

A DAY IN GARY LAND

GARY TOLESTON AUTO COMPANY TO MOVE.

Norman Cole Will Locate His Garage in Gary and Add More New Machines to His Place.

Norman Cole, the owner of the Gary-Toleston Auto company whose headquarters heretofore have been in Toleston, has decided to move to Gary with his establishment and garage. The change will be made in the near future. In addition to the change that Mr. Cole has made in the location of his headquarters he has also taken the local agency for the Buick automobile. He has added six new machines to his establishment and expects to do a large business with the opening of spring.

FOREIGNERS GOING HOME FOR THE HOLIDAYS.

International Exchange Says That Outgoing Transportation Business Is on the Increase.

Many foreigners from Gary, Indiana Harbor and East Chicago are leaving for the old country at the present time. A report from the International exchange says that during the past two weeks the sale of tickets for the old country has been large. The pilgrimage is an annual holiday affair and the exodus at the present time is larger than usual.

GARY-TOLESTON AUTO COMPANY TO MOVE.

The Inland Steel company of Indiana Harbor yesterday awarded the contract for the building of the new private hospital for the plant to Ingwald Moe, the Gary contractor.

The price for the one-story building has not yet been fixed, as the Inland Steel company is in a position to furnish much of the material. The work on the building is expected to begin within a few days.

BAKERY GOODS SPILLED OVER RAILROAD TRACKS.

The bakery wagon belonging to Max Hirsch of the Toleston Bakery company was upset this morning in Gary as it was crossing the interurban between Sixth and Seventh avenues. The driver escaped without injury, having suffered nothing more than the spilling of a cream puff across his face. While the goods were spilled all around the wagon they were not injured with the exception of a few dents here and there some of the bones.

ONE ON THE SIDE.

The Gary nephew was showing his rural uncle all the wonders of the new steel city.

"Well, Uncle Rufus, what do you think of the town anyway?" said the Gary lad, looking up into the face of his long, lean, lank, bewiskered uncle.

"Wonderful city, my boy," said Uncle Ruf, "but it is a little too fast for me. Where are you going to take me now?"

"Going up to the lightning picture studio and have your picture taken," responded the young man.

"And what then?"

"Why, then we will go over to the lightning shoe shining parlor and get a lightning shine and if you want to we can go across the street and get a lightning shave."

"See—and then—"

"Why then we will go over to the restaurant and get one of those quick lunches and—"

"I reckon that will be a little too swift for your Uncle Ruf," said the old man as he took a firmer hold on the little yellow satchel. "If you have no objection I think I will take the lightning express for home."

TOLESTON.

Mrs. August Rump and Miss Mattie Lederer were Gary visitors Wednesday.

Mrs. Herman Necker is visiting with her sister in Chicago for a few days.

The little daughter, Mabel, of Otto Ebert is on the sick list.

Miss Gustie Ebert, who has been very sick with typhoid fever, is improving rapidly.

Hurrah for the first "factory"! Mr. Rogers of Laporte is erecting an ice cream factory on Borman boulevard. This is our first industry.

Mr. Frankel and Mr. Roy from Chicago were in town today looking after real estate interests.

Dr. Frank M. Michael has located in Toleston. He has rented suite C of the Borman block. Dr. M. Michael's former home was Plainville, Mich.

Rev. and Mrs. Rump were among the Chicago shoppers today.

FOR SALE—Solid oak removable shelving. Reasonable terms. Apply Sax & Savage, Gary, Ind.

REMOVAL NOTICE

The Gasoline Electric Light & Supply Co. have removed from 2129 Broadway to 1075 WASHINGTON STREET between 11th Avenue and Michigan Central R. R.

V. H. ELDERKIN, Mgr.

Opening Gary Shaving Parlor

First Class Barber Shop

With fine Billiard Room and First Class Line of Cigars and Tobacco. Full Attention to each Customer. Tel. 206 918 Broadway

HEARD BY RUBE.

A good many of the foreigners in Gary think they have enough money and are leaving bag and baggage for the old country.

It would be well for now on for people who have to expectorate to either carry their own cuspidor or walk near the edge of the sidewalk.

Skeptical citizens in Gary hardly believe that the Broadway pavement will be finished before Decoration day next year.

Socially speaking—are you able to attend all the doings.

If Rip Van Winkle ever takes a notion to take a twenty years' nap in Gary he had better locate his bed in the vicinity of Griffith or he would be in danger of being covered up with a ten-story building.

The next thing the steel company will be doing will be manufacturing their own smoking tobacco.

