Several weeks ago, a tramp printer who gave his name as John Randall, secured work at this office. He stayed with us ten days but it was soon found that he was an "undesirable citizen" and allowed to go. Last Friday he was arrested at Huntington charged with stealing three name-bearing machines, valued at \$40.00, from the office of the Herald. It seems that the fellow had sold one of the machines to the Herald foreman the day before, claiming that he had taken it for work done in a neighboring office. The machine was compared with others in the office and in that way Randall found where they were kept. That night the three machines disappeared and Randall was arrested, but no property was found. The Largest Tree in the World

is the giant Cypress near Oaxaca Mexico. When the Spaniards landed in Mexico they were much impressed with this enormous tree of which they wrote that the Aztecs looked upon it as sacred. This immense tree measures 120 feet in circumference and is supposed to have been planted by the ancient Mexicans at least two thousand years before the Christian era.

What do you suppose those Spaniards would think now if they were to come back here and see the great amount of American Fencing we are now selling. We have looked in vain for something better but find the American Steel and Wire Co's progress ahead of all fence companies and that they are now using the best wire they now manufacture in their own fencing. It is tougher, stronger and more elastic than other fence, besides the larger variety of styles gives you the very fence for the purpose needed. If you want heavier fencing we have it. If you want Red Cedar Posts we have them. If you want Round Steel Posts we have them. We are in the lead in the fence business and have the best fence manufacturers today in America.
