long walk to Miller and the prospect of not having any place to sleep that night, but how he did hate to be arrested with all of those implements of war on him. Mr. and Mrs. Phillips were notified and they went to Miller at once and brought their child back.

Second Trip in Two Months.

This is the second time within a few months that the Sherman boy has tried to run away from home. The first time the boy purchased an air rifle and with a handful of charges started to make the trip to Toledo, Ohio. He was intercepted at that time before he had made much headway. Yesterday he made the start at 8 o'clock and was caught at 3 o'clock in the afternoon. The objective point of the child's trip was Toledo, Ohio, where his grandmother resides.

"My grandmother gives me cookies and jam and lots of nice things to eat," said George, "and I wanted to go there and live with her. I knew mamma would not let me go, so I thought what I would run away. My mother and father always make me go to school and I don't like to go to school. I would rather run away than go to school another day."

When George was taken back home last night he promised to be good, however, and never to run away from home again. He was also glad to get back.

HAD NAUGHT TO DO WITH HETZLER HOTEL.

Crown Point, Ind., Nov. 19.—Stories have been circulated that the disappearance of Charles Bruhlitz started at the Hetzler boat pier on the north side of the lake, which is denied by Proprietor Hetzler. The boat in which Bruhlitz is supposed to have rowed away did not belong to the Hetzler's at all, and they are in nowise connected with the affair.

TO CONFER ON CHARITIES.

Fulton, Mo., Nov. 19.—Prison reformers, settlement workers, charitable visitors and heads of insane asylums, prisons, reformatories and the like have gathered here from all parts of the state to discuss their various work from the standpoint of the needs of the American community. The occasion of the gathering is the ninth annual meeting of the Missouri Conference of Charities and Correction, for which a program of unusual interest has been prepared.

Speakers at the initial session this evening will include Dr. Given Campbell of St. Louis, Warden M. W. Hall of the Missouri penitentiary and W. T.

Gross, assistant professor of sociology of the University of Missouri. The conference will continue in session over tomorrow.

COMING OF PRINCE TANG SHAO.

San Francisco, Cal., Nov. 19.—The steamship Mongolia due to arrive here tomorrow, has on board one of the most distinguished Chinese delegations that ever paid a visit to the United States. The party is headed by Prince Tang Shao, son of the emperor of China and heir to the throne. He is accompanied by Prince Tsai Fee, a suite of a dozen secretaries, as many attaches and numerous student and servants. Included in the suite are several Chinese gradu-

ates of the leading American colleges. The royal party will be received with unusual honors upon their arrival here and every courtesy will be extended them by the government officials. On the way east the visitors will stop at several points. At Washington they will be received by President Roosevelt.

Y. W. C. A. CONVENTION.

Atlanta, Ga., Nov. 19.—The fourth annual convention of the Young Women's Christian associations of the Gulf states began in this city today and will continue through the remainder of the week. Many delegates are here from various points in Alabama, Mississippi, Florida and Georgia.