And K. Benjamin Klein has not seen the last of Officer Gus Newman. A stitch in time often saves the greater part of a bank account. There are one or two other people whom Benj has not seen the last of either.

Why don't some enterprising person in Gary go over to Pine Station and get a corner on the Christmas tree market.

The "burning love" we read about. To some may seem quite funny. But the love we fear, Xmas near is the kind that burns our money.

If you have got to slip on the icy sidewalks you might as well cultivate the art of doing it gracefully.

And now to cap the climax eggs are now selling at 3 cents apiece. There is one consolation in the fact that we can go back to pork and—

There are some women in Gary whose idea of a pretty hat is one costs lots of money, regardless of the cost.

Up to the time of going to press there had been no counterfeit \$15 bills been left at this office.

GARY BRIEFS.

Mrs. Sam Sax and a party of friends visited at the home of Mrs. Sax's mother in South Chicago last night.

H. A. Vossler, the real estate man, was in Chicago on business yesterday.

The Lyric Athletic club are attempting to arrange of a game with the Baptist Athletic League of Hammond, the game to be played in the Hammond gymnasium. They want to get a game for this week. The boys have had all the experience in the game, but have had no place to practice and feel the need of it.

The R. & S. for largest display of Christmas goods, Fifth avenue.

The bazaar given by the ladies of the Congregational church in the basement of the Hall building and the rummage sale given by the ladies of the Episcopal church begins today both are given for the benefit of the churches.

A theater party composed of Mr. and Mrs. J. Fox, Miss Millie Leonard and Mr. Will Dunn saw the "Music Master" in Chicago last evening.

Shoe Sale on now. See the R. & S. Co.

The Broadway theater has thoroughly redecorated and renovated and now presents a very pleasing appearance.

Attorney A. F. Knotts of Hammond transacted business in Gary yesterday.

Beginning next Saturday the young ladies employed in the steel company's offices will be given a half day holiday Saturday afternoon in order to allow them to do their Xmas shopping.

Mayor Thomas E. Knotts went to Chicago yesterday on important business.

A. Vossler is in Chicago on a business matter today.

Town Clerk A. Oliver Holmes was in Chicago on business yesterday.

Miss Ziddell Barker of Gary went to Chicago on Wednesday evening to attend the wedding of her cousin.

Attorney John O. Bowers of Hammond was here yesterday looking after his Gary interests.

Mrs. D. E. E. Giesel was the guest of Dr. and Mrs. Robert Krost in Chicago yesterday.

Cut prices on Rubber Ware at the R. & S. Co., Fifth avenue.

A dancing party will be given at the Binzenhof hall tonight by the young men of the steel company. It is an invitational affair, and a large number have been invited.

At the meeting of the Modern Woodmen next Saturday night at the I. O. O. F. hall the election of officers will take place.

Mrs. Sam Sax was the guest of Chicago friends yesterday.

The Ladies' Aid society of the Christian church were entertained yesterday afternoon at the home of Mrs. Harry Stringfellow.

J. M. Russell of Milwaukee, Wis., was in Gary yesterday with the view of making real estate investments.

NOTICE.

The election of trustees of Helm Encampment No. 356, I. O. O. F., for the year of 1908 will take place on Dec. 15, 1908, at Odd Fellows' hall, Gary.

Some Good Out of It.

An old bachelor says that one good thing will happen when women are permitted to vote, and that will be that voters will not be required to state their age. They will simply say they are over 21 and old enough to vote, and that will be considered sufficient under the law.

CLEAN THE SIDEWALKS

Snow May Cause Gary Damage Suit This Coming Winter.

One of the earliest ordinances that the people of Gary are demanding at this time is one to compel the property owners to clean their sidewalks from the snow. Incidentally such an ordinance, it is argued, would also protect the city against damage suits.

Of course, up to the present time, the snowfall has been very light, but later on when the heavier snows are left to accumulate on the sidewalks, making them slippery and dangerous some action ought to be taken by the town authorities to compel the owners to keep the walks clear.

At the time the last snow fell it was not cleared off by some of the business men on Broadway, and as a consequence there are sections of the walk that by constant slipping and falling are likely to occur at any time. It would be well if the board took up this matter at its next regular meeting.

The character of the lake water will shortly be subjected to a greater degree than at present by the opening of a canal water way which will connect Lake George and the Calumet river with the Lake at Indiana Harbor.

Water works intakes in some instances have been placed with the idea that the lake current would act as a protection to their water supply. This is a pronounced fallacy by Major W. V. Judson, Corps of Engineers of the war department, who has found no positive currents in Lake Michigan.

