WEIR'S

NOTICE TO DEFENDANTS  
State of Indiana Noble County 53:  
In the Noble Circuit Court  
March Term 1925  
Cause No.  
To quiet title to real estate.  
Sherman Morris

vs

Aaron F. Sroufe, et al.

Come now the plaintiff by both well & Vanderford his attorneys, and files his complaint herein together with the affidavit of a competent person that the residence upon which the inquiry is made of the following named defendants: Aaron F. Sroufe, Catharine Sroufe, David Bright, Leah Bright, Daniel Bright, John Slewin, William Phelan, Susan Phelan, John Slewin, John Slewin, Christiana Ruth, Eleanor Ruth, Elmer Ruth, Elmer Ruth, Myron F. Barbour, A. J. Merritt, whose christian name is unknown to plaintiff Jacob Ridenour, Joseph French, G. F. Clark, whose christian name is unknown to plaintiff, H. Bronson, whose christian name is unknown to plaintiff, George F. Clark, Alla H. Clark, Hiram Bronson, Mary A. Bronson, Mary Ann Bronson, Hiram Bronson, Mary Ann Bronson, John R. Cook, Samuel Hanna, Eliza Hanna, Charles Hanna, Henry Hanna, Horace Hanna, Samuel T. Hanna, William W. Hanna, Hugh T. Hanna, Eliza Hanna, Thomasetta Hanna, Clara L. Carnahan, Wm. S. Carnahan, Oliver S. Carnahan, James T. Hanna, Hugh McCulloch, Rufus French, Oliver W. Jefferson, George W. McConnell, Wm. Taylor, Hugh Hanna, Philip Hoagland, Jesse L. Williams, William W. Hanna, Hush P. Hanna, Clara Carnahan, Oliver T. Hanna, William Taylor, Philip Hoagland, Rufus M. French, William M. Taylor, Hugh McCulloch, Treasurer, that the names of the defendants are unknown and that they are believed to be non-residents of the State of Indiana.

The following real estate in Noble County State of Indiana, is described in said complaint, to-wit: fractional lots numbered two, three and four of the "Indian Reserve" in section 36 of township thirty-four north and range eight east, constituting and being a part of the northeast quarter of said section seven aforesaid also the southeast quarter of the southwest quarter of section six township thirty-four north range eight east.

This action is instituted and prosecuted by said plaintiff for the purpose of quieting his title to the real estate above described as against all demands claims and claimants whatsoever.

Notice is therefore hereby given said defendants that unless they be an appear on the 13th judicial day of the March 1925 Term of the Noble Circuit Court of Indiana being the 23rd day of March 1925 to be begun and holden on the 2nd day of March, 1925 at the Court House in the town of Albion in said Noble County in the State of Indiana and answer or demur to said complaint, the same will be heard and determined in their absence.

In witness whereof I hereunto set my hand and affix the seal of said Court at the office of the Clerk thereof in the town of Albion Indiana this 27th day of January 1925.

Francis M. Beane, Clerk of the Noble Circuit Court  
Bothwell & Vanderford  
Attorneys for Plaintiff. 4953w

Grand Jury Note.  
Thirty-eight members of the Goshen post of the American Legion headed by a male and "it up" by red flares put Goshen on the district map of the Legion in a parade during a district Legion convention at Warsaw Monday evening.

The male bearing a banner "Grand Jury Note" headed Goshen's delegation in the parade through Warsaw streets which preceded in a big banquet given by the Legion auxiliary at the Red Men's hall.

Ask Temporary Separation.

Testimony in the divorce action filed by Elizabeth Billman against Benjamin Billman asking separation for two years was being heard in circuit court this week. Many people from New Paris where the Billmans reside were in the court room to hear the testimony some of which was of a sensational variety. Mrs. Billman was formerly Mrs. Fensel and both parties to the court action lived in Ligonier previous to their marriage.

Woman Badly Burned.

Mrs. Harry Cline, of Millersburg, is in a deplorable condition as a result of burns suffered Tuesday morning. Her clothing caught fire from a heater in her home and she was very badly burned from her knees to her hips. Mrs. Cline's daughter was with her at the time of the accident, and attempted to help her mother in extinguishing the flames, but they were unsuccessful. Neighbors who were attracted to the house succeeded in putting out the fire.

## ONLY BY FITNESS IS "COLD" AVOIDED

Well Person Is Not Susceptible to Affliction.

