

**MAY GET GLIMPSE OF AIR LINER**  
26 Passenger Aircraft May Sail Along the Lake Shore.

Residents of Gary, Whiting and other cities along the aerial mail route will catch their first glimpse of the giant Lawson 26-passenger carrying air liner, which, providing possible weather disturbances, may start on its trip from Chicago to Milwaukee to New York.

It will take the same course over Gary as the daily mail plane does and unless there is some trouble, will not attempt to make a landing here. Its arrival over Gary may be seen at most any hour today or tomorrow and if the weather does not permit will not leave until Monday.

A. W. Lawson, inventor of the ship, notified the crew in Chicago yesterday that everything is in readiness for today, but the weather man informed him that thunder squalls are predicted for northern Indiana today and advised the flight be postponed until more reassuring reports were received.

Because the plane chosen as one of the landing places for the huge craft, when the company commences their trans-continental passenger service, considerable interest has been shown in the ship's passage over the city. At a request of the Milwaukee concern, city officials secured a landing site for them south of the city on Broadway several weeks ago. One hundred other planes of like caliber are to be built.

The air liner will follow the aerial mail route over Gary until it crosses the Maumee river and then follow the river to Toledo. There Willard at Dempsey fought their historic battle. From Toledo the aircraft will go to Albany and then follow the tracks of the New York Central to New York. After its arrival, a return trip will be made in several days.

**GARY GETS LAKE FRONT PARK NOW**

**Steel Co. Finally Decides to Give the City a Park Along Beach.**

Gary was made a present yesterday of a stretch of land along the lake front at Miller beach, covering approximately 15½ acres of valuable land. The estimated value is about \$500,000.

The presentation came as a complete surprise. W. P. Gleason, president of the Gary Park Board, announced that the United States Steel Company had decided to make the gift of the strip of land to the city, to be utilized for park purposes.

The news became public at a special joint meeting of the park board, city officials and a number of councilmen yesterday. It was the result of great rejoicing as the donation is a lake side tract long sought after by the city for park purposes. An effort has been made to secure the tract for the past twelve years. Such a high price was placed on it that the park board turned the project down.

The tract is located just outside of the Tenth ward and includes what is now known as Miller beach and with some adjoining acreage it now gives the city nearly a mile of lake frontage for park purposes. Through the gift it was learned that the steel corporation has been working for some time to close the deal in their effort to furnish Gary with a lake side recreational park. It is a long-felt want.

Following its presentation, fitting speeches were heard in behalf of the mayor and city officials thanking the steel corporation for their donation. W. P. Gleason also made a number of interesting remarks on the future of the park, stating that the city ought to endeavor to have a street car line operating out to the beach by next summer. Also that a much needed modern bath house must be erected, instead of the tumble-down shack which now graces the shore of Miller beach. Other needed improvements were spoken of.

**Boy Scout Column**

Camp is over—"Some Camp." This is the universal verdict. Not a single grumbler. Gee, fellows, do you know that the 113 regulars passed over 350 scout tests and merit badges? This is a record that we are all proud of.

And then that last camp—when they came back all were at least second class and all had passed swimming except three. Bergeron made his 50 yards about an hour before train time.

There are 37 scouts on the honor list. These are the boys who passed four or more tests at the camp. A big advancement sheet showing their record has been taken to the Executive's camp by Mr. Ferris as part of the Hammond exhibit which also includes all the pictures taken at the camp.

**EXECUTIVE HARRIS TO MICHIGAN.**  
Scout Executive Harris left Saturday for Camp Keweenaw, near Benton, Michigan where he will spend the next eight days in intensive study of Scout problems. The Local Council decided to send Mr. Harris at their expense, as the work at Keweenaw will make him a more valuable Executive.

**WORKING FOR W. HAMMOND MEMORIAL.**  
Nearly 100 citizens of West Hammond were present at the meeting which was held at Columbia hall on Friday evening, in the interest of the new park and building which the city plans as a memorial to the soldiers.

sailors and marines of the great war. Music was furnished by the Twentieth Century Trio, of Blue Island. The entertainers brought with them a five year old lad who astonished the audience by rendering the popular favorites. West Hammond is practically a unit for the project. The large committee which was appointed to handle the matter has been able to personally see hundreds of citizens. The meeting Friday night was to explain the proposition still further in order that all will know what they are voting on when the election is held on September 10.

