

Women Who Wear Well.

It is astonishing how great a change a few years of married life often make in the appearance and disposition of many women. The freshness, the charm, the brilliancy which like the bloom from a peach which is rudely handled. The matron is only a dim shadow, a faint echo of the charming maiden. There are two reasons for this change, ignorance and neglect. Few young women appreciate the shock to the system through the change which comes with marriage and motherhood. Many neglect to deal with the unpleasant pelvic drains and weaknesses which too often come with marriage and motherhood, not understanding that this secret drain is robbing the cheek of its freshness and the form of its fairness.

As surely as the general health suffers when there is derangement of the health of the delicate woman's organs, so surely when these organs are established in health the face and form at once witness the fact in renewed comeliness. Nearly a million women have found health and happiness in the use of Dr. Pierce's Favorite Prescription. It makes weak women strong and sick women well. Ingredients on label—contains no alcohol or harmful habit-forming drugs. Made wholly of those native, American, medicinal roots most highly recommended by leading medical authorities of all the several schools of practice for the cure of woman's peculiar ailments.

For nursing mothers or for those broken-down in health by too frequent bearing of children, also for the expectant mothers, to prepare the system for the coming of baby and making its advent easy and almost painless, there is no medicine quite so good as "Favorite Prescription." It can do no harm in any condition of the system. It is a most potent invigorating tonic and strengthening nerve tonic, adapted to woman's delicate system by a physician of large experience in the treatment of woman's peculiar ailments. Dr. Pierce may be consulted by letter free of charge. Address Dr. R. V. Pierce, Invalids' Hotel and Surgical Institute, Buffalo, N. Y.

Breathing Lampblack in the Country.

A careful glance at white lace curtains that have been hanging for some time in a room where Kerosene or Gasoline Light has been used will tell its own story.

Another look at the wall-paper on ceiling and walls will also tell the tale, if that paper be light colored and in use for a year or so.

The Lampblack will be found deposited in very fine, closely-packed layers upon everything in the room where Kerosene or Gasoline Lamp Light is constantly used.

Acetylene Light is practically Sunlight, being a pure white light without color, fog, soot, smell or heat. Being the light of the future, it is one-tenth Light like that of Kerosene and Gasoline, only one-tenth as much flame is needed from Acetylene to produce as much light as nine-tenths from Kerosene or Gasoline.

This means with Acetylene, only a small fraction of the heat, soot, oxygen-consumption, and Carbonic Acid Gas production of Kerosene, Gasoline or City Gaslight.

A 24 candle-power Kerosene Lamp used 10 hours will cost about 6 cents for Kerosene, Chimneys and Wicks.

A 24 candle-power Acetylene Gas Light used 10 hours will consume nothing but one fourth of Carbide at 3¢ cents in most States.

Thus Kerosene Light costs 6 cents against the same volume of Acetylene Light for 3¢ cents when once installed.

Because, with Kerosene or Gasoline Light we are paying for one-tenth Light and nine-tenths soot, heat, color, fog, and other useless or injurious things besides.

Drop me a line to-day for further particulars. State how many rooms you have to light or how large your store.

Address me, thus—Acetylene Jones, 5 Adams St., Chicago, Ill.

PETTIBONE DEFENSE FOREGOES ARGUMENT

CASE RESTED AND OFFER TO SUBMIT WITHOUT CHALLENGE IS MADE.

COURT INSTRUCTIONS ARE TO BE EXAMINED

Adjournment in Trial is Taken Until Friday Morning—Killing of Frank Steunenburg is Sole Point at Issue, Declares Judge Wood.

Boise, Idaho, Jan. 1.—The defense rested in the Pettibone case Tuesday and offered to submit the case to the jury without argument.

The illness of Pettibone, which is critical, had much to do with the decision of the defense to submit the case without argument.

When court convened the defendant was at his place, but showed plainly the effects of his illness. After the formalities of opening the court had been concluded Judge Wood, for the defense, announced that the defense would rest its case and offer to submit it to the jury without argument.

This announcement came as a complete surprise to the state. Judge Hilton said that he had gone over all the testimony, and as the state had failed to connect the defendant with the crime charged in the indictment it had been decided to offer no further testimony.

Attorneys in Conference.
Senator Borah asked for a recess in order that the proposition of the defense might be considered, and Judge Wood granted the request. After a brief conference of the state attorneys the senator stated that the question of dispensing with the arguments could not be settled until the instructions of the court had been examined. Judge Wood then announced that he would have his instructions ready by Thursday morning, and after he had instructed the attorneys to submit their suggestions an adjournment was taken until that time.

The case now hangs entirely upon the nature of the instructions of the court, so far as further proceedings are concerned.

