### PREDICTS AIR SERVICE IN THREE YEARS

Head of New York Aircraft  
Concern Prophecies Won-  
derful Attainment

EARL C. REEVE  
STAFF CORRESPONDENT, N. Y. SERVICE  
LONDON, Aug. 13.—There will be a trans-Atlantic airplane service with one stop at the Azores within three years and the trip will be made in forty-eight hours from England. This prediction was made today by F. G. Diffin, president of United Aircraft Engineering Corporation of New York, just before he left for home on the Baltic today.

Mr. Diffin has been in conference here for three weeks with British aircraft manufacturers placing orders for 800 aero engines and 100 planes which will be used in the developed aerial trunk lines in the United States. The first of these trunk lines between New York and Chicago will be used for merchandise and is expected to be in operation within a year. Mr. Diffin said that no thought would be given to passenger traffic until the freight lines was established and in running order.

Radiating from the New York-Chicago trunk line will be branch lines warranting service to all parts of the country. Mr. Diffin expressed the opinion that Great Britain is leading in air development, adding "We have arranged to manufacture one of the best British engines in America that the war has produced. Now we must strike out for commercial plane development. I am positive planes capable of flying 200 miles an hour at 2,000 feet will be available for trans-Atlantic use, thus enabling pilots to take advantage of the air currents going and coming."

### LADY'S HOUSE DRESS.

The surprise style of waist always gives one a very trim appearance, so it is especially suitable for a house dress. This design No. 9393 is smart enough for street wear. The fronts extend into sash ends which tie at the back. The sleeves may be in long or short length. The two-piece skirt closes at the left side and is gathered at the regulation waistline.

The lady's house dress No. 9393 is cut in sizes 34 to 44 bust. Width at lower edge is 1 1/4 yards. The 30-inch size requires 4 1/4 yards 36-inch material, with 1/2 yard 30-inch contrasting and 4 yards binding. Price, 10 cents.

### FOOLING WITH HEALTH SERIOUS

I have frequently asked druggists, "What do you push in a blood medicine?" The answer usually came, "The kind I can make the most money on." My answer has always been, "Not me." I have succeeded pretty well and I have always recommended the one that I had found by experience to be the best and the one I would be willing to take myself or give to members of my own family. I have never offered the public a medicine that we do not use at home. This is why I can offer "Number 40 For The Blood," with a clear conscience; we have not only tried it on thousands of others, but on ourselves. We take it in all cases where a blood medicine is needed no matter in what form it shows itself and we get splendid results in constipation, kidney, stomach and liver troubles. I firmly believe if every one would begin in the spring and take "Number 40" they would escape malaria and fevers in all forms. J. C. Mendenhall, 49 years a druggist, Evansville, Ind.
