

LAKE GIVES UP VICTIM

While Searchers Were at Work in Lake, Waves Bring Body Ashore.

While searchers were diligently dragging the lake 300 feet from shore at Miller Beach for the body of Howard B. Schreyer, the Gary laundry driver who braved death and the high waves and was drowned Sunday afternoon, it floated ashore yesterday noon.

At first it was believed that the body was confined in the depth between two sand bars and the search was instituted several hundred yards out in the lake where Schreyer went to his death. The lake has been very rough for several days and it is quit evident that the strong under-current brought the body into shore.

The body was first seen by fourteen-year-old Alvin Baldwin, 2808 E. Seventy-ninth st., Chicago, floating shoreward and called for assistance. The remains were brought to Williams' morgue in Gary and prepared for burial.

Yesterday evening the Rev. Tomes, of the Christian church, conducted simple services at the chapel at 8 o'clock. Accompanied by Thomas Fenton, head of the Hamilton-Corbin Clothing & Dyeing Co., of Cincinnati, a cousin of the young man, the body was taken to Crown Point, from where it was shipped over the Pennsylvania to Cincinnati.

TO PLAN FOR GARY MEMORIAL

Action of Memorial Committee to be Decided by Sentiment of Citizens.

Public sentiment will guide the memorial committee in their decision, for a fitting memorial for the fallen and returned heroes, which is to be erected in Gary in the future. This was the decision reached by the committee in a conference with Mayor Hodges.

No definite steps were taken at the meeting as it was recommended to first get the sentiment of the residents of the city and see what kind of a memorial would be the most fitting as well as popular.

It was also recommended that the sentiment of the returned soldiers be accepted and with so many Gary residents also being in favor of a memorial building as the most fitting tribute, it is probable that the voice of the people will be for a building of that sort. At the meeting Dr. Simon J. Young was named temporary chairman and Mrs. O. C. Wick temporary secretary. The next report of the committee is expected to be given to the council about October 8.

Careless Shampooing Spoils the Hair

Soap should be used very carefully, if you want to keep your hair looking its best. Most soaps and prepared shampoos contain too much alkali. This dries the scalp, makes the hair brittle, and ruins it.

The best thing for steady use is Mulsified coconut oil shampoo which is pure and greaseless, and is better than anything else you can use.

One or two teaspoonfuls will cleanse the hair and scalp thoroughly. Simply moisten the hair with water and rub it in. It makes an abundance of rich, creamy lather, which rinses out easily, removing every particle of dust, dirt, dandruff and excessive oil. The hair dries quickly and evenly, and it leaves the scalp soft, and the hair fine and silky, bright, lustrous, fluffy and easy to manage.

You can get Mulsified coconut oil shampoo at any pharmacy. It's very cheap, and a few ounces will supply every member of the family for months.—Adv.

In the list are a large number of returned soldiers who applied for first papers two years ago while in camp.

VOICE OF THE PEOPLE

OFFERS A NEW PLAN.

To Editor Times: The street car situation has now become a serious matter, not only to the business men but to the industries of the entire Calumet district. But why put all the blame on the councilmen. They are the chosen representatives of all the people and no doubt would be willing to meet the street car company half way but it looks to the man in the street as though the street car company were not willing to accept a compromise.

Hammond is an old city and has nothing but an interurban street car service. I understand the street car company says they cannot operate with the increase of pay to their employees under a 1c fare. This may be true but in order to verify this matter I would suggest the city grant them the privilege to charge 1c for 30 or 60 days and put a man on each car to check up the fares and at the expiration of that time it will be proven whether or not the service cannot be maintained for less and then allow them to continue at that rate providing that they give the public 10 min service with a city line forming a belt line over Hohman by way of Hoffman, Calumet and over the new line but why sell the city's "birthright" for a mess of pottage.

The committee called to ask that arrangements be made for a conference between them and officials of the Steel Corporation on their wage demands.

Later Judge Gary made the following statement:

"When informed by my secretary that a committee of a labor organization, consisting of John Fitzpatrick, William Z. Foster and D. J. Davis, had requested to see me, I sent word to them through my secretary that I did not care to have a personal interview, but if they had any statement to make and would reduce the same to a written letter it would be received and considered by our officials, who would then determine what, if any, answer to make. Nothing further has passed between us."

be withdrawn tomorrow and there was likelihood that all of the troops would be called away by September 1, but the story grew because a number of men had been called home by death, sickness and stork visits.

With everything quiet at the plant and no prospects of trouble in sight there is some dissatisfaction on the part of the soldiers in having to remain in Hammond doing duty which they believe the local police and deputy sheriffs could handle.

Workers congregated in large groups yesterday evening around the posters which the company had tacked in conspicuous places in the announcements of the company set forth its position and practically declared that further attempts at mediation were useless. The wage scales and working conditions in effect July 18 would continue to be observed at the plant and all grievances must be reported to the proper officials through channels provided by the company.

This meant that the wage increase offered August 18 to the laborers had been withdrawn as its offer had been made with the provision that the men return to work before August 25. The men had little to say. Each day as they have been hopes have dwindled they have been lead by some new report of a conference or a mediator who was going to get them something to believe that they might yet win the strike. AUDITOR NOTIFIED BY LETTER

(Continued from page one)

Indiana millions of dollars above the figures of the local taxing officials were issued yesterday by the state board of tax commissioners.

The action of the state board is taken under the new tax law which provides for the assessment of property tax at its full cash value. The law also provides that the taxes shall be reduced as the valuations are increased so that the taxpayer may not be overburdened. The report of the state board has been awaited anxiously by local officials who desired to get their figures on valuation and their corresponding new levies.

An increase of 100 per cent on one class of taxables in one taxing unit in Lake county was ordered. Good-sized increases were ordered also for Vigo county, St. Joseph county, Allen, Cass and especially Vanderburgh counties came in also for increase of good proportions.

The state board has under consideration the equalizing of approximately 2,000 corporation assessments fixed originally by county boards of review. These will be disposed of this week.

The order today came as the result of the third or qualifying session of the state tax board. At this session the body attempts to harmonize tax assessments among counties, parts of counties, among classes of property and the like so that taxation in the state may be on an equal basis as possible.

As a matter of fact the purpose in enacting the new tax law was to bring about an equalization in assessments. Under the old law there had been glaring examples of injustice in the apportionment of property for taxation.

TO THEORY OF LAW.

The board already has fixed assessments for all property under its original jurisdiction. It has adhered closely to the theory of the new state tax law that property should be assessed at 100 per cent, or at its true value.

In the hope of applying thoroughly the new law to a situation that had become deplorable in Indiana, the state board assessed such property under its original jurisdiction with the new standard in mind hoping to arrive at a low tax rate by making true valuations.

County officials in many localities did not apply the new law as thoroughly as did the state board and it became a case of raising the low assessments in the counties by direct order.