The election has been called for the people to decide whether bonds for \$10,000 shall be issued to finance the matter.

It is thought this amount will be amply sufficient to purchase the site, make park improvements, lay out recreation grounds and put up the first part of the building. The memorial building will be patterned after the Chicago community centers and will be arranged so that conditions can be made later.

A parade of the school children of the city will be held Sunday, September 7, as a reminder of the election which will be three days later. It is possible that another public meeting will also be called before then.

**CONNECTIONS SHOULD BE TIGHT.**

"One of the commonest causes of undercharged batteries," says Mr. Durham, Willard Service Station dealer, "is loose or dirty connections."

"It is a good scheme to go over the wiring every once in a while, particularly between generator and battery. If there is a loose connection anywhere along the line it hinders the flow of current and will in time starve the battery."

"When it is found that a connector is loose at the battery, the best plan is to take out the bolt that holds it in place, take off the cable, rub both of the contact surfaces with sandpaper, bolt the two parts tightly together and finally coat all the exposed lead parts with a thin film of vasoline. You will then corrosion that would otherwise result if you have a good tight joint and at the same time will provide protection against the any acid happened to spill on the lead."

**NORTH SIDE LOTS FOR \$198 SUNDAY**

Frank Wachewicz, Hammond's premier home builder, has sprung another sensation. Not satisfied with building the equivalent of a small town this summer and selling the houses on easy terms, he is now about to throw sixty-one choice lots on the market at the astounding price of \$198 each.

Mr. Wachewicz recently purchased two city blocks on the north side at a reasonable figure. This plot lies between Adams and Winslow and Cameron and Towle streets. It is the South Shore Interurban, has a school and church just south of it and is within four blocks of the new car wheel plant and the holdings of the Schlesinger Steel Co., Sheffield avenue, is two blocks west of it. Calumet boulevard is four blocks east and it is only fifteen minutes walk from the business district of the city.

Ten years ago when lot sales were held in this part of Hammond, people paid \$300 for them good investments, but the great development of the North Side as a home and industrial district makes this new offer at an even lower price, a bargain unparalleled.

Not a lot will be sold before one o'clock Sunday, Mr. Wachewicz, Mr. Nowicki and Mr. Lamorn, members of the firm, will be assisted by at least four other salesmen. Half a dozen autos will be waiting at the office, at Plummer and Oakley avenues, at 12:30 o'clock to take those out who care to ride.

A big red tent has been erected on the grounds and a flag pole so that the place can easily be located. All lots have been staked off. Mr. Wachewicz is prepared to furnish a warranty deed and certified abstract of title to each purchaser.

He also has an option on another block in the same territory and is planning to build a number of houses on these lots and some which he will retain in the territory offered tomorrow. This alone should double the value of the first 61 lots.

A band has been hired to furnish the music on the grounds all afternoon.

**GARY WILL CELEBRATE LABOR DAY**

Favoring a nice day Gary will play host to thousands of visitors on Monday, Labor Day, when plans have been made for the biggest celebration in its history.

The monster parade alone will draw visitors from all over the county. The parade will start the program at 10 o'clock in the morning. It will start at its formation point at 22nd and Broadway and will disband at the East Side park where speakers of note will address the workers.

Every local in the city will turn out en masse for the parade and the labor demonstration, headed by Perry's band, will be the largest ever attempted in the northern part of the state. Five thousand marchers are expected to take part.

In the afternoon Gleason park will be the scene of the Gary work's sixth annual Labor Day celebration. It will be conducted under the auspices of the Gary works athletic association and according to the big program it will surpass any celebration of its kind ever attempted in this city.

Besides the athletic track program, the committee will offer something unusual attractive in the vaudeville world that will keep the eyes on the alert every minute of the afternoon. A four ring circus won't have anything on it.

George M. Pinneo, physical director of the Gary Y. M. C. A., has been officially chosen to act in the capacity of referee in the athletic events.
