

Sausage

Sausage is the popular dish for cold weather and it is best with Cakes and Maple Syrup in the morning when the appetite must often be stimulated.

Most persons like Sausage, but many are afraid of it. But the Kunzman Sausage will be eaten by thousands in the Calumet District this winter on account of its known purity and delicious flavor. The price is low too—10c per pound.

FURNACES

Most persons are now making preparations for winter heat. It is a most important subject. In this connection it is proper and timely to call attention to this Furnace question. A good furnace is a great source of comfort, but it must be properly installed, otherwise it cannot be expected to do its work properly. Good Furnaces, in fact the best made and installed in a skillful manner, can be had of

Coal Value

Times have been hard and dollars look big, but Coal we must have. Few things are so necessary as fuel. In this connection it is well to realize that all Coal does not possess the same value. It fact some Coal is worth ten per cent more than other kinds that sell at the same price. But you can rely on the best value and good treatment by forming business relations with the

FACTORIES PRAY FOR ADMISSION

Gary Land Co. Has Applications from One Hundred Concerns Seeking Sites in This Region—Are an Industrial Barometer.

ALL INDEPENDENT OF STEEL CORPORATION

Is Best Assurance That Steel City Will Not Be Controlled By One Industry—Iron and Steel Belt Growing Each Day—100 New Industries Expected.

Is Gary to be a one-industry town? Judging by the number of applications for factory sites now being considered by the Gary Land company, a subsidiary corporation of the United States Steel company, it is not. It has been known recently that there have been over one hundred small factories which have made application for sites in the vicinity of Gary on property owned by the land company.

These, however, have not been made in the past month or so, but represent the number which at the present time would like to locate in the vicinity of Gary. The Gary Land company, with its thousands of acres, represents the largest number of tracts for industrial sites in the county, and the land which it owns is probably as desirable as any to be found.

An Industrial Barometer. The applications for land which they have received, therefore, is a good barometer of the industrial activity which is now sweeping over the country, and the figures as shown above are nothing short of astounding. Most of the applications are for property west of Gary, largely because of the fact that their largest holdings are in that direction.

At the present time the applications referred to are being considered and at the proper time this land will be disposed of to the most desirable companies. In considering the applications, however, it is taken for granted that those using the products of the Indiana Steel company will be given the preference. As far as that is concerned, however, the great majority of those making applications have done so for the reason that they can secure such products from the Indiana Steel company, thereby saving the cost of shipment.

Independent Concerns Want In. There is no question but what the manufacturers of steel and iron in their diversified forms will dominate in the industrial activity of the Calumet region, and that the Indiana Steel company will be the greatest of them all, but it is an important fact that independent industries desire to locate in this region and on the property of the Gary Land company, and that they will be admitted.

In the next ten years, if all of these 100 industries, or others which may be secured, have purchased their property and have erected plants, it will mean the employment of probably as many men as the concerns of the United States Steel corporation. The twenty-five square miles of territory within the limits of Gary and Tolleston, which will soon be a part of Gary, will be none too large to hold all of the plants and house the workmen.

Taking this fact into consideration, the prediction that in five years the cities of Hammond, Whiting, East Chicago and Indiana Harbor will be united, does not seem to be so much of an empty dream as an outsider would think without due consideration. Nine miles is a big territory for a populated district, but it now looks like it would be covered with manufacturing plants and houses in a remarkably short time.

MORE FLAT BUILDING

Joseph Goodman Has Plans for a \$15,000 Structure at Gary.

Joseph Goodman, owner of considerable property in Gary and who already has erected a fine business block at the corner of Seventh avenue and Massachusetts street, is about to construct a three-story flat building at the corner of Seventh avenue and Connecticut street. The plans have already been drawn and submitted to building commissioner William Kilver.

The work on the big building will start next week, as the excavating contract has been let and the contract for the building itself will be let this week. It is thought that it will cost about \$15,000. The building will be 50 by 47½ feet and will contain six flats. The material used will be wood with a brick veneer finish.