The "cold" season is here. Ask any doctor and he will tell you that two-thirds of his patients are suffering from them in greater or lesser degree, and yet, whether we fall victim or not is largely our own affair.

It is not a bit of use glaring at all the unfortunate persons who cough and sneeze in your direction. "A Doctor" writes in the Continental Edition of the London Mail. Of course they are discharging cold germs in the million, but then millions of them are floating about in the air anyhow, and you probably are quite immune to their attacks for months together. If a bacteriologist were to take a specimen of the air in the corner of your coat pocket, and were to smear it over a plate of gelatin, and then to keep the culture at a certain temperature for a few hours at the end of that time he would be able to show you a pattern traced on the gelatin which looks rather like a Chinese monogram, and would in fact be made by billions of "cold" bacilli. So it cannot be just that on a certain occasion one of the invading germs attacks us.

No, the whole truth is that they are attacking us every single minute, but we happen to be healthy enough at the time to throw them off and they retire without doing us any damage. Then one day we are overtired, or a little below par or worried about something and the next thing we know is that our throat feels dry and our head is heavy, and we know we are "in for it."

The moral of all this is to take regular exercise and to keep yourself at the top notch of general fitness. Then you can laugh at the cold bogey. Once attacked, however, the first thing to do is to tackle the place where you know the "cold" bacilli are gathering in their millions, and as these are the nose and the throat, immediate gargling and sniffling up some antiseptic lotion—it does not matter much what kind, provided it is warm and alkaline—is the first step.

Then have a hot bath with a good handful of mustard in it, so hot that you come out in a bath of perspiration, take ten grains of aspirin, and when you get into bed between rough, well-warmed blankets, let someone bring you a pint of boiling hot lemonade with plenty of sugar or honey in it. Taken at the beginning, a good many colds can be absolutely stopped by these methods, but once they have got a hold it is too late to do anything but grin and bear it.

## Navy Radio Communication

There will be increased interest in the radio and sound competition to take place on the battle fleet shortly. With the development of this means of communication the importance of its efficiency as part of the fleet's work is being emphasized. It will be regarded as one of the major competitions to take place on the fleet, says the Army and Navy Journal.

In arranging for the competition the commander in chief of the United States fleet has fixed the basis upon which the competition will be rated. Ten per cent is the credit to be given to efficiency of radio transmission. The same per cent is to be given to the operations of radio compasses. Thirty per cent is to be allowed for general communications while at battle stations and 10 per cent for the operations of sound apparatus. The balance is to be allotted for miscellaneous items of efficiency in communications.

According to reports received at the Navy department communications by the Bellevue laboratory were maintained with the Shenandoah up to the time she reached San Diego. This is a remarkable record in view of the unfavorable conditions.

## New "Collecting" Hobby

And here comes a hobbyist who collects bricks. His home is in Dorchester, Mass., and he has an array of 300 bricks which he started to collect in 1872. Churches, schoolhouses, residences and public buildings have yielded their bricks. Many of these are intimately associated with Dorchester's earliest history, and consequently have been photographed and pictured for posterity. This collection of bricks is remarkable, but more remarkable is the fact that upon one of the broad sides of each brick has been painted in oil, true in detail and color, a picture of the building from which it was taken.

## German Marks Worthless

German paper marks are only good as junk now. The paper mark went out of business a year ago, when the rentenmark came in use. There was then so much of this kind of currency on hand that in numerous instances banks and other institutions turned the marks over to junk dealers by the ton. Most of these notes, which toward the end of the inflation period were not worth the paper used in their manufacture, have been destroyed or made into pasteboard boxes and the like.

## Electric Invalid Carriage

An electric automobile especially designed for invalids is now being made in England. It carries but a single passenger and runs so smoothly that the invalid is not jounced or jarred while riding in it. It is especially designed for those invalids who find the usual types of mechanically propelled vehicles unpleasant by reason of noise or jar.

Mrs. Frank Raubert is in Chicago this week visiting Mr. and Mrs. William Callahan.

Thermometers registered below zero again Tuesday night.

## Tuberculosis Enemy of Young Womanhood

It would be disconcerting indeed to accept as medical gospel the statements of Dr. Eugene Lyman Fisk before the national educational conference in New York, concerning the physical deterioration of the present-day girl. His main thesis is that she is giving way under the strain involved in self-confidently defying tradition and convention. He thinks the price she pays for what she considers her freedom is a shortening of her years, an inability to reap all that should be harvested from life, physically and spiritually, and a general depression of health.

