Saturday evening witnessed one of the most serious smash-ups on the L. S. & M. S. road that has occurred on this road for some time, freight train No. 22 colliding with No. 33 near Wawaka. Fifteen cars were literally smashed to pieces, while of the locomotives nothing was left but a piled up mass of wheels and iron. The engineer and firemen jumped when they saw that a collision could not be avoided, thereby saving their lives. One of the firemen, named Jones, had an ankle sprained and engineer Clair lost a valuable watch. The 10:42 passenger train going east came to a stand still. Since returning home, and seeing the stir noticeable in our little place, he would not exchange for a half dozen larger places that he had visited. Before leaving he had entertained the idea that Ligonier was a very dull place, but this idea was erroneous, and now he feels very much encouraged at the activity compared with towns of more than twice its size in the east.

Young Harlin was strangled to death by getting a kernel of corn into his wind-pipe.

Harlin has gone to the land of love, to dwell with the angels up above;

No trials and troubles can enter there, he is at rest now.

The poor young lad cannot die, has caused many a sighing heart;

But joy to him, his trials are over,

He is now at home on the other shore.

Mr. J. E. Fleming, having returned from a few weeks visit to the east, was interviewed by one of our reporters with regard to business prospects in that section. He says wheat is looking better and will yield more bushels per acre than here. The farmers are afraid of tramps. The latter ask for work, and offer to do it at \$1.50 per day, while the farmers want to pay but \$1.25. The tramps threaten to burn agricultural implements and the crops unless their wishes are acceded to. Business, in towns of twelve to fifteen thousand inhabitants, is at a stand still. Since returning home, and seeing the stir noticeable in our little place, he would not exchange for a half dozen larger places that he had visited. Before leaving he had entertained the idea that Ligonier was a very dull place, but this idea was erroneous, and now he feels very much encouraged at the activity compared with towns of more than twice its size in the east.