Basis of Pleas of Defense.
The prosecution admits that there has been no corroborative evidence connecting the defendant directly with the killing of Steunenburg, but it is basing its hope of conviction on the establishing of proof of a conspiracy to kill enemies of the Western Federation of Miners, alleging that the murder of Steunenburg was an incident to that conspiracy. If Judge Wood in his instructions holds that it is necessary for the state to produce corroborative testimony showing Pettibone's connection with the crime charged there will be no argument. If, however, the court instructs that proof of conspiracy in itself is sufficient, providing the state has presented satisfactory proof that the defendant was a member of the conspiracy and that the killing of Steunenburg was an incident to it, the case will be argued.

Judge's Instructions.
The state has asked that instructions to this effect be given. In his instructions in the Haywood case Judge Wood said:

"It makes no difference in this case what crimes have been committed in Colorado, in the Coeur d'Alenes or elsewhere, or who is responsible for the commission of such crimes, if any there be, the defendant cannot be convicted unless the state has established beyond a reasonable doubt that he is guilty of the crime charged in the indictment, to wit: The killing of Frank Steunenburg."

IMPROVEMENT IN FINANCES.

Conditions of New Year Declared Better Than One Year Ago.

New York, Jan. 1.—The year 1907 has been one in which there has been much making of financial history. It will go down with 1897, 1873 and 1893 as one of the panic years in American financial history, but despite the remarkable stress and strain to which the financial structure has been subjected, the year closes with conditions stronger and safer than they were when the year began.

The year opened with the feeling in conservative quarters that speculation had already been carried to an unwarranted height and that prudence was imposed by conditions upon bankers and capitalists. That this feeling operated to some extent throughout the year and that there was a scarcity of capital for absorbing new securities was indicated by the diminished transactions in stocks and bonds on the New York stock exchange.

Great Future for Berlin.

The biggest city in the world 50 years to come will be Berlin. That is the calculation of Herr Olumke, a noted statistician. Its population will be near 14,000,000, and its only serious rival will be New York. In a pamphlet he has written to set forth this prophetic theory, Herr Olumke says the population of Berlin is increasing more rapidly than that of any other city except Budapest, Hungary.

To-day Great Berlin contains over 3,000,000 inhabitants. The rapid growth with Berlin's political and commercial importance will place the Prussian capital ahead of London, Paris and New York. He calculates that London in 1953 will have 7,000,000 inhabitants.

STEAL \$2,589 IN CAR FARES

CHEST CONTAINING CASH TAKEN AT ROCHESTER, N. Y.

Thieves Dash Up in Auto, Lift Box Into Machine and Drive Away to Safety.

Rochester, N. Y., Jan. 1.—Two men stole a chest containing \$2,589 from a street car standing in front of the Main street east car barns Tuesday and got safely away with it in an automobile.

The stolen money represents a day's earnings of the Rochester railway company on what is known as the eastern division. It was being transferred according to custom from the Federal street barn to the State street office to be counted. The car was in charge of Motorman W. Glover and Conductor L. B. Clark.

They stopped the car at the Soda Bay station at East Main street and went inside. As Glover entered the door he saw an automobile drive up beside the car, but paid no attention to it. The two men were in the station only about a minute, but when they reentered the car they found that the chest which contained the money was gone from the front platform. The tracks of an automobile in the snow led close to the car and east on Main street. An old man who boarded the car saw two men take the chest and place it in the tonneau of the waiting automobile.

He supposed they were from the company and paid no attention to it at the time. The police were notified of the robbery, and detectives in automobiles were soon in pursuit. The robbers were traced out to the Buffalo road, but there the trail was lost. The police of surrounding towns have been notified.

The robbers must have been familiar with the fact that money was transferred as this was being, each day. Most of the money was in silver coin, and the chest was so heavy that one man could not carry it.

WANT DECISIONS DISAPPROVED.

Land Rulings by Denver Judge Disliked by President.

Washington, Jan. 1.—At the last cabinet meeting of the year 1907, Tuesday, the decision was reached by the president and Attorney General Bonaparte that the government will use every means in its power to bring about in the higher courts disapproval of the decision rendered in Colorado by Judge Lewis that there is no law against citizens agreeing in advance to purchase coal or other public lands that may be acquired by others under what is known as the dummy entryman system. Attorney General Bonaparte said after the cabinet meeting that it was fortunate that congress last year passed a law giving the government the right to appeal in criminal cases, as undoubtedly the government would appeal to its fullest extent against a decision quashing indictments against men charged with illegally acquiring coal lands.

Strawberry Luncheon.

Now is the season for a strawberry luncheon and it may be made a most attractive affair. For the centerpiece use a rustic basket filled with vines and real strawberry plants bearing the fruit. At each place have a white card with shade of crushed strawberry color. Serve first five big, luscious berries on a small, leaf-covered plate with a neat pile of pulverized sugar in the center, or if procurable, use small, leaf-lined baskets for this purpose, tying the place card to the handle. Next serve tomato soup, then salmon croquettes, turkey potpies and beef salad. For the dessert course have individual strawberry shortcakes. With them pass a bowl of whipped cream for those who wish it. It is a good rule never to serve any fruit with cream on it as many people can not eat it with fruit acid.
