NOTICE TO SUBSCRIBERS.

If you fail to receive your copy of THE TIMES as promptly as you have in the past, please do not think it has been lost or was not sent on time. Remember that the mail service is not what it used to be and that complaints are general from many sources about the train and mail service. THE TIMES has increased its mailing equipment and is striving earnestly to reach its patrons on time. Be prompt in advising us when you do not get your paper and we will act promptly.

INJURY DUE TO DELAY.
The railroad act became a law on February 28th. It authorized the president to appoint a Labor Board to deal with just such controversies between employers and employees as have precipitated the strike. But the sick man in the White House has let the matter drift and his physicians have refrained from pressing upon him the necessity for prompt action. The delay finds the country in the throes of a labor upheaval in our transportation systems that threatens to bring death and starvation to thousands. Too late to avert the disaster, Mr. Wilson appoints the Labor Board. Had he followed the mandate of the republican congress and provided the means for meeting such emergencies as now confront us, there would be machinery at hand to effect a peaceful settlement with no interruption in traffic.

GARY AND AKRON.
The name of Akron has been more than a name for ten years. It has been synonymous with teeming, breathless growth; with crowding, speculation, dizzy business adventure. It has meant the straining of the rubber tire makers to keep up with the demands of the people for work and play cars. Akron, poorly located originally, a town of no importance, has been turning into a wonder city under the pressure of the tire trade. The census gives it a population of 208,435, an increase since 1910 of 201.8 per cent.

Before the fame of Akron was the fame of Gary. People all over the United States began to talk about Gary about ten years ago when the plans of the Steel corporation began to unfold. Everybody has heard others say, if they have not said it themselves, that Pittsburgh had seen her day as the center of the iron and steel industry, the workshop of the world, and that Gary was to take her place. So everybody is more or less interested in Gary's population. The census gives it as 55,344, an increase of 294.4 per cent.

Both Akron and Gary are potentially larger than denoted by those figures. Both have families waiting to go in as soon as shelter is built. Both employ workmen who ride many miles every day to and from their jobs because they cannot find homes. As the families which belong in Gary and Akron find homes the cities will reach the size guessed and expected by fond and loyal citizens, who guessed too high, as they do everywhere.

Gary and Akron present different problems. Gary was a selected industrial location, while the congestion of the rubber business in Akron was the result of an accident. But both have done wonders in ten years and are exhibits in energy which students of American affairs would do well to visit, according to the South Bend Tribune.

LABOR NOT ALL TO BLAME.
No, not all the unrest in the country is due to labor. On the contrary, much of the unrest is due to the conscienceless exactions of the big and little influences which keep pushing prices higher and higher every month without regard to actual costs or values in the effort to get while the getting is good. Every man who wants to be honest is willing to admit that so-called big business is not the only big sinner in this matter. The trouble is nearly everybody's doing it.

THE PART HOUSING PLAYS.
Housing, proper housing, plays a far greater part in labor contentment, in health, in production and in general welfare than is appreciated.

Manufacturers who are wise know that clean, sanitary, cheerful shops make for a good workman and good workmanship. It is the boast of one company that its shop is more attractive and more pleasant than any home in which its workers live. It boasts, too, that its example of a cheerful shop has led to more cheerful homes.

One of the big steel companies went through the recent great steel strike period in the steel industry without one of its force leaving its plants or without threat of strike. The men employed by that company have model homes built by the company and rented or sold on a fair and honest basis.

The head of that company employs perhaps 10,000 men and has 23 nationalities represented in his works. He pays more attention to the human elements, to housing, welfare, protective lines, recreation, helpfulness and man building than to steel making.

He can employ experts to look after the manufacturing end of his business, and he does. He has prospered greatly, says the Nation's Business.

A LARGE PERCENTAGE.
Why is it that 75 per cent of the petty thefts committed in Hammond is pulled off by West Hammond youths? Annals of the Hammond police court will show that the bulk of the gang thefts, the box car robberies, and minor housebreaking crimes are engineered across the state line and by boys of tender years. There must be something vitally wrong with the bringing up, religious training and schooling of these boys. It has been brought out in evidence that in some cases parents of these offending youngsters were not without knowledge of these pilfering expeditions. It is only necessary to go to the authorities in Hammond and West Hammond to verify these cases. In some larceny cases West Hammond boys have even got into the East Chicago police court. These boys are finding that the path to the bridewell and penitentiary is not as hard to tread as it might be. Something is wrong with the system of home training where children begin to pilfer.

MRS. CHARLIE CHAPLIN certainly has a cause for separation on the ground of non-support, since she had to worry along on \$102,000 a year. We wonder how she did it?