If it be established as a universal fact, embracing the whole country, that the death rate among women is greater than among men only between the ages of seventeen and thirty-two, the reasons are to be sought elsewhere than in the woman's enjoyment of "this freedom." Tuberculosis, childbirth and influenza are assigned as the principal causes of mortality in these 15 years. But one of the boasts of medical science is the relative conquest of perils attending childbirth, and women would hardly seem more susceptible to influenza than men.

Tuberculosis remains as young womanhood's most deadly enemy. It is "defiant and resistant" at the ages mentioned, though yielding in all other groups of the population. This is where faulty diet and late hours tell most heavily on young women engaged in commercial and industrial employments. The practical remedy seems to lie in a return to the normal home life of the mothers, and every influence of church and school, of teacher and doctor, should be directed to such a readjustment of social life as would assure her proper proportion of healthful repose to the young woman who spends her working hours in office or factory.—Philadelphia Bulletin.

## Pest Made Useful

At the Pacific Northwest forest experiment station at Portland, Ore., a method has been found to utilize the energies of a pest. One of the expensive processes in paper making is the barking of logs, for no bark should get into the wood pulp. The director of the station, Thornton P. Munger, has recently been informed by Dr. F. C. Craighead of the bureau of entomology that beetles can sometimes be persuaded to perform this work.

The southern lumber company gets the beetles to work, Mr. Munger was told, by grinding close to the ground the pine to be cut for pulpwood." The service bulletin says: "If this is done in the late summer, a multitude of bark borers and other beetles are attracted to the trees and in a few weeks have the bark so completely loosened that it can easily be slipped off when the trees are felled. At this point, however, the truce between beetle and forester is at an end, for logging during the winter following destroys the insects harbored in the bark, and this one abundant feast is their last."

## Opportunities in China

Here are a few reasons that China is the land of opportunity for foreigners:

Electricity is just "coming in." In the past ten years 100 electric power plants have been built. Think for a moment of the electrical machinery and supplies used in America and then imagine, if you can, what will be needed to outfit a nation of 400,000,000.

The United States has 235,000 miles of railway; China has 7,000. When China begins in earnest to develop her immense resources transportation will call for enormous quantities of supplies and equipment.

The country is one of the world's largest fields for graduates of American and European technical schools. They will be needed to help China build railways, highways, water works, factories, power plants and river and harbor works.

And, with highways, will come the demand for automobiles.

## Had Many Occupations

The Nobel prize winner in literature for 1924, Wladislaw Reymont, the Polish writer, started life as a telephone operator in a small railroad station. Later he joined a traveling theatrical company and then drifted to other occupations, at one time being a railroad worker and another a farm hand. He once went to the famous Polish cloister at Czestochowa, intending to become a monk. His first stories were published in magazine form in 1898. His most famous work, the novel "Peasants," issued in four volumes—"Autumn," "Winter," "Spring" and "Summer"—has been translated into all the European languages. M. Reymont is wealthy and has an estate near Posen.

## Propeller for Skiers

Motorized skiing is a novel sport recently made possible by means of a small air propeller driven by a light motor that is strapped on the back of the skier, says Popular Science Monthly. The invention, from Germany, is said to enable an experienced skier to travel on the level at high speed. The propeller is started and stopped by a pneumatic device similar to that which operates a camera shutter.

## United States Leads

The United States is now using almost as much electricity as the rest of the nations of the world combined and the electric service station and power industry of the United States is growing more rapidly than any other industry in the country.

## Income no Measure of Success

It takes something immensely greater than income to make an immortal life successful. That something is found in the goods the Christian Church offers to the world and it is found no where else.

The wise man seeks that success which is measured not by time but by eternity. Go to church.

During the war we heard much about loyalty. The man who was not out and out for his country was regarded with suspicion. The man who is not wholeheartedly for home and family and for the institutions safe guarding them is also regarded as disloyal.

Your attendance at Church is an expression of loyalty. Our program is worth your while. Come sample it Sunday.

Ira C. Boyts, pastor.

## Ticket Dance at Eagles.

The Eagles will give a ticket dance at their parlors after the basketball game Friday evening January 30. Everybody is invited to participate.

Mr. and Mrs. John Crothers of Sparta township were dinner guests Wednesday of Mr. and Mrs. James Ballah. Mr. Ballah has been considerably under the weather for some weeks.