Mr. Goodman said today that he intended to have the work rushed to completion and under roof it possible before the severe weather sets in. Mr. Goodman is a resident of Chicago and proprietor of a tin and sheet metal factory. He is also the owner of the Goodman building, on Seventh avenue and Massachusetts street.

BEN SHIVELY FEELS MUCH ENCOURAGED

Ex-Congressman of South Bend Has Growing Boom For the Senatorship.

IS SURE OF THE THIRTEENTH

Tenth District Feels Favorable Toward Big Democrat—Gary Club Endorses Him.

"I have received letters from an unexpected source which give me great encouragement," said Benjamin F. Shively, Thursday, to a Times reporter at South Bend. Mr. Shively is one of leading candidates for the senatorship to succeed James A. Hemenway, and replied as above when asked as to the present status of the race.

The prominent South Bend man was all smiles when it came to discussing politics, and his demeanor indicated that he had something up his sleeve, while his countenance flashed out a "watch me spring it" smile. So thickly does the smoke of the Shively boom pervade the atmosphere at South Bend that before the Gary delegation of junketers had been engulfed in the drag-net of the boosters two hours, they found themselves passing an oral resolution, irrespective of party affiliations, endorsing the candidacy of northern Indiana's biggest democrat.

Sure of His Own District. Mr. Shively did not disclose what the purport of the letters were, other than that he would receive the support of certain sections of the state which was entirely unexpected. He feels that his prospects are brightening every day, which seems to be in accordance with the sentiment throughout the city. Although there has been considerable dissension among the party leaders at Elkhart, Mr. Shively is sure of carrying his own district, the thirteenth.

It is also believed that he will have with him the vote of the tenth district, although a candidate from that section has been announced. Attorney Johannes Kopelke of Crown Point. The first consideration of the democrats of this section of the state is to get a senatorship for northern Indiana, and the second is to land the plum for the favorite sons. It was with this spirit of seeing this section of the state land the senatorship that led the Gary Commercial club to endorse Shively.

Second Only to Kopelke. The South Bend attorney has many personal friends in both Hammond and Gary. He has always been very popular in Gary especially, as evidenced by the fact that he was chosen unanimously to make the principal address at the county and joint democratic convention held this year in the steel city. Those who met him at South Bend Wednesday for the first time and heard him talk at the Commercial club banquet were favorably impressed.

Mr. Shively is an able man and stands second only to Johannes Kopelke in the esteem of the voters of Lake county. If the Crown Point attorney cannot land the position, both republicans and democrats of this county would be glad to see Mr. Shively get it.

STEVE SHELICH KILLED

Unfortunate Employee of Inland Steel Plant Meets With Death.

(Special to THE TIMES.) Indiana Harbor, Ind., Nov. 28.—Another foreigner was added to the large list of those killed at the Inland Steel company's local plant in this year's list. Steve Shemlich, a foreigner residing at the Vozor boarding house on Decatur street, is the latest victim, and he will be buried in West Hammond tomorrow afternoon, following services at the Vozor house.

Shemlich is but 21 years of age, and so far as is known, has no relatives in this country. He began working for the Inland company a few months ago, pouring a plaster, crane hooker, his duties necessitating the placing of heavy iron chains about the huge metal formations. It was one of these that yesterday crushed the life from his body, breaking one of his lungs and injuring him so severely that he died about four hours after the accident occurred.

Dr. Teegarden was called and did all in his power to relieve the man's suffering, ordering him taken to St. Margaret's hospital in Hammond. Shemlich died about half an hour after reaching the hospital and was immediately brought back to this city in the Krebs & Burns ambulance. Coroner E. R. Gordon arrived from Hobart this afternoon and conducted his inquest, rendering a verdict of accidental death. It has been almost two months since the Inland mill has had any serious accidents and the death of Shemlich, who was well liked among his fellow workmen, came somewhat as a shock to the millmen.

PENNSYLVANIA WILL PAY IN CASH HENCEFORTH.

