"Boys will be boys" is an old maxim, but it goes without saying that there may be drawn a close and sharp contrast between the wholesome frolic of some boys and the downright rowdiness practiced by others. A complaint has come in from the neighborhood of North 14th, near Northcote and Haring avenu, that nightly there is a gang of boys from the ages of nine to eleven who are permitted to stroll about the streets until a very late hour, causing much annoyance to people who retire early. Last evening their pranks consisted of tying milk bottles to porches and setting them swinging, making a loud clattering which awakened the household where the deeds were perpetrated. The knowledge of the mischief of these boys is apparently not known to their parents, but the very fact that they are out way after hours should be sufficient for their parents to have them confined to safer quarters than the streets at unreasonable hours.

Mrs. G. Szilagay, who was so badly burned in her attempt to heat some varnish over a flame on the stove a few days ago in her home adjacent to the U. S. Metals Refractories, where her husband is employed, is lying comfortably at St. Margaret's hospital swathed in bandages. That she will live is the report given out about her condition yesterday, but her confinement to the hospital will be at least for two or three months. The quick aid rendered her by the employees of the plant at the time the accident happened lessened the great danger which could have menaced