THE PASSING SHOW

AN optimist generally thinks
HOW much better off he is than others
BUT a pessimist whines how
MUCH worse off he is than others.

RANDITRY over the country
SEEMS to be as safe as pinocchio
AND a blamensis more lucrative.

THERE are three things that is no longer
POSSIBLE to get—
AN inexpensive wife, an inexpensive meal,
OR an inexpensive house.

THERE is a suspicion in some minds
THAT when the millennium does come
IT, too, is to be compulsory and
THE reformers may force it on us.

ONE of the oft-quoted expressions:
"OH, you can't believe everything you hear"
BUT for some reason or other
ALMOST everybody does.

CONGRESS is perfectly willing to provide that bonus
BUT balks at providing payment—
BETTER get rid of the lawyers in congress
AND elect a few financiers.

ONE of the esteemed neighbor women remarked:
"I USED to be fond of fiction but
MY husband has got me fed up on it."
IN many parts of Germany
THEY are clamoring for bread and not bullets—

WELL, we suggest a compromise and
WOULD be willing to give 'em baking powder biscuits.
WHEN they ceased cranking
AUTOMOBILES profanity dropped off
FULLY 50%, but 27-cent gas
HAS brought the percentage back again to normal.

HEADLINE says that "Germany Prays For
ANOTHER Bismarck"—
BETTER stop praying; along might come
ANOTHER Wilhelm II.

SOME of the union suits
FOR gentlemen which we see in the
ILLUSTRATED advertisements buttoned up
IN such odd ways
THAT we are morally sure we
SHOULD never get 'em fixed right and
WOULD feel as if we were coming to pieces

ALL the time more than we do now
WITH our row of clanking safety pins.
IF you had the million dollars
YOU'VE always longed for, isn't it a fact
THAT you'd be a million times
BIGGER fool than you are now.

AFTER wading through reams of literature
WE understand that camels
COME under the hood of
SEMI-EFFECTS and can well understand it
FOR the few we have been permitted
TO give the once-over
ARE certainly extremely scum.

BUG-OLOGY
Figure This Out

Bedbugs lap an average of seven eggs per day. Under favorable conditions they hatch in five days, of which two-thirds are females. They mature to adult size and are capable of laying in four weeks. How many bedbugs would you have in a year if you left one female or one mated pair for one year? To rid the pesky bedbug you can readily see how necessary it is to use a preparation that will kill the eggs as well as the live ones. P. D. Q. has been demonstrated by the leading Hospitals, Hotels and Railroad companies that the safest and most economical way to stop future generations of bedbugs, roaches, fleas and ants is to use the new Discovery—Pesky Devils Quiescent.

A package of P. D. Q. makes a quart, enough to kill a million bedbugs, roaches, fleas and ants and at the same time destroy their eggs as well as the live ones. Impossible for them to exist when P. D. Q. is properly used. Free patent spent in every package to get the pesky devils in the hard-to-get-at places. Special Hospital and Hotel size \$2.50—makes five gallons of P. D. Q.—your druggist has it or can get it for you, or sent prepaid upon receipt of price by the Owl Chemical Co., Terre Haute, Ind. Success of P. D. Q. has caused imitations, genuine P. D. Q. is never peddled.—Adv.

Pennsylvania VACUUM CUP CORD TIRES

Compare These Prices

—standardized net and uniform throughout the United States—with those of ordinary makes.

They refute the idea that quality and high prices must of necessity be inseparable.

The prevailing very moderate prices of Vacuum Cup Tires and "Ton Tested" Tubes are the result of an efficient plant organization, working in a most modern factory which employs every improvement and labor saving device, and marketing under an economical zone selling system, thus attaining a perfect balance of highest quality at reasonable prices.

Pay no more than the standardized net prices for Pennsylvania products—do not expect them for less.

The telephone number of a big business house is 7000. A residence subscriber whose number was 6000 requested us to change his number. He complained that he was called a score of times a day by people wanting the business house.

The explanation is that many people guessed at the number, and guessed wrong, asking the operator for 6000 instead of 7000.

It is easy to be wrong when you guess, and unfortunately the person called in error generally blames the service.

Next to guessing as a fruitful source of unsatisfactory telephone service is placing of undue faith in the correctness of the number on an old card, letterhead or list tacked to the wall. Use instead the Ready Reference Register on the inside front cover of the directory.

But better still, in a big telephone system where numbers are constantly changing, one should always make sure of the correct prefix and number by consulting the telephone directory before calling.

It is the quickest and surest way to get the right number.