The bottom of the Grand Calumet river is heavy clay but because of the continual deposition of organic matter and silt coming from the sewer outlets it is a mass of ooze its entire length.

The chief local sources of the pollution of the water of Lake Michigan, in the vicinity of Lake county, are:

1. The discharge of the Calumet river and its water at Indiana Harbor into the lake.

2. The discharge of local sewers into the lake.

3. The shore wash and the stirrings-up of the bottom of the lake by winds and currents.

4. The dumping of dredged material, boats, sailing vessels and other shipping.

The Calumet river is in reality an open trunk sewer running through the cities of Hammond and East Chicago. In some places, notably at the distillery at Hammond, the column of ob-

noxious, decomposing organic matter is very great and becomes a public nuisance.

The fact that this stream of sewage flows directly through the city of Hammond renders life along its banks unpleasant, and even dangerous.

The most important, most damaging of these sewers is that at the Glucose works. The average daily discharge is about 2,300,000 gallons. The sewage is in the form of wash and steep waters used in the preparation of grain and in the process of manufacture. It contains large quantities of the nitrogenous principles of the corn and other ingredients which evidently form an excellent culture media upon which bacteria live and multiply. The waste water also deposits large amounts of the huck corn for some distance around the mouth of the outlet. This organic material in a decomposing and putrefying condition is found in quantities in front of the Hammond pumping station. The odor of putrefaction emanating from this sewer is noticeable for a considerable distance and at times with northerly winds, passengers on trains passing through Robertsdale are made sick. The citizens of Hammond are being served with a nitrogenous broth under the disguise of drinking water.

The private six-foot sewer of the Standard Oil company, which discharges about 18,000,000 gallons daily into the lake, has an especially damaging influence upon the water supply of Whiting. As has already been shown, there are time when four-fifths of the water supply of the city is composed of this sewage.

The water supply of Indiana Harbor and East Chicago is of much better quality than that of either Whiting or Hammond, but it is for from being of the desired quality, and it is affected by the harbor affluent of the Inland Steel company's plant.

The whole territory covered in this investigation is polluted most of the time.

After a careful analysis of all the data collected during this survey, it becomes readily apparent that the water supplies of Indiana Harbor, East Chicago, Whiting and Hammond, as at present taken from the lake, are absolutely of no value from a sanitary standpoint and that they are not safe for drinking at any time of the year.

The study of the distribution of the sewage also shows conclusively that it will be of no value to extend the intake farther into the lake until the present sources of pollution are permanently removed.

No single municipality can hope adequately to handle the situation. The problem of the purified and permanent potable Lake Michigan can only be solved by the concerted efforts of every city on the southern shore, aided by the joint action of the states of Illinois and Indiana. To this end legislation authorizing the establishment of a sanitary district is advisable and is suggested as the first step toward the betterment of civic sanitary conditions of Lake county.

Commission Makes Report

Cities Along Lake Michigan Will Look After Their Most Valuable Asset—Pure Water

(From State Chemist's Report.)

Is it not strange that, in this country, at least, the development of our natural resources, the building of cities, the creation of great industries, has always meant destruction of the natural purity of lakes, streams and underground water?

The cities along Lake Michigan are awakening to the fact that their most valuable civic asset, a pure water supply, is in great danger of being destroyed, and that already they have sacrificed hundreds of lives on the altar of ignorance and carelessness, and wasted at the sick bed and cemetery far greater resources that would have preserved their water supply in its pristine purity.

For instance, it is claimed by the city board of health of Hammond that that city with its 24,000 population had this year half as many cases of typhoid fever as the whole city of Chicago, with a population one hundred times as great.

Statistics furnished by the board of health show that the typhoid death rate of Hammond for the years 1903 to 1907, inclusive, has reached a maximum of 140 per 100,000, and a minimum of 60, the average being 84.6 per 100,000 population. The city of Whiting has an average death rate of 47.8 and East Chicago 48 per 100,000 from typhoid.

It has been accepted as a general rule that a continued typhoid death rate above 20 is an indication that something is at fault with the public water supply.

The character of the lake water will shortly be subjected to a greater degree than at present by the opening of a canal water way which will connect Lake George and the Calumet river with the Lake at Indiana Harbor.

Water works intakes in some instances have been placed with the idea that the lake current would act as a protection to their water supply. This is a pronounced fallacy by Major W. V. Judson, Corps of Engineers of the war department, who has found no positive currents in Lake Michigan.