Beginning next month all employees of the Pennsylvania Railroad company will be paid in cash. Circulars have been sent out to all employees explaining the new system of paying in cash and final arrangements for effecting the change was made at Philadelphia last week. It is also reported that the Baltimore & Ohio will abandon its present plan of giving checks instead of cash. The officials claim that the expenses are much heavier than under the cash system.

PUP AND ITS PEDIGREE

East Chicago Solon Is Both-ered by a Momentous Dog Case.

(Special to THE TIMES.) East Chicago, Ind., Nov. 28.—It took the wisdom of a Solomon to decide a dog case in Judge William A. Reiland's court yesterday afternoon. The dog was one with a pedigree as long as that of a real, live English earl, and from the pup's appearance in the court room, was about as lively.

The canine originally belonged to Lawrence Scotnik, a foreigner in the south end of the city. Scotnik had a mate to the up, and made a present of it to a friend, Stanley Domkowski. Stanley, however, managed in some way to get possession of both dogs, and evidently preferred the one belonging to his friend Scotnik. He thereupon disposed of that presented to him, selling it for \$10, and for five weeks kept the stray hound from view. At least, so claims Scotnik, and it was only yesterday morning that he found out the deception that had been practiced upon him.

He then secured a writ of replevin and claimed damages amounting to \$20, by reason of the dog being missing at the time he was made an offer by a prospective purchaser. Domkowski claimed that he did not know who owned the dog. He then asked for \$8 to pay for the dog's food during its five weeks' absence. He was finally cornered, and acknowledged that he would like to have the dog and that he had done his best to keep it away from Scotnik. The evidence was adduced by Attorney Willis E. Roe, and Judge Reiland assessed damages of 1 cent and costs, at the same time giving Scotnik possession of the dog.

GARY TO HAVE A TEAM

Gary will have a basket-ball team this year which will represent the city, but owing to the fact that a suitable hall cannot be secured, they will have to schedule out of town games entirely. The team will work hard from now on until snow flies, working in the open air, until they feel that they have had enough practice to that they will be reasonably accurate in playing indoors.

The members of the team have all had more or less experience in playing the game and feel that as soon as they can get together and do a little team work, that they will be able to carry away a few scalps this year. The boys have been practicing regularly on the old tennis court in the open air, where the baskets have been erected.

The members of the team so far are: Forwards, W. Smith and F. Osborne; center, F. Rawley; guards, H. Gibson, E. Glenn; substitutes, F. Blittz, C. Dolemen. Manager Sam Sax will start to schedule games at once.

MUST GROPE THEIR WAY IN THE DARK

Lake Shore Rewards Gary Patronage with Niggardly Treatment.

NO LIGHTS AT THE STATION

Passengers Getting Off Late Train at Mercy of Hold-Up and in Danger of Life and Limb.

The people of Gary are becoming highly indignant over the conditions they are subjected to by the officials at the local station of the Lake Shore railroad.

Night after night the electric lights on their elevated platform and the stairway leading to the street are turned off and passengers who alight from the night trains from Chicago are compelled to grope their way through the darkness, sometimes narrowly averting injury in the rush which takes place.

On Thanksgiving night nearly 100 passengers got off the 9:25 train and the platform was in total darkness. Even the lights in the station had been turned off. In the rush to reach the street one woman, whose name is known, fell down the stairway and was slipped upon by several men who were unable to see. Matches were lighted and the woman, more or less bruised, was assisted to her feet and was taken to her home on Jefferson street.

Many Complaints Are Heard. The attention of the police has been called to the fact that the lights were turned out and Chief Martin has made an investigation, but he is powerless to act. When the train arrives at the station Chief Martin has two officers stationed at the platform to prevent pick-pockets and thieves from robbing the passengers, but owing to the darkness men of this character could work at will and the officers would be powerless to prevent them.

The Lake Shore railroad receives more patronage from Gary than any other railroad and the conditions at the local station they are subjected to seems to be the rankest kind of injustice in return. At least half a dozen complaints were received at this office during the last two days and there has been much talk about the conditions around town. The least that could be expected of the Lake Shore would be for them to keep the platform lighted at the arrival of each train.
